370 / 1466 N.P.E 14-HVAC RB4	Supply and installation of automatic source switch for power management type SEFFC (to be placed on on-board equipment), modular, three-phase fully apparent opening for use low voltage systems with timed opening of load power supply during transfer. The ATS unit will provide open transition type switching (I-0-II), transfer under load between two sources for any low-voltage power circuit, as well as safety isolation by double opening per pole. The product is fully programmable and has all the functions in the unit as well as some additional programmable parameters and a trip function. Due to its communication properties, the product provides access via ModBus to voltage and frequency measurements and parameter settings. Specification. - Control type Automatic fully programmable - Number of poles 4 - Rated current 40 - Max. rated operating voltage Ue for AC [V] 800 - Rated operating voltage [V] 400..690 - Rated permanent current Iu [A] 40 - Rated permanent current at AC-23, 400V [A] 40 - Rated permanent current to AC-21, 400V [A] 40 - Resistance to short-time current Icw [kA] 4 - Rated operating power for AC-23, 400V [kW] 30 - Rated breaking capacity at 400 V [kW] 30 - Rated conditional short-circuit current Iq [kA] 50 - Number of poles 4 Included in the tender is IP67 metal protective carpentry to enclose the switch in the inside. Complete with every accessory, communication board for remote analysis and Ethernet/ modbus connection cables. *ITA: ATS per gestione alimentazione SEFFC* *ENG: SEFFC ATS Supply* RIBA 4			4,00

	E34 - Electro-magnetic Shielding / Schermatura Elettromagnetica (SbCat 34)					
390 / 1478 N.P.E 01-SCH	Supply and installation of shielding system for the realization of shielding from electromagnetic fields from 0 Hz to 150 kHz made of flexible metal mesh 0.6 mm thick in weft and warp, protected from corrosion and electrically insulated with polyester coating with textured reinforcement in glass fibers 250 µm thick on the visible side, on the opposite side and installation aimed at respecting the quality objective of B ≤ 3 µT (D.P.C.M. 8/7/2003), with polypropylene coating with reinforcement woven in 125 µm thick glass fibers, design verified according to CEI 211-6, without adding additional conductive elements, except for executive technical requirements. The installation includes every fixing element or accessory necessary to give the finished work in its entirety before the release of the construction site. Thickness: 0.6 - 1.3 mm Weight: 3,6 - 7,2 kg/m2 The turnkey supply is expressed in body and includes: Design and analysis of electromagnetic impact with SW. EFC400 certificate (margin of error +/-1.4%); architectural survey; preparation and supply of the material; yield ex construction site; installation. Complete with every accessory to give the finished work and working in a workmanlike manner. *ITA: Sistema di schermatura elettromagnetica locale tecnico generale - Building Area "0"* *ENG: electromagnetic shielding system technical room - Building Area "0"* RIBA 3 RIBA 4

413 / 1786 N.P.E 01-LFE	Supply and installation of Supervision Central Unit for emergency lighting systems equipped with a microprocessor capable of automatically performing periodic centralized checks to verify the efficiency status of an emergency lighting system. Central unit interface implemented on Web Server accessible remotely from any PC with any Internet browser. Number of luminaires that can be connected 256 on two bus lines, expandable to 1280 through special repeaters. Ethernet port with TCP/IP protocol for Ethernet/Internet connection. Self-acquisition via software for luminaire identification via RS485 bus. management of 32 logical groups of luminaires, Li- PO4 battery for 4h of autonomy in the absence of power supply. Equipped with 2 green LEDs for system signaling in operation and 10Mb/s Ethernet connection, Equipped with additional red LED for anomaly signaling. Prepared for installation in 19" Rack cabinet - 1 unit. (supply and installation of 16U rack cabinet including all necessary accessories is included in the offer). Power supply 230Vac 50Hz, complete with programming and installation manual. All inclusive of all accessories and charges to give the system finished and functioning professionally. *ITA: Centrale supervisione impianto illuminazione emergenza - Entrance Room* *ENG: Supervision Central Unit for emergency lighting - entrance room* RIBA 3 RIBA 4			1,00

445 / 1556 N.P.E 01- RI	Supply and installation of Fire Detection Control Panel, **8 loops** analog addressed in medium box complete with command and control panel with color graphic display and 24 Vdc 5 A power supply. Basically equipped to manage 8 loops of 200 addresses each expandable to 10 loops to manage up to 1,600 addresses. Central unit also configurable with open lines (e.g., 8 loops = 16 open lines). Equipped with USB port, Ethernet port, RS422 MODBUS port, RS485 port for repeater panels, printer output, 3 relays, 24 Vdc 500 mA output, 2 24 Vdc 1 A siren lines and 2 programmable inputs. MGNET connectable. EN54-2, EN54-4 and EN54-13 certified. Composed of: - No. 1 Card to network the control unit (up to 16 control units per MGNET network, with possibility of cross interactive logics); - No. 2 12 V 12 Ah sealed lead-acid battery; - No. 1 Specific fiber optic converter (including transmission of back-up alarm signal). Also suitable for remote command and control panels, remote repeater panels and printers. Maximum distance 6 km with G50 / 125 µm or G62.5 / 125 µn multimode optical fiber, ST connector. Power supply 24 Vdc, absorption 35 mA @ 24 Vdc, mounting on DIN rail. All inclusive of all accessories and charges to give the system finished and functioning professionally. *ITA: Centrale Fumi 8 Loop CCS01 - Entrance Room West* *ENG: Fire detection control Panel 8 Loop - Entrance Room West* RIBA 3 RIBA 4			2,00

	to multiple zones. - 4 monitored analog audio inputs + 8 unmonitored analog audio inputs + 2 audio from digital sources . - 16 monitored "trigger" inputs for triggering events (alert, evacuation, etc.) from fire control panel or other devices. - Built-in 480W audio power supply; - USB connector for connecting external mass storage devices; - Proprietary digital bus for microphone bases; - RS232, and Ethernet communication ports; EN54-16 certified; Power supply: 230V ac and 24V dc; Dimensions: H88 x W430 x D330 mm.- Weight: 6.3 kg. - Color: black.; **No. 3** Expansion unit, control for voice evacuation systems, 8 single lines (or dual with optional MET8SC board) with 8 unmonitored audio inputs, Certified to EN54-16 standards, Power supply: 24V dc. Dimensions: H88 x W430 x D330 mm. - Weight: 4 kg. - Color: black; **No. 4** Dual line board, 8 line-zones; **No. 1** Panel with USB jack, STIpa RCA signal input, AUX Jack 3.5mm input. Size 1 UR; **No. 4** Power amplifier module, class D, with muting circuit for elimination of impulse noise at power on, protection device against short circuit, overload and with ventilation system for forced air cooling. Balanced inputs and outputs with removable screw terminals. Power outputs, for speakers with removable screw terminals, voltages 100V - 50V - 33V. LED light signals for power on, signal presence and saturation clip with protection trip. Input sensitivity: 1V rms Output power: 180W (power supply 29V dc) Frequency response: 68 Hz÷20,000 Hz Enclosure, black color. Footprint 2 units or 3 units depending on the support plane utiizzato, Power supply: 24V dc nominal. Certified to EN54-16 standards. Overall dimensions: H88 x L130 x D420 mm. - Weight: 3.7 kg. **No. 18** Power amplifier module, class D, with muting circuit for elimination of impulse noise on power-up, protection device against short-circuits, overloads, and with ventilation system for forced-air cooling. Balanced inputs and outputs with removable screw terminals. Power outputs, for speakers with removable screw terminals, voltages 100V - 50V - 33V. LED light signals for power on, signal presence and saturation clip with protection trip. Input sensitivity: 1V rms Output power: 150W + 150W (29V dc power supply) Frequency response: 40 Hz÷20,000 Hz Container, black color.Footprint 2 units or 3 units depending on the support plane used, Power supply: 24V dc nominal. Certified to EN54-16 standards. Overall dimensions: H88 x L130 x D420 mm **No. 3** High output, low ripple, stabilized power supply module for audio amplifiers, rated output voltage 29V dc. consisting of: - 720W audio single version module. - LED light signaling of presence of output power supply. - Thermostat-controlled fan. - Overload, short circuit, overtemperature, overvoltage protections. - Input power supply: 230V ac, 50-60Hz. - Metal housing, black color. - Footprint 2 units or 3 units depending on the support plane utiized. - Certified to EN54-16 standards. **No. 3** High output, low ripple, stabilized power supply module for audio amplifiers, with rated output voltage 29V dc. consisting of: - 720W+720W audio dual version module. - LED light indication of presence of output power supply.Thermostat-controlled fan. - Overload, short circuit, overtemperature, overvoltage protections. - Input power supply: 230V ac, 50-60Hz. - Metal housing, black color. - Footprint 2 units or 3 units depending on the support plane utiized. - Certified to EN54-16 standards. Dimensions: H88 x L130 x D420 mm - Weight: 3.1 kg **No. 2** Control units for 6 power supplies with 100Ah battery charger. System for control and status display, of 6 power supplies, with battery charger, lead-acid type batteries, up to 100Ah complete with probe for charging temperature control. Rated working voltage 24V dc, maximum capacity per output 32A, total controlled power 2400W. RS232 port.Metal case, black color. Primary power supply: 230V ac. Footprint 2 units or 3 units depending on the support plane utiized. Certified to EN54-4 standards. Dimensions: H88 x W483 x D380mm. - Weight: 5.3Kg; **No. 2** Kit consisting of 2 100Ah batteries, total 24V dc, with suspended stand, locking rack panel and 22x58 fuse. **No. 2** reinforced rack furniture wheels kit n°1 connection kit with "heratcube" processor bidirectional exchange 22/2737 All inclusive of all accessories and charges (piping, fittings, junction boxes) to give the device finished and working in a state of good working order. *ITA: Centrale EVAC MIL 06.B*

510 / 1675 N.P.E 05-CA	Access control unit Supply and installation of Access Control Unit for maximum management of 4 single reader doors and/or 2 double reader doors with the following features: 4 Wiegand inputs, 4 Relays, 8 TTL inputs, 8 TTL outputs, 4 RS485 ports for door readers. 12VDC power supply. LAN communication/programming port. RS485 auxiliary port for communication/control of Slave devices on BUS. Includes: - PVC pipe, flexible branded, heavy, corrugated GWT 850 °C, placed within plasterboard walls, or within false ceiling (if present in neighboring areas) in IP4X execution or alternatively rigid pvc piping GWT 960 °C, complete with IP55 fasteners and fittings; - junction box (round or rectangular) for fixing device to be mounted on ceiling/wall in easily accessible position IP55 utility-side terminal; - Customized Access Control Device Containment Box. Painted steel frame, IP54 protection, dimensions 600x400x135, Front cover via side-opening lid with universal plastic key. Panel name labeling on the front with screen printed plastic label. Box complete with protective disconnects and power supplies for electrical devices and locks. Pre-wired internal connections and pre-assembled boxes with switchboards according to design. - branch share in RS485 bus-type cable for series connection with other control units (to be verified exact type with system manufacturer); - label identifying the prewiring itself; Complete with every charge to give the component finished and functioning in a state of good

627 / 450 N.P.E 20- LF- RIBA 4	Supply and installation of waterproof LED ceiling fixture, IP66, with polycarbonate body and diffuser. For ceiling, wall and pendant mounting. PC diffuser with internal prism structure. With symmetrical wide-beam light distribution. Glare rating according to UGR < 25 classification (EN 12464-1). Luminaire luminous flux 6000 lm, power consumption 44.00 W. Color of light neutral white, color temperature (CCT) 4000 K, general color rendering index (CRI) Ra > 80. Polycarbonate luminaire body. Luminaire body color light gray (RAL 7035). With clampless closing technique for easy mounting suitable for the degree of protection of cover diffusers and luminaire bodies after connection. Dimensions (W x D): 1552 mm x 102 mm, luminaire height 91 mm. With digital dimming transformer (DALI) included. Degree of protection (DIN EN 60529): IP66, impact resistance rating in accordance with IEC 62262. Reference on plan **LF01A** (installations mainly in technical areas). All inclusive of all accessories and charges to give the system finished and functioning professionally. *ITA: Corpo illuminante a parete tipo LF01A* *ENG: light fixture type LF01A* RIBA 4 - Mep Gallery P01 RIBA 4 - ITA: *Aree Generatori / ENG: Generator areas* RIBA 4 - *ITA: Aree esterne camminamento Generatori / ENG: External walking areas Generators*			30,00 24,00 15,00

628 / 451 N.P.E 21- LF- RIBA 4	Supply and installation of Outdoor pole head luminaire. To be used in combination with fastening as a luminaire for straight pole (included in the following offer) to be ordered separately or for curved pole. LED system consisting of 2 MLT LED modules with 4 LEDs each. Luminaire luminous flux 2200 lm, power consumption 20.00 W, maximum luminous efficiency of the luminaire 110 lm/W. Color of light neutral white, color temperature (CCT) 4000 K, overall color rendering index (CRI) Ra > 70. Color tolerance (initial MacAdam) ≤ 5 SDCM. Other LED light colors available upon request. Average LCLO(tq 25 °C) reference service life = 100,000 h. The light source is interchangeable in accordance with the requirements of the European Ecodesign Regulation (2019/2020). Luminaire body made of die-cast aluminum. Insulation class (EN 61140): II, degree of protection (DIN EN 60529): IP66, impact resistance rating in accordance with IEC 62262: IK09. Shaft available on request. Wind-exposed surface area fw 0.100 m2. Weight: 4.4 kg. With digital dimmable transformer (DALI). Power supply complying with the DALI-2 standard (EN 62386). Parameterizable ballast with luminous flux stabilization (CLO). The ballast is interchangeable in accordance with the requirements of the European Ecodesign regulation (2019/2020). Differential Mode / Common Mode surge resistance: 6 kV / 10 kV. Reference on plan **LF15** (installations External/Roof). All inclusive of all accessories and charges to give the system finished and functioning professionally. *ITA: Corpo illuminante a parete tipo LF15* *ENG: light fixture type LF15* RIBA 4 - scale emergenza			1,00

656 / 295 N.P.E 04- CL	Supply and installation of wall recessed light control point for centralized control of ordinary zone lighting fixtures with intumescent protection for applications on REI compartments. Light switching control via 2/4-button pushbutton, with KNX/DALI (Digital Addressable Lighting Interface) protocol for local lighting fixture switching management and DALI scenario management (ON-OFF-DIMM +/-). The dimmable button must provide a controlled lighting setting between 30% and 70% of full lighting power. Realization of light control point, consisting of: - supply of No. 1 single-pole rocker switch; - Recessed pushbutton interface for KNX bus. It has 2 inputs for potential-free contacts and 2 outputs to drive LEDs. Power supply from the bus; - Supply of KNX BUS 1x2x0.8mm² LSZH transmission cable, originating from the previous KNX light point, with suitable threading pipe; It is included in the tender: Supply and installation of protection of electrical fruit boxes in walls (plasterboard and non-plasterboard) made by application of intumescent sheathing insertable inside a fruit box, adhering to the bottom and side walls. The restoration will ensure the degree of protection EI 120: - on flexible wall EI 120 for fire/cool side application in boxes of size 503 - on rigid wall, min. thickness 135 mm, for fire/cool side application in 503 boxes. Complete with all completion accessories such as (boxes,frame,plates,) device programming and protection certification to give the light control point finished and working in a workmanlike manner. Civil series and BTicino Light finishing plates (GE plate) to be confirmed with Architectural DL at the construction site. *ITA: Comando luce tramite pulsante KNX con protezione intumescente - Mep Gallery P00 Data Hall* *ENG: KNX push button for applications REI compartments - Mep Gallery P00 Data Hall* RIBA 3 RIBA 4			4,00

N.P.E 02A-RI	medium box complete with command and control panel with color graphic display and 24 Vdc 5 A power supply. Basically equipped to manage 2 loops of 200 addresses each expandable to 10 loops to manage up to 1,600 addresses. Central unit also configurable with open lines (e.g., 2 loops = 4 open lines). Equipped with USB port, Ethernet port, RS422 MODBUS port, RS485 port for repeater panels, printer output, 3 relays, 24 Vdc 500 mA output, 2 24 Vdc 1 A siren lines and 2 programmable inputs. MGNET connectable. EN54-2, EN54-4 and EN54-13 certified. Composed of: - No. 1 Card to network the control unit (up to 16 control units per MGNET network, with possibility of cross interactive logics); - No. 2 12 V 12 Ah sealed lead-acid battery; - No. 1 Fiber optic converter specifically for MGNET (including transmission of back-up alarm signal). Also suitable for remote command and control panels, remote repeater panels and printers. Maximum distance 6 km with G50 / 125 µm or G62.5 / 125 µn multimode optical fiber, ST connector. Power supply 24 VDC, absorption 35 mA @ 24 VDC, DIN rail mounting; All inclusive of all accessories and charges to give the system finished and functioning professionally. *ITA: Centrale Rivelazione Incendi - Fire Prevention Room Data Hall* *ENG: Fire detection control Panel- Fire Prevention Room Data Hall* RIBA 3 RIBA 4			1,00

Signature

1. GENERALITY

The document **3603 ES E ME 02-** is an integral part of the project description with the following address. This project was prepared by L22, a part of Lombardini S.p.A. located at Via Lombardini 22, Milan.

This volume, along with the remaining volumes of the Technical Report, drawings, and documents produced by the Client related to the general supply conditions, must be countersigned for acceptance on every page and returned to the Client. Examining all the documents is, therefore, a fundamental condition for the quotation and execution of the systems. Everything contained within is also fundamental for the correct interpretation of the instructions and provisions found in the other project documents. If there are any doubts about the correct application of their content, you should inform the designer so that they can provide the necessary clarifications in a timely manner.

The designer cannot be held responsible for any consequences resulting from the failure to comply with the above.

2. CLARIFICATIONS:

The descriptions provided here indicate the minimum functional performance requirements. The Contracting Company must carefully examine all the data and provisions contained in this document, as they will be fully and unconditionally responsible, by contractual agreement, for the correct functioning of the system, ensuring compliance with the specified conditions and operational requirements.
Regarding topics not covered or specific details not mentioned, it is required that the materials used and the execution of the work comply with European standards of equivalent value and have standardized dimensions according to the current Uni and DIN tables.
Further clauses regarding the relationship between the Client and the Contracting Company will be defined in the Contract of Award, to which this document and its attachments are an integral part.
Materials for which samples have been requested cannot be installed until they are accepted by the Site Management. The Contracting Company should not install materials rejected by the Site Management and should remove them from the construction site. The products to be installed should be those indicated in the project or, in the absence of a specific indication, those listed in the brand list.
The minimum warranty period is **24 (twenty-four)** months from the start of operation, as established by the Italian Codice Civile, Art. 1667. During this period, all defective parts must be replaced free of charge and in the shortest possible time.
The prices include and compensate for all expenses for labour, necessary supplies, their processing and use, allowances for access, deposits, site occupation, temporary and different occupations, provisional means of labor, and any other conditions specified in the safety plan attached to the documentation, with no exceptions, as well as charges, transportation, unloading, and everything else necessary to ensure that the work is completed to the highest standards and in full efficiency. The prices also include compensation for all the expenses that the contractor will incur for this purpose, even if not explicitly specified or referred to in the various articles of the list, except for what is explicitly excluded and, in any case, the scaffolding for external works outside of buildings.

If the project documentation contains conflicting data or information, the more costly and safety-beneficial ones shall be considered. The type of contract is defined in the contract drafted by the Client. The Contract will be awarded to a General Contractor, who will be responsible for the complete implementation of the work, of which the project in question is one of the constituent parts.
All works related to the contract will be carried out by the contractor in accordance with the provisions and conditions specified in the project drawings. It is essential to note that these provisions are not exhaustive, as the contractor expressly commits to executing the work in perfect accordance with the state of the art, in compliance with current legal regulations, to deliver a fully operational system at the offered price. In any case, it is the responsibility and obligation of the installer to deal with any issues arising from the application of clearly incorrect indications, such as those due to printing errors or the omission of essential safety measures if such errors/omissions are detectable based on the technical knowledge that the installer, by law, must possess, ensuring the conformity of the systems with the state of the art.
All works must be coordinated with the execution of other tasks, and the construction schedule must be submitted to the Site Management. During the course of the work, in accordance with the site and Client's needs, temporary works may be required to maintain the operation of existing systems or to enable the temporary operation of systems covered by this contract. The Contractor will be responsible for the operation of functional areas that must be kept operational during the work.
No changes in the execution of the planned works can be made by the installation company without prior approval and written authorization from the Client and the Site Manager.
If personnel engage in actions deemed serious by the Site Manager, they are granted the authority to immediately expel them without the Contractor being entitled to seek an extension or damages.

The Contractor, upon signing the contract, indemnifies the Client from any possible recourse action by subcontractors in the event of a dispute between the Contractor and the subcontractor.

The following points are the responsibility of the Contractor:

- Costs related to procedures for the application and compliance with regulations;
- certificates, etc., regarding the installation;
- Costs related to commissioning, fine-tuning, and testing of the system;
- Training of the Client's personnel;
- Inspection costs;
- Warranty costs;
- Costs related to documentation, as-built drawings, manuals, operating instructions;
- certifications according to current regulations;
- Documentation as required by D.M. 37/08. Attached to the compliance declaration, forms for submitting the declaration to ISPESL and ASL/ARPA must be prepared, in accordance with DPR 462/01;

- Costs related to on-site safety;
- Costs for coordination with other Contractors directed by the Client;
- Costs for site cleaning;
- Disposal of waste materials in authorized landfills;
- Costs for the custody and protection of materials installed and stored;
- Site organization;
- Costs for connections and temporary systems;
- Costs for personnel hygiene;

	Note (SpCat 1)					
1 / 515 N.P.E 01-NOTE	INTRODUCTION The quantities of materials indicated in the BOQ are to be considered approximate and must be checked by the Firm at the time of tender. It is understood that the acceptance of said quantities by the Firm entails the obligation to execute the installations as designed without the possibility of requesting in the course of the work variants for more supplies unless these have been expressly requested in the course of the work by the Client. The prices used to compose the following metric statement, were taken from: - Average market prices (N.P.E) - Specific bids from type suppliers - Electrical installations information price list version December 2022 The list of materials below must be completed by the Tender Company by filling in: 1. the column of unit prices, which will be used as unit prices in the accounting of any additional works and for any deductions in the case of partially completed works; 2. the column of total costs resulting from the product quantity by unit price. However, it should be recalled once again that the installation is to be considered contracted on a forfeit price basis.					
	SUB TOTAL a corpo			0,00		
2 / 516 N.P.E 02-NOTE	NOTE All prices are considered to include charges for the production of Construction Drawings Documentation: - Fees for the production of construction documentation, to be delivered to the DL in computer copy prior to execution of the work. Documentation must include coordination between architectural, electrical and structural drawings. - Fees for the production of electrical system construction drawings including dimensions of fixtures, conduits,lighting fixture traces, overlap with other ceiling electrical systems, electrical switchboard schematics, installation dimensions and technical characteristics of components to be installed.					
	SUB TOTAL a corpo			0,00		
3 / 517 N.P.E 03-NOTE	NOTE: Included in all prices are charges for the production of as-built documentation, to be delivered to the client in triplicate hard copy and computer copy. The documentation should include the updating of all graphic design documentation, diagrams of all systems built, the typical connections used and the programming set in the power plants, certifications and approvals of the materials used together with the manufacturer's documentation.

210 / 1841 N.P.E 02-SPD RIBA 4	Supply and installation of surge protector for medium voltage 15kV. Supply and installation of surge arrester (single-pole) for medium voltage, according to IEC 99-4 / EN 60099-4 / ANSI/IEEE C.62 11 standards. Protective apparatus executed with FRP tube casing, covered with silicone rubber, composed of zinc oxide varistors, equipped with stainless steel M12 threaded pins for electrical connection and mechanical fastening, construction form with fins for high degree of contamination, for indoor and outdoor use Discharger in accordance with ENEL specification DY557/4 Rated voltage Ur: 18 kV Maximum continuous voltage Uc: 14.4 kV Temporary overvoltage for 1 sec UTOV: 21.0 kV Line discharge class: 1 Rated discharge current In: 10 kA (8/20 µs) High current pulse: 100 kA (4/10 µs) Residual voltage with pulse 10 kA (1/2 ms) Urss: 69.0 kV Residual voltage with pulse 10 kA (8/20 ms) Urs: 61.5 kV Residual voltage with impulse 20 kA (8/20 ms) Urs: 68.5 kV Residual voltage with shunting pulse 500 A (30/75 ms) Ursch: 44.0 kV Involute height: 245 mm Total escape line: 570 mm Weight: 3.2 kg Including mounting and connecting accessories such as: - flexible tinned copper cable sect. 50mm² for SPD MT L=500 mm - disconnection device for disconnecting the faulty arrester from the grid - insulated support, accessory for mounting the medium voltage surge arrester with disconnection device All in place, including all accessories and charges necessary to give the SPDs for medium voltage finished and working in a state of art performance. *ITA: Scaricatori MT 15kV* *ENG: Medium voltage surge protector 15kV* RIBA 4			3,00

274 / 1404 N.P.E 03- CL	Supply and installation of recessed wall-mounted light control point for centralized control of ordinary zone lighting fixtures. Light switching control via 2/4-button push button, with KNX/DALI (Digital Addressable Lighting Interface) protocol for local lighting fixture switching management and DALI scenario management (ON-OFF-DIMM +/-). The dimmable button must provide a controlled lighting setting between 30% and 70% of full lighting power. Realization of light control point, consisting of: - supply of No. 1 single-pole rocker switch; - Recessed pushbutton interface for KNX bus. It has 2 inputs for potential-free contacts and 2 outputs to drive LEDs. Power supply from the bus; - Supply of KNX BUS 1x2x0.8mm² LSZH transmission cable, originating from the previous KNX light point, with suitable threading pipe; Complete with all completion accessories such as (boxes,frame,plates,) device programming according to system manufacturer's instructions. *ITA: Comando luce tramite pulsante KNX da incasso - Building Area "0"* *ENG: Recessed KNX push button*

275 / 1405 N.P.E 04- CL	Supply and installation of wall recessed light control point for centralized control of ordinary zone lighting fixtures with intumescent protection for applications on REI compartments. Light switching control via 2/4-button pushbutton, with KNX/DALI (Digital Addressable Lighting Interface) protocol for local lighting fixture switching management and DALI scenario management (ON-OFF-DIMM +/-). The dimmable button must provide a controlled lighting setting between 30% and 70% of full lighting power. Realization of light control point, consisting of: - supply of No. 1 single-pole rocker switch; - Recessed pushbutton interface for KNX bus. It has 2 inputs for potential-free contacts and 2 outputs to drive LEDs. Power supply from the bus; - Supply of KNX BUS 1x2x0.8mm² LSZH transmission cable, originating from the previous KNX light point, with suitable threading pipe; It is included in the tender: Supply and installation of protection of electrical fruit boxes in walls (plasterboard and non-plasterboard) made by application of intumescent sheathing insertable inside a fruit box, adhering to the bottom and side walls. The restoration will ensure the degree of protection EI 120: - on flexible wall EI 120 for fire/cool side application in boxes of size 503 - on rigid wall, min. thickness 135 mm, for fire/cool side application in 503 boxes. Complete with all completion accessories such as (boxes,frame,plates,) device programming and protection certification to give the light control point finished and working in a workmanlike manner. Civil series and BTicino Light finishing plates (GE plate) to be confirmed with Architectural DL at the construction site. *ITA: Comando luce tramite pulsante KNX con protezione intumescente - Building Area "0"* *ENG: KNX push button for applications REI compartments (corridors ground floor DH)*

280 / 1440 N.P.E 02- KNX	Supply and installation of switchboard for lighting control KNX/DALI system, (TYPE 2) including: - No. 1 KNX/IP Router that allows the forwarding of telegrams between various lines via LAN (IP). The device can also be used as a communication interface in order to connect a PC to the KNX bus. The router supports up to 8 tunneling channels. No additional power supply is needed beyond that of the KNX bus. E60715 DIN rail mounting. - No. 3 KNX 640mA power supply, with two outputs: KNX and 30 V DC for additional devices. Two identical power supplies can be connected in parallel on the same line. The KNX power supply has a potential-free relay output as a signaling contact for operation or diagnostic messages. Rated voltage: 220-240 V AC, 50/60 Hz, KNX output voltage: 28-31 V DC SELV, Output current: 640 mA (all outputs); - No. 3 REG-K KNX DALI two-channel gateway to connect the DALI bus to the KNX system. Supports control (switching and dimming) of 128 electronic ballasts (64 ballasts per channel) controllable in 16 groups per channel. Supply voltage: 120-240 V C/DC, 50/60 Hz Outputs: 2 x DALI D+, D-, DC 16-18 V (basic isolation, not SELV), 250 mA max; - No. 2 Switching actuator, KNX standard, relay outputs 230 V AC 16 A on resistive load (led 200 W), manual controls on board module, switching status indication led, choice of command function (instantaneous, delayed, impulse switching), participation in centralized commands with storage and scene recall, ON/OFF switching functions, impulse, ON/OFF delay, stair lights with warning, power supply 230 V AC, in modular housing IP 20 degree of protection, installed on DIN35 rail, including system activation: 8 outputs - No. 1 Line or sector coupler for connection to BUS backbone, power supply via BUS line, status display LED and button for physical address programming, complying with EN 50090 standard, in modular insulated enclosure installed on DIN35 rail, this one excluded, including system activation. Including charges for the constructive design of the system, equipment containment switchboard, wiring and fixing accessories, share of knx bus cables for device connection and any other accessories and charges necessary to give the KNX/DALI lighting control switchboard in finished and working order. *ITA: Centralino controllo KNX/Dali - Building Area "0"* *ENG: KNX/DALI Control panel - Building Area "0"* RIBA 3 RIBA 4			2,00

358 / 1377 N.P.E 03-SOS	Supply and installation of EN62820 compliant AUDIO EMERGENCY CALL TERMINAL with 1 emergency call button and 1 standard call button - Digital version. In vandal-proof execution, DSP technology, hands-free conversations in OpenDuplex® mode with 16 Khz quality andHDVoice. Key features: - OpenDuplex® and IVC for natural hands-free communication at high volume levels; - 2 8 Ω speakers with special membrane for optimal sound quality, sound pressure 99 dB/1 W/1 m; - 16 kHz eHD Voice speech quality; - 3 mm stainless steel front panel; - Red emergency call button on blue background, CONFORMING to EN62820; - Electret microphone; - 2 alarm inputs (dry contacts); - 2 relay outputs; - Built-in 2.5W class "D" amplifier. - IP 54 and IK 07 (anti-vandalism protection) certification. Composed of: - blue mounting frame with "EMERGENCY" lettering and EN62820-compliant safety glass to protect the emergency call button for EN62820-compliant WS series call stations; - wall mounting kit: outdoor housing made of 1.5mm thick steel sheet for outdoor installation of WS Series vandal-resistant intercom stations and expansion modules - full height format. The steel sheet has a double coating treatment (cataphoretic paint and powder coating). Orange color (RAL 2004) with SOS lettering. All inclusive of all accessories and charges to give the system finished and functioning professionally. *ITA: Terminale di chiamata SOS - Building area "0" spazio sicuro* *ENG: Audio Emergency call terminal* RIBA 3 RIBA 4			1,00

Basically equipped to manage 8 loops of 200 addresses each expandable to 10 loops to manage up to 1,600 addresses. Central unit also configurable with open lines (e.g., 8 loops = 16 open lines). Equipped with USB port, Ethernet port, RS422 MODBUS port, RS485 port for repeater panels, printer output, 3 relays, 24 Vdc 500 mA output, 2 24 Vdc 1 A siren lines and 2 programmable inputs. MGNET connectable. EN54-2, EN54-4 and EN54-13 certified. Composed of: - No. 1 Card to network the control unit (up to 16 control units per MGNET network, with possibility of cross interactive logics); - No. 2 12 V 12 Ah sealed lead-acid battery; - No. 1 Specific fiber optic converter (including transmission of back-up alarm signal). Also suitable for remote command and control panels, remote repeater panels and printers. Maximum distance 6 km with G50 / 125 µm or G62.5 / 125 µn multimode optical fiber, ST connector. Power supply 24 Vdc, absorption 35 mA @ 24 Vdc, mounting on DIN rail. All inclusive of all accessories and charges to give the system finished and functioning professionally. *ITA: Centrale Fumi 8 Loop CCS01 - Entrance Room West* *ENG: Fire detection control Panel 8 Loop - Entrance Room West* RIBA 3 RIBA 4			2,00

503 / 1668 N.P.E 21- LF- RIBA 4	Supply and installation of Outdoor pole head luminaire. To be used in combination with fastening as a luminaire for straight pole (included in the following offer) to be ordered separately or for curved pole. LED system consisting of 2 MLT LED modules with 4 LEDs each. Luminaire luminous flux 2200 lm, power consumption 20.00 W, maximum luminous efficiency of the luminaire 110 lm/W. Color of light neutral white, color temperature (CCT) 4000 K, overall color rendering index (CRI) Ra > 70. Color tolerance (initial MacAdam) ≤ 5 SDCM. Other LED light colors available upon request. Average LCLO(tq 25 °C) reference service life = 100,000 h. The light source is interchangeable in accordance with the requirements of the European Ecodesign Regulation (2019/2020). Luminaire body made of die-cast aluminum. Insulation class (EN 61140): II, degree of protection (DIN EN 60529): IP66, impact resistance rating in accordance with IEC 62262: IK09. Shaft available on request. Wind-exposed surface area fw 0.100 m2. Weight: 4.4 kg. With digital dimmable transformer (DALI). Power supply complying with the DALI-2 standard (EN 62386). Parameterizable ballast with luminous flux stabilization (CLO). The ballast is interchangeable in accordance with the requirements of the European Ecodesign regulation (2019/2020). Differential Mode / Common Mode surge resistance: 6 kV / 10 kV. Reference on plan **LF15** (installations External/Roof). All inclusive of all accessories and charges to give the system finished and functioning professionally. *ITA: Corpo illuminante a parete tipo LF15 - Pareti Esterne Power Module* *ENG: Wall light fixture type LF15 - Exterior Wall Power Module*

LED system consisting of 2 MLT LED modules with 4 LEDs each. Luminaire luminous flux 2200 lm, power consumption 20.00 W, maximum luminous efficiency of the luminaire 110 lm/W. Color of light neutral white, color temperature (CCT) 4000 K, overall color rendering index (CRI) Ra > 70. Color tolerance (initial MacAdam) ≤ 5 SDCM. Other LED light colors available upon request. Average LCLO(tq 25 °C) reference service life = 100,000 h. The light source is interchangeable in accordance with the requirements of the European Ecodesign Regulation (2019/2020). Luminaire body made of die-cast aluminum. Insulation class (EN 61140): II, degree of protection (DIN EN 60529): IP66, impact resistance rating in accordance with IEC 62262: IK09. Shaft available on request. Wind-exposed surface area fw 0.100 m2. Weight: 4.4 kg. With digital dimmable transformer (DALI). Power supply complying with the DALI-2 standard (EN 62386). Parameterizable ballast with luminous flux stabilization (CLO). The ballast is interchangeable in accordance with the requirements of the European Ecodesign regulation (2019/2020). Differential Mode / Common Mode surge resistance: 6 kV / 10 kV. Reference on plan **LF15** (installations External/Roof). All inclusive of all accessories and charges to give the system finished and functioning professionally. *ITA: Corpo illuminante a parete tipo LF15* *ENG: light fixture type LF15* RIBA 4 - scale emergenza			1,00

659 / 390 N.P.E 01- KNX	Supply and installation of switchboard for lighting control KNX/DALI system, (TYPE 1) including: - No. 1 KNX/IP Router that allows the forwarding of telegrams between various lines via LAN (IP). The device can also be used as a communication interface in order to connect a PC to the KNX bus. The router supports up to 8 tunneling channels. No additional power supply is needed beyond that of the KNX bus. E60715 DIN rail mounting. - No. 2 KNX 640mA power supply, with two outputs: KNX and 30 V DC for additional devices. Two identical power supplies can be connected in parallel on the same line. The KNX power supply has a potential-free relay output as a signaling contact for operation or diagnostic messages. Rated voltage: 220-240 V AC, 50/60 Hz, KNX output voltage: 28-31 V DC SELV, Output current: 640 mA (all outputs); - No. 2 REG-K KNX DALI two-channel gateway to connect the DALI bus to the KNX system. Supports control (switching and dimming) of 128 electronic ballasts (64 ballasts per channel) controllable in 16 groups per channel. Supply voltage: 120-240 V C/DC, 50/60 Hz Outputs: 2 x DALI D+, D-, DC 16-18 V (basic isolation, not SELV), 250 mA max; - No. 1 Switching actuator, KNX standard, relay outputs 230 V AC 16 A on resistive load (led 200 W), manual controls on board module, switching status indication led, choice of command function (instantaneous, delayed, impulse switching), participation in centralized commands with storage and scene recall, ON/OFF switching functions, impulse, ON/OFF delay, stair lights with warning, power supply 230 V AC, in modular housing IP 20 degree of protection, installed on DIN35 rail, including system activation: 8 outputs - No. 1 Line or sector coupler for connection to BUS backbone, power supply via BUS line, status display LED and button for physical address programming, complying with EN 50090 standard, in modular insulated enclosure installed on DIN35 bar, this one excluded, including system activation. Including charges for the constructive design of the system, equipment containment

N.P.E 02A-RI	medium box complete with command and control panel with color graphic display and 24 Vdc 5 A power supply. Basically equipped to manage 2 loops of 200 addresses each expandable to 10 loops to manage up to 1,600 addresses. Central unit also configurable with open lines (e.g., 2 loops = 4 open lines). Equipped with USB port, Ethernet port, RS422 MODBUS port, RS485 port for repeater panels, printer output, 3 relays, 24 Vdc 500 mA output, 2 24 Vdc 1 A siren lines and 2 programmable inputs. MGNET connectable. EN54-2, EN54-4 and EN54-13 certified. Composed of: - No. 1 Card to network the control unit (up to 16 control units per MGNET network, with possibility of cross interactive logics); - No. 2 12 V 12 Ah sealed lead-acid battery; - No. 1 Fiber optic converter specifically for MGNET (including transmission of back-up alarm signal). Also suitable for remote command and control panels, remote repeater panels and printers. Maximum distance 6 km with G50 / 125 µm or G62.5 / 125 µn multimode optical fiber, ST connector. Power supply 24 VDC, absorption 35 mA @ 24 VDC, DIN rail mounting; All inclusive of all accessories and charges to give the system finished and functioning professionally. *ITA: Centrale Rivelazione Incendi - Fire Prevention Room Data Hall* *ENG: Fire detection control Panel- Fire Prevention Room Data Hall* RIBA 3 RIBA 4			1,00

	TO COLLECTION					
	temporary cables to be terminated on 500A single-pole connectors for connection to dedicated cabinet (so-called Load Bank Terminal Cabinet), for on-site testing of each emergency generator. At the same time, verifications of the automatic grid/g.e. switching system shall be performed, assumed 30 days; - rental of low-voltage load bank of power 1250kW @ cosFi 1 (1250kVA), with associated temporary cables to be terminated on 500A single-pole connectors for connection to dedicated switchboard (so-called Load Bank Terminal Cabinet), for on-site testing of each IT UPS, assumed 30 days; - rental of low-voltage load bank of power 250kW @ cosFi 1 (250kVA), with associated temporary cables for connection to UPS cabinet, for on-site testing of each UPS MECH, assumed 30gg; - charges for Third Party activities such as thermographic inspection of electrical connections during operation at maximum power, recording electrical system parameters by certified instrument, etc. - installation of all branch plugs (so-called tap offs) on the armored conduits of the data hall at the location of the cabinets visible on the plans; - rental of load banks with related temporary connections to be installed in data hall at the rated power of the hall (consider no.600 load banks of 10kW each, connected with section of cable and CEE 3P+N+T 32A plug to the sockets mounted on the armored conduits), assumed 30gg; - charges for closure of all hot aisles within the data hall following installation load banks to prevent cold air - hot air mixing; - supply of 90,000lt of diesel fuel (to be divided among the six generators in the individual data hall) to enable functional testing; Including all charges necessary to manage the Commisioning process as detailed within the Project Technical Report. **Price for single 5MW IT data hall.** *ITA: Attività di collaudo singola sala dati 5MW* *ENG: Commisioning Activities for single Data Hall* RIBA 3 RIBA 4			1,00		
	SUB TOTAL a corpo			1,00		
763 / 645 N.P.E 03-OC	Fees for testing of electrical systems made/equipment by a specialized "third part" company within the individual data room mainly of: (a) all LV and MV switchboard components even if not supplied (e.g. Power Module and generators); b) all power lines in cable/bar conduits even if not supplied (e.g. Power Module and generators); The detailed plan of the tests that will be performed (so called Test Plan) will be developed by the Electrical Third Party based on NETA ATS standards and submitted to the Construction Management/Contractor for review and acceptance. It is anticipated as of now that the following activities will need to be carried out (non-exhaustive list): (a) setting of all calibrations of electrical protections as per the dedicated study; (b) realization of testing of all electrical protections both MV and LV, using specific devices (e.g., primary injection); (c) realization of testing of all electrical transformers (power, TA, TV, TO); (d) realization of insulation, impedance, applied voltage, microresistance tests on the busbar systems of all electrical panels; (e) realization of insulation, impedance, applied voltage, microresistance tests on all electrical conduits; (f) realization of bolt tightening test of all electrical connections made by using certified dynamometric wrench; g) realization of thermography on all electrical connections made (both cables and busbar conduits including connections between the various pieces of conduit) to be carried out during the Commissioning operations described in the dedicated chapter; (h) realization of measurement and recording of electrical quantities by certified and Class A portable instrument, to be realized during the Commissioning operations described in the dedicated chapter; (i) realization of measurement of ground resistance; (j) realization of dedicated test for photovoltaic system interface devices; (k) production of specific reports for all the activities listed above; All charges and supports necessary for the realization of the tests on the electrical systems described above in a consistent and coordinated manner with the site activities (e.g. installation in successive phases, Power Module and generator installation, etc.) must be considered included.

1. GENERALITY

The document **3603 ES E PE 02-** is an integral part of the project description with the following address. This project was prepared by L22, a part of Lombardini S.p.A. located at Via Lombardini 22, Milan.

This volume, along with the remaining volumes of the Technical Report, drawings, and documents produced by the Client related to the general supply conditions, must be countersigned for acceptance on every page and returned to the Client. Examining all the documents is, therefore, a fundamental condition for the quotation and execution of the systems. Everything contained within is also fundamental for the correct interpretation of the instructions and provisions found in the other project documents. If there are any doubts about the correct application of their content, you should inform the designer so that they can provide the necessary clarifications in a timely manner.

The designer cannot be held responsible for any consequences resulting from the failure to comply with the above.

2. CLARIFICATIONS:

The descriptions provided here indicate the minimum functional performance requirements. The Contracting Company must carefully examine all the data and provisions contained in this document, as they will be fully and unconditionally responsible, by contractual agreement, for the correct functioning of the system, ensuring compliance with the specified conditions and operational requirements.
Regarding topics not covered or specific details not mentioned, it is required that the materials used and the execution of the work comply with European standards of equivalent value and have standardized dimensions according to the current Uni and DIN tables.
Further clauses regarding the relationship between the Client and the Contracting Company will be defined in the Contract of Award, to which this document and its attachments are an integral part.
Materials for which samples have been requested cannot be installed until they are accepted by the Site Management. The Contracting Company should not install materials rejected by the Site Management and should remove them from the construction site. The products to be installed should be those indicated in the project or, in the absence of a specific indication, those listed in the brand list.
The minimum warranty period is **24 (twenty-four)** months from the start of operation, as established by the Italian Codice Civile, Art. 1667. During this period, all defective parts must be replaced free of charge and in the shortest possible time.
The prices include and compensate for all expenses for labour, necessary supplies, their processing and use, allowances for access, deposits, site occupation, temporary and different occupations, provisional means of labor, and any other conditions specified in the safety plan attached to the documentation, with no exceptions, as well as charges, transportation, unloading, and everything else necessary to ensure that the work is completed to the highest standards and in full efficiency. The prices also include compensation for all the expenses that the contractor will incur for this purpose, even if not explicitly specified or referred to in the various articles of the list, except for what is explicitly excluded and, in any case, the scaffolding for external works outside of buildings.

If the project documentation contains conflicting data or information, the more costly and safety-beneficial ones shall be considered. The type of contract is defined in the contract drafted by the Client. The Contract will be awarded to a General Contractor, who will be responsible for the complete implementation of the work, of which the project in question is one of the constituent parts.
All works related to the contract will be carried out by the contractor in accordance with the provisions and conditions specified in the project drawings. It is essential to note that these provisions are not exhaustive, as the contractor expressly commits to executing the work in perfect accordance with the state of the art, in compliance with current legal regulations, to deliver a fully operational system at the offered price. In any case, it is the responsibility and obligation of the installer to deal with any issues arising from the application of clearly incorrect indications, such as those due to printing errors or the omission of essential safety measures if such errors/omissions are detectable based on the technical knowledge that the installer, by law, must possess, ensuring the conformity of the systems with the state of the art.
All works must be coordinated with the execution of other tasks, and the construction schedule must be submitted to the Site Management. During the course of the work, in accordance with the site and Client's needs, temporary works may be required to maintain the operation of existing systems or to enable the temporary operation of systems covered by this contract. The Contractor will be responsible for the operation of functional areas that must be kept operational during the work.
No changes in the execution of the planned works can be made by the installation company without prior approval and written authorization from the Client and the Site Manager.
If personnel engage in actions deemed serious by the Site Manager, they are granted the authority to immediately expel them without the Contractor being entitled to seek an extension or damages.

The Contractor, upon signing the contract, indemnifies the Client from any possible recourse action by subcontractors in the event of a dispute between the Contractor and the subcontractor.

The following points are the responsibility of the Contractor:

- Costs related to procedures for the application and compliance with regulations;
- certificates, etc., regarding the installation;
- Costs related to commissioning, fine-tuning, and testing of the system;
- Training of the Client's personnel;
- Inspection costs;
- Warranty costs;
- Costs related to documentation, as-built drawings, manuals, operating instructions;
- certifications according to current regulations;
- Documentation as required by D.M. 37/08. Attached to the compliance declaration, forms for submitting the declaration to ISPESL and ASL/ARPA must be prepared, in accordance with DPR 462/01;

- Costs related to on-site safety;
- Costs for coordination with other Contractors directed by the Client;
- Costs for site cleaning;
- Disposal of waste materials in authorized landfills;
- Costs for the custody and protection of materials installed and stored;
- Site organization;
- Costs for connections and temporary systems;
- Costs for personnel hygiene;

Nr. 55 025077e	Passerella rettilinea a traversini, in acciaio zincato con processo Sendzimir, conforme UNI EN 10346, altezza 100 mm con passo del traversino 200 mm, compresi accessori di fissaggio: larghezza 600 mm, spessore 15/10. - Inclusi oneri per verniciatura speciale a colore RAL definito dal Committente / DL in corso lavori a valle dei quadri PDU. *Cable tray linear with sleepers, galvanized steel by Sendzimir process, in accordance with UNI EN 10346, height 100 mm with 200 mm sleeper pitch, including fastening accessories: width 600 mm, thickness 15/10.* *- Including charges for special painting to RAL color defined by the Customer / DL in progress of works after PDU switchboards.* **euro**	m	
Nr. 56 025077e- RIBA 4	Passerella rettilinea a traversini, in acciaio zincato con processo Sendzimir, conforme UNI EN 10346, altezza 100 mm con passo del traversino 200 mm, compresi accessori di fissaggio: larghezza 600 mm, spessore 15/10. *Cable tray linear with sleepers, galvanized steel by Sendzimir process, in accordance with UNI EN 10346, height 100 mm with 200 mm sleeper pitch, including fastening accessories: width 600 mm, thickness 15/10.* **euro**	m	
Nr. 57 025085a	Passerella rettilinea reticolata, in tondini di acciaio saldati, maglia 50 x 100 mm, in elementi di altezza 100 mm, sagomata senza utilizzo di pezzi speciali, accessori di fissaggio e giunzione inclusi: trattamento di elettrozincatura, larghezza 100 mm *Cable tray linear meshed,, made of welded steel rods, mesh 50 x 100 mm, in elements of 100 mm height, shaped without using special pieces, fastening and joining accessories included: electro-galvanizing treatment, wide 100 mm* **euro**	m	
Nr. 58 025085c	Passerella rettilinea reticolata, in tondini di acciaio saldati, maglia 50 x 100 mm, in elementi di altezza 100 mm, sagomata senza utilizzo di pezzi speciali, accessori di fissaggio e giunzione inclusi: trattamento di elettrozincatura, larghezza 200 mm *Cable tray linear meshed, made of welded steel rods, 50 x 100 mm mesh, in 100 mm high elements, shaped without use of special pieces, fixing and joining accessories included: electro-galvanizing treatment, width 200 mm* **euro**	m	
Nr. 59 025085d	Passerella rettilinea reticolata, in tondini di acciaio saldati, maglia 50 x 100 mm, in elementi di altezza 100 mm, sagomata senza utilizzo di pezzi speciali, accessori di fissaggio e giunzione inclusi: trattamento di elettrozincatura, larghezza 300 mm *Cable tray linear meshed, made of welded steel rods, 50 x 100 mm mesh, in 100 mm high elements, shaped without use of special pieces, fixing and joining accessories included: electro-galvanizing treatment, width 300 mm* **euro**	m	
Nr. 60 025085d- RIBA 4	Passerella rettilinea reticolata, in tondini di acciaio saldati, maglia 50 x 100 mm, in elementi di altezza 100 mm, sagomata senza utilizzo di pezzi speciali, accessori di fissaggio e giunzione inclusi: trattamento di elettrozincatura, larghezza 300 mm *Cable tray linear meshed, made of welded steel rods, 50 x 100 mm mesh, in 100 mm high elements, shaped without use of special pieces, fixing and joining accessories included: electro-galvanizing treatment, width 300 mm* **euro**	m	

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
Nr. 61 025085e	Passerella rettilinea reticolata, in tondini di acciaio saldati, maglia 50 x 100 mm, in elementi di altezza 100 mm, sagomata senza utilizzo di pezzi speciali, accessori di fissaggio e giunzione inclusi: trattamento di elettrozincatura, larghezza 400 mm *Cable tray linear meshed, made of welded steel rods, 50 x 100 mm mesh, in 100 mm high elements, shaped without use of special pieces, fixing and joining accessories included: electro-galvanizing treatment, width 400 mm* **euro**	m	
Nr. 62 025085f	Passerella rettilinea reticolata, in tondini di acciaio saldati, maglia 50 x 100 mm, in elementi di altezza 100 mm, sagomata senza utilizzo di pezzi speciali, accessori di fissaggio e giunzione inclusi: trattamento di elettrozincatura, larghezza 500 mm *Cable tray linear meshed, made of welded steel rods, 50 x 100 mm mesh, in 100 mm high elements, shaped without use of special pieces, fastening and joining accessories included: electro-galvanizing treatment, 500 mm in width* **euro**	m	
Nr. 63 025085f-a	Passerella rettilinea reticolata, in tondini di acciaio saldati, maglia 50 x 100 mm, in elementi di altezza 100 mm, sagomata senza utilizzo di pezzi speciali, accessori di fissaggio e giunzione inclusi: trattamento di elettrozincatura, larghezza 600 mm *Cable tray linear meshed, made of welded steel rods, 50 x 100 mm mesh, in 100 mm high elements, shaped without use of special pieces, fastening and joining accessories included: electro-galvanizing treatment, width 600 mm* **euro**	m	
Nr. 64 025086b	Coperchi per canali a fondo forato o cieco e per passerelle in acciaio zincato con processo Sendzimir, conforme UNI EN 10346: per elementi di lunghezza 3,0 m, inclusi gli accessori di fissaggio: larghezza 100 mm, spessore 7/10 *Covers for channels with a perforated or blind bottom and for galvanized steel walkways using the Sendzimir process, conforming to UNI EN 10346: for elements of length 3.0 m, including fixing accessories: width 100 mm, depth 7/10* **euro**	m	
Nr. 65 025086c	Coperchi per canali a fondo forato o cieco e per passerelle in acciaio zincato con processo Sendzimir, conforme UNI EN 10346: per elementi di lunghezza 3,0 m, inclusi gli accessori di fissaggio: larghezza 150 mm, spessore 7/10 *Covers for channels with a perforated or blind bottom and for galvanized steel walkways using the Sendzimir process, conforming to UNI EN 10346: for elements of length 3.0 m, including fixing accessories: width 150 mm, depth 7/10* **euro**	m	
Nr. 66 025086d	Coperchi per canali a fondo forato o cieco e per passerelle in acciaio zincato con processo Sendzimir, conforme UNI EN 10346: per elementi di lunghezza 3,0 m, inclusi gli accessori di fissaggio: larghezza 200 mm, spessore 7/10 *Covers for channels with a perforated or blind bottom and for galvanized steel walkways using the Sendzimir process, conforming to UNI EN 10346: for elements of length 3.0 m, including fixing accessories: width 200 mm, depth 7/10* **euro**	m	
Nr. 67 025086e	Coperchi per canali a fondo forato o cieco e per passerelle in acciaio zincato con processo Sendzimir, conforme UNI EN 10346: per elementi di lunghezza 3,0 m, inclusi gli accessori di fissaggio: larghezza 300 mm, spessore 7/10 *Covers for channels with a perforated or blind bottom and for galvanized steel walkways using the Sendzimir process, conforming to UNI EN 10346: for elements of length 3.0 m, including fixing accessories: width 300 mm, depth 7/10* **euro**	m	
Nr. 68 025086g	Coperchi per canali a fondo forato o cieco e per passerelle in acciaio zincato con processo Sendzimir, conforme UNI EN 10346: per elementi di lunghezza 3,0 m, inclusi gli accessori di fissaggio: larghezza 500 mm, spessore 8/10 *Covers for channels with perforated or blind bottoms and for galvanized steel walkways using the Sendzimir process, conforming to UNI EN 10346: for elements of length 3.0 m, including fixing accessories: width 500 mm, depth 8/10* **euro**	m	
Nr. 69 025093b	Setto separatore in acciaio zincato con processo Sendzimir, conforme UNI EN 10346, in elementi dello spessore di 8/10 mm preforati, per canale di altezza: 100 mm *Separator of galvanized steel by Sendzimir process, conforming to UNI EN 10346, in pre-drilled elements of 8/10 mm width, for channel height: 100 mm* **euro**	m	
Nr. 70 025162fA	Cavidotto flessibile in polietilene a doppia parete, per canalizzazioni interrate, corrugato esternamente e liscio internamente, inclusi manicotti di giunzione e selle distanziali in materiale plastico, conforme norme CEI EN 50086, con resistenza allo schiacciamento > 750 N, escluse tutte le opere provvisionali e di scavo, Ø esterno: 110 mm *Flexible double-wall polyethylene conduit, for underground conduits, corrugated externally and smooth internally, including junction sleeves and plastic spacer saddles, conforming to CEI EN 50086 standards, with crush strength > 750 N, excluding all provisional works and earthworks, external Ø: 110 mm* **euro**	m	
Nr. 71	Cavidotto flessibile in polietilene a doppia parete, per canalizzazioni interrate, corrugato esternamente e liscio internamente, inclusi		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
025162hA	manicotti di giunzione e selle distanziali in materiale plastico, conforme norme CEI EN 50086, con resistenza allo schiacciamento > 750 N, escluse tutte le opere provvisionali e di scavo, Ø esterno: 160 mm *Flexible double-wall polyethylene conduit, for underground conduits, corrugated externally and smooth internally, including junction sleeves and plastic spacer saddles, conforming to CEI EN 50086 standards, with crush strength > 750 N, excluding all provisional works and earthworks, external Ø: 160 mm* **euro**	m	
Nr. 72 025162iA	Cavidotto flessibile in polietilene a doppia parete, per canalizzazioni interrate, corrugato esternamente e liscio internamente, inclusi manicotti di giunzione e selle distanziali in materiale plastico, conforme norme CEI EN 50086, con resistenza allo schiacciamento > 750 N, escluse tutte le opere provvisionali e di scavo, Ø esterno: 200 mm *Flexible double-wall polyethylene conduit, for underground conduits, corrugated externally and smooth internally, including junction sleeves and plastic spacer saddles, conforming to CEI EN 50086 standards, with crush strength > 750 N, excluding all provisional works and earthworks, external Ø: 200 mm* **euro**	m	
Nr. 73 025165e	Pozzetto in polipropilene, con sagomature concentriche pretranciate sulle pareti verticali e fondo asportabile, con chiusino in polipropilene, con esclusione delle opere di scavo e rinfianco, dimensioni nominali: 40 x 40 cm, tipo carrabile *Polypropylene manhole, with concentric moldings pre-framed on vertical walls and removable bottom, with polypropylene manhole cover, excluding excavation and backfill work, nominal size: 40 x 40 cm, driveway type* **euro**	cad	
Nr. 74 025218a	Allacciamento di utenza monofase incluso conduttore di protezione, con utilizzo di cavo unipolare o multipolare in guaina protettiva di pvc flessibile, provvista di raccordi filettati e di adattatori alle estremità, lunghezza fino a 1,5 m: sezione conduttori da 1,5 a 4 mmq *Single-phase utility connection including protective conductor, with use of single-core or multi-core cable in flexible pvc protective sheath, provided with threaded fittings and adapters at ends, length up to 1.5 m: conductor cross-section 1.5 to 4 sq. mm* **euro**	cad	
Nr. 75 033345	Relè crepuscolare astronomico, con comando di accensione e spegnimento in funzione della latitudine e della longitudine del luogo di installazione, programmazione dello spegnimento notturno, impostazione di possibile ritardo o di anticipo sull'orario di alba e tramonto; funzionamento automatico o manuale, con ingresso per comando esterno, ora legale o solare automatica, in contenitore plastico serie modulare per installazione su barra DIN35, grado di protezione IP 20, display LCD retroilluminato, portata relè 16 A per carico resistivo, alimentazione 230 V c.a. *Astronomical twilight relay, with on/off control according to the latitude and longitude of the installation site, programming of the night shutdown, setting of possible delay or advance on sunrise and sunset times; automatic or manual operation, with input for external control, summer time or automatic solar time, in plastic container modular series for installation on DIN35 rail, degree of protection IP 20, backlit LCD display, relay capacity 16 A for resistive load, 230 VAC power supply* **euro**	cad	
Nr. 76 075002ja	Corda in rame nudo, in opera completa di morsetti e capicorda, posata: a vista, compresi accessori di sostegno e fissaggio: sezione nominale 240 mmq *Bare copper rope, in place complete with terminals and lugs, laid: exposed, including support and fastening accessories: nominal cross-section 240 mmq* **euro**	m	
Nr. 77 075003c	Corda in rame nudo, in opera completa di morsetti e capicorda, posata: interrata entro scavo predisposto: sezione nominale 16 mmq *Bare copper rope, in place complete with clamps and lugs, laid: underground within excavation prepared: nominal section 16mmq* **euro**	m	
Nr. 78 075003f	Corda in rame nudo, in opera completa di morsetti e capicorda, posata: interrata entro scavo predisposto: sezione nominale 50 mmq *Bare copper rope, in place complete with clamps and lugs, laid: underground within excavation prepared: nominal section 50 mmq* **euro**	m	
Nr. 79 075016d	Barra equipotenziale industriale nuda, con viteria in acciaio inossidabile per serraggio capicorda, installata a muro completa di isolatori in duroplastico ed accessori di fissaggio: in acciaio inossidabile, dimensioni: 500 x 40 x 5 mm, per 12 collegamenti *Bare industrial equipotential bar, with stainless steel screws for clamping lugs, wall mounted complete with duroplastic insulators and fixing accessories: stainless steel, dimensions: 500 x 40 x 5 mm, for 12 connections* **euro**	cad	
Nr. 80 075026b	Dispersore in acciaio ramato del tipo prolungabile, lunghezza 1,5 m, spessore rame 100 micron, completo di morsetto di allaccio, puntale, e testa di battuta alloggiato in pozzetto di materiale plastico delle dimensioni esterne di 400 x 400 x 400 mm, comprensivo dello scavo e del rinterro per la posa di quest'ultimo: Ø 25 mm		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	Copper-plated steel sink of the extendable type, length 1.5 m, copper thickness 100 microns, complete with connection clamp, tip, and stop head housed in a plastic well with external dimensions of 400 x 400 x 400 mm, including excavation and backfilling for the latter: Ø 25 mm **euro**	cad	
Nr. 81 075028c	Pozzetto in materiale plastico, completo di chiusino carrabile, incluso lo scavo ed il rinterro, delle dimensioni esterne di: 400 x 400 x 400 mm *Plastic cockpit, complete with manhole cover, including excavation and backfilling, with external dimensions of: 400 x 400 x 400 mm* **euro**	cad	
Nr. 82 075029	Cartello in alluminio per segnalare le prese di terra a sfondo blu, dimensioni 200 x 300 mm, inclusi gli accessori di fissaggio *Aluminium sign to indicate ground sockets with a blue background, dimensions 200 x 300 mm, including fixing accessories* **euro**	cad	
Nr. 83 095101c	Cavo UTP non schermato, multicoppie, conduttori in rame 24 AWG, conforme ISO-IEC 11801, installato in canalina o tubazione, queste escluse: 4 coppie, guaina in LSZH, cat. 6, classe di reazione al fuoco Cca *Unshielded UTP cable, multi-pair, 24 AWG copper conductors, ISO-IEC 11801 compliant, installed in duct or pipe, excluding: 4 pairs, LSZH sheath, cat. 6, reaction to fire class Cca* **euro**	m	
Nr. 84 095113	Attestazione di cavo UTP o FTP 4 coppie su connettore RJ45 cat. 6 conforme ISO IEC 11801 questo incluso *Attestation of UTP or FTP cable 4 pairs on RJ45 connector cat. 6 ISO IEC 11801 compliant this included* **euro**	cad	
Nr. 85 095127a	Presa modulare 8 pin tipo RJ45, in ABS: installata in scatola da parete o da incasso, completa di supporto e placca in resina: cat. 6, per cavi UTP *Modular socket 8 pin type RJ45, in ABS: installed in wall or recessed box, complete with support and resin plate: cat. 6, for UTP cables* **euro**	cad	
Nr. 86 095134f	Patch-cord realizzata in cavo 4 coppie, conduttori in rame 24AWG e connettori RJ45, conforme alla normativa ISO /IEC 11801 e EIA/TIA 568 C2-1, lunghezza: 200 cm, U/UTP categoria 6 *Patch-cord made of 4-pair cable, 24AWG copper conductors and RJ45 connectors, compliant with ISO / IEC 11801 and EIA / TIA 568 C2-1, length: 200 cm, U/UTP category 6* **euro**	cad	
Nr. 87 095134h	Patch-cord realizzata in cavo 4 coppie, conduttori in rame 24AWG e connettori RJ45, conforme alla normativa ISO /IEC 11801 e EIA/TIA 568 C2-1, lunghezza: 300 cm, U/UTP categoria 6 *Patch-cord made of 4-pair cable, 24AWG copper conductors and RJ45 connectors, ISO / IEC 11801 and EIA / TIA 568 C2-1 compliant, length: 300 cm, U/UTP category 6* **euro**	cad	
Nr. 88 095144i	Accessori per armadio standard 19", base 600 mm, profondità 600 mm: pannello passacavo in acciaio verniciato per il passaggio di cavi nella zona frontale *Accessories for standard cabinet 19", base 600 mm, depth 600 mm: painted steel cable entry panel for the passage of cables in the front area* **euro**	cad	
Nr. 89 095145c-A	Pannello di permutazione modulare, cablaggio universale, con telaio per armadio da 19", completo di porte per cavi UTP o FTP: con 24 porte tipo RJ45 cat. 6, per cavi UTP. Compreso cablaggio e numerazione prese. *Modular permutation panel, universal wiring, with 19" cabinet frame, complete with UTP or FTP cable ports: with 24 RJ45 ports cat. 6, for UTP cables.* *Including wiring and socket numbering.* **euro**	cad	
Nr. 90 095164	Certificazione di cavi e componenti di reti lan, con rilascio di report dettagliato per ogni tratta misurata, secondo norme ISO IEC 11801, EN 50173 classi C, D, E, F e TIA 568B CAT. 3, 5, 5E, 6 e 7; valutata per ogni tratta misurata *Certification of cables and components of LAN networks, with detailed report for each section measured, according to ISO IEC 11801, EN 50173 classes C, D, E, F and TIA 568B CAT. 3, 5, 5E, 6 and 7; evaluated for each measured section* **euro**	cad	

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
Nr. 91 115006c	Accessori per trasformatori: termosonda completa di relè, alimentazione 230 V - 50 Hz *Accessories for transformers: thermoprobe complete with relay, power supply 230 V - 50 Hz* **euro**	cad	
Nr. 92 115006d	Accessori per trasformatori: centralina termometrica digitale con esclusione delle resistenze *Accessories for transformers: digital thermometric control unit with exclusion of resistances* **euro**	cad	
Nr. 93 115006g	Accessori per trasformatori: sistema di ventilazione forzata, per aumento della potenza nominale fino al 40%, per trasformatori di potenza non superiore a 1000 kVA, senza centralina di comando *Accessories for transformers: forced ventilation system, for increase of nominal power up to 40%, for transformers with a power not exceeding 1000 kVA, without control unit* **euro**	cad	
Nr. 94 115037c	Cofano contenimento trasformatore completo di cavo per interconnessione 3 m sez. 25 mmq (trasformatore escluso): per trafo fino a 630 kVA *Transformer containment hood complete with cable for interconnection 3 m sect. 25 mmq (transformer excluded): for transformer up to 630 kVA* **euro**	cad	
Nr. 95 125001c	Condensatori trifase per rifasamento industriale in bassa tensione, dielettrico in polipropilene metallizzato autorigenerabile, resistenze di scarica ed induttanze di smorzamento incorporate, collegamento interno a triangolo, dispositivo interno di sicurezza di protezione a sovrapressione, involucro esterno in materiale plastico autoestinguente con grado di protezione IP 40 del tipo modulare, conformità norme IEC 831-1/2: tensione nominale 230 V / 50 Hz: potenza reattiva 15 kVAR *Three-phase capacitors for industrial power factor correction in low voltage, self-regenerating metallized polypropylene dielectric, built-in discharge resistors and damping inductors, internal triangle connection, internal overpressure protection safety device, outer casing in self-extinguishing plastic material with IP 40 degree of protection of the modular type, compliance with IEC 831-1/2 standards: nominal voltage 230 V / 50 Hz: reactive power 15 kVAR* **euro**	cad	
Nr. 96 145025d	Cavo antincendio schermato FG29OHM16, tensione nominale 100/100 V, isolamento in mescola termoplastica di qualità G29, conduttore interno in rame rosso ricotto in classe 5, schermo con nastro Al/Pet, guaina esterna in mescola LSZH di qualità M16, a bassa emissione di di fumi e gas tossici secondo EN 61034, non propagante l'incendio e la fiamma conforme EN 60332, EN 50399 e ai requisiti della Normativa Europea Regolamento UE 305/2011 - Prodotti da Costruzione CPR, classe Cca - s1b,d1,a1, resistenza al fuoco PH 120 secondo norma CEI EN 50200: 2 x 1,5 mmq *Shielded fire cable FG29OHM16, nominal voltage 100/100 V, insulation in G29 quality thermoplastic compound, inner conductor in red annealed copper in class 5, screen with Al/Pet tape, outer sheath in LSZH compound of quality M16, low emission of fumes and toxic gases according to EN 61034, non-propagating fire and flame according to EN 60332, EN 50399 and the requirements of the European Standard EU Regulation 305/2011 - CPR Construction Products, class Cca - s1b,d1,a1, fire resistance PH 120 according to CEI EN 50200: 2 x 1,5 mmq* **euro**	m	
Nr. 97 145027e	Cavo antincendio EVAC - FTS29OM16, tensione nominale 100/100 V, isolamento in vetro-mica e guaina in mescola LSZH qualità S29, conduttore interno in rame rosso ricotto in classe 5, guaina esterna in mescola LSZH di qualità M16, a bassa emissione di di fumi e gas tossici secondo EN 61034, non propagante l'incendio e la fiamma conforme EN 60332, EN 50399 e ai requisiti della Normativa Europea Regolamento UE 305/2011 - Prodotti da Costruzione CPR, classe Cca-s1b,d1,a1, resistenza al fuoco PH 120 secondo norma CEI EN 50200: 2 x 2,5 mmq *EVAC fire cable - FTS29OM16, nominal voltage 100/100 V, glass-mica insulation and sheath in LSZH compound quality S29, inner conductor in annealed red copper in class 5, outer sheath in LSZH compound of quality M16, with low emission of fumes and toxic gases according to EN 61034, non-propagating fire and flame according to EN 60332, EN 50399 and the requirements of the European Standard EU Regulation 305/2011 - CPR Construction Products, class Cca-s1b,d1,a1, fire resistance PH 120 according to CEI EN 50200: 2 x 2.5 mmq* **euro**	m	
Nr. 98 235029aA	Cavo ottico multimodale OM3 tipo loose monotubo per interni/esterni con riempitivo in gel (gel filled), guaina in PE: 4 fibre armatura dielettrica antiroditore. *OM3 multimode optical cable type loose monotube for indoor/outdoor with gel filler, PE sheath: 4 fibers dielectric anti-rodent armature* **euro**	m	
Nr. 99 N.P.E 01-ACP	Supply and installation of WIFI device for indoor use with the following specifications: Dimensions 196.7 x 196.7 x 35 mm (7.74 x 7.74 x 1.38") Weight With Mounting Kits: 350 g (12.4 oz) 450 g (15.9 oz) Networking Interface: (2) 10/100/1000 Ethernet Ports Port: (1) USB 2.0 Port Buttons: Reset		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	Power Method: Passive Power over Ethernet (48V), 802.3af/802.3at Supported (Supported Voltage Range: 44 to 57VDC) Power Supply: UniFi Switch (PoE) Power Save: Supported Maximum Power Consumption: 9W Maximum TX Power 2.4 GHz 5 GHz: 22 dBm/22 dBm Antennas: (3) Dual-Band Antennas, 2.4 GHz: 3 dBi, 5 GHz: 3 dBi Wi-Fi Standards 802.11 a/b/g/n/r/k/v/ac Wireless Security: WEP, WPA-PSK, WPA-Enterprise (WPA/WPA2, TKIP/AES) BSSID: Up to 8 per Radio Mounting: Wall/Ceiling (Kits Included) Operating Temperature: -10 to 70° C (14 to 158° F) Operating Humidity 5 to 95% Noncondensing Certifications: CE, FCC, IC Reference on plan **AP** All inclusive of all accessories and charges to give the device finished and functioning in a state of good working order. Reference brand UBIQUITI model UAP-AC-PRO **euro**	cadauno	
Nr. 100 N.P.E 01- BMS	Fees for electrical connection of BMS control panels (supply by mechanical systems contractor) to which are referred the connection of field supervision of mechanical and electrical systems including: - take-over of the delivered material by the mechanical contractor - charges for installation and wall fastening of the control panel in question (positioning as per the electrical/mechanical drawings) with related fastening accessories and fittings; - derivation from cable conduit in PVC pipe, flexible marked, heavy, corrugated GWT 850 °C, placed within plasterboard walls, or within false ceiling (if present in neighboring areas) in IP4X execution or alternatively rigid pvc piping GWT 960 °C, complete with fasteners and IP55 fittings; - junction box (round or rectangular) for fixing device to be mounted on wall in easily accessible position IP55 utility-side terminal; - Equipotential connections; - label to identify the arrangement itself; Complete with all accessories and charges to give the connection finished and functioning in a state of good working order. **euro**	a corpo	
Nr. 101 N.P.E 01- BT	Supply and installation of indoor crimp type heat shrinkable terminal, with double bolt connection hole, single-pole with extruded insulation for high power LV conductors, conductor section 185-300 mm². All as visible on the project plans and with the technical specifications expressed in the "Special Tender Specifications." Including all wiring, braid grounding, labels, accessories and charges; all fully functional according to applicable standards. **euro**	cadauno	
Nr. 102 N.P.E 01- CA	Card reader for access control system. Supply and installation of 13.56Mhz Badge Reader for HID Class cards - Secure Read only - TTL interface with 37bit Wiegand Output - IP66 outdoor protection for access control system Including: - PVC pipe, flexible branded, heavy duty, corrugated GWT 850 °C, placed within plasterboard walls, or within false ceiling (if present in neighboring areas) in IP4X execution or alternatively rigid pvc piping GWT 960 °C, complete with IP55 fasteners and fittings; - junction box (round or rectangular) for fixing device to be mounted on the wall in an easily accessible position IP55 utility-side terminal; - branch share in shielded type cable suitable for security systems type Belden AWG22 (to be verified exact type with system manufacturer) incoming from zone access control unit; - label identifying the arrangement unit itself; Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 103 N.P.E 01- CB	Supply and installation of 5-pole DATA RACK busbar supply header with 630A rating with solid copper conductors. Heat-treated extruded aluminum outer casing and individually insulated and tinned inner conductors for the entire length. IP23D degree of protection. Pre-assembled maintenance-free one-piece type coupling and plug-in guide. Tightening to 55Nm with torque wrench. Dimensions equal to 140mmx113mm. The cross section of Neutral and protective conductor are equal to the cross section of Phases. The busbar conduit must have fire and earthquake certificates. Reference standard IEC61439-6. The conduit shall allow the installation of Plug-nPlay type junction boxes. Junction boxes must be able to be safely installed or removed from the busbar conduit in the presence of voltage and must be able to be installed or removed at any point along the conduit, outside the joints. Set up with the following components: - no.1 window for thermography power connections diam. 3" - n.1 connector for 230Vac auxiliary power supply - n.1 removable BUS outgoing connector to measuring modules installed on branch plugs from busbar conduit (removable connectors must allow the removal of a cassette from the BUS, while ensuring the operation of the rest of the system - n.1 RJ45 connector accessible at front of cassette for connection to supervisory system - n.1 24Vdc auxiliary power supply of suitable power to operate the measurement and communication system - n.1 multimeter with integrated web server and gateway function for communication BUS to downstream measurement devices - n.1 three-phase voltage measurement module, with advanced voltage analysis functions - no.1 current measurement module with no.4 fast inputs for CT connection, with advanced current analysis functions		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	- No.4 closed toroidal CTs with 630A rated current - q.b. internal power, auxiliary and communication wiring, disconnection and protection devices, etc. It is specified that the measurement modules should be visible at the front of the box in order to allow verification of proper operation Included are charges for programming of all installed components, to be carried out on site to allow proper communication with the supervisory system. Including all wiring, labels, accessories and charges; all perfectly finished in a professional condition. **euro**	cadauno	
Nr. 104 N.P.E 01-CC	Supply and installation of partitioning for hot corridor "HIGH ceiling" for 1 island 16000mm long, with double transparent sliding door entrance and exit and portion for insertion Visual structure dim.100x30cm approx. included. The partitioning will be done with Modulan Polycarbonate panels and aluminum frame and will be suspended from the ceiling. Below the vertical panels and in support on the roof of racks, will be placed 300mm high brushes for containment . Realization of front and rear closures through properly shaped panels for entry of all electrical conduits. Installation with attachment directly to the suspended ceiling. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 105 N.P.E 01- CL	Supply and installation of Outdoor light control point by **on/off button**. Realization of outdoor light control point, composed of: - outdoor box for wall mounting for modular fixtures 3 places; - fixture holder frame 3 places; - finishing plate 3 places; - no. 1 push button 1NA, 10A - rigid pvc pipe diam. 25mm laid exposed, threaded with FG16OM16 3G2.5mmq conductors, including suitable junction box. Including share of rigid PVC pipe and completion accessories. Complete with all accessories and charges to give the light control point finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 106 N.P.E 01-CN	Special cable tray called "secure tranking" of the closed type with lid, in hot-dip galvanized steel with Sendzimir UNI EN 10346 process, thickness reedged sheet thickness 20/10, prepared for grounding braid and safety rope, equipped with special butterfly type closures length of the single element 2 m, blind bottom, including cover and fixing accessories, thickness 20/10: with zipper and clasp closure: section 450 x 150 mm **euro**	m	
Nr. 107 N.P.E 01-EPO	Realization of Emergency power off "EPO" system for the service of each data room, through the supply and installation of a "rotary" control device, protected against accidental actuation to be positioned inside the Back Security room. For each energy system connected to the room (Block A/B/C/D/E/F attached) you must act as follows: - Power supply drive "MV DB. X-#-Y" on previous panel in MV ring (Y = reference systems A or B or C etc); - Power Switch circuit breaker "MV DB. X-#-Y" on the next panel in MT ring (Y=reference systems A or B up to F); - Epo Contact drive on "UPS-M. X-#-Y" + release of batteries (Y=reference systems A or B up to F); - Epo Contact drive on "UPS. X-#-Y" + release of batteries (Y=reference systems A or B up to F); - Generator stop "Y" (Y=reference systems A or B up to F); Each control circuit must be equipped with a circuit integrity signal. For the emergency control systems of the data halls concerned, a wall-mounted switchboard suitable for containing the required disconnecting devices shall be provided. It is included in the offer PVC pipes under wall track (visible in the presence of technical rooms), supply of cables FTG18OM16 2x1.5mmq, from the installation point of the release command to the connection point of the user to be released. For details of the required links, see the dedicated table on the Technical Report of the project. Including all wiring, labels, accessories and charges; all perfectly finished in a workmanlike manner and working according to current legislation. **euro**	a corpo	
Nr. 108 N.P.E 01-FM	Supply and installation of outlet service point socket (italian sockets) + UNEL in in recessed mounting execution. Realization of service socket point, consisting of: - flush-mounting box for 3-person modular appliances - fixture holder frame 3 places - finishing plate 3 places - no. 1 aligned pole socket 2x10/16A+T (Bipasso socket italian version); - no. 1 multistandard UNEL socket - pvc folding pipe diam. 25mm laid under trace in masonry, threading with FG17 3x2.5mmq conductors, all with origin from main distribution line, including suitable junction box. - Portion of cable FG16OM16 portion of backbone as per the single line diagrams; Reference on plan **EF01** Civil series and BTicino Light finishing plates (GE plate) to be confirmed with Architectural DL at site. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 109 N.P.E 01- FO	OM4 LC multimode optical cable type loose monotube for indoor/outdoor with gel filler, PE sheath: 36 fibers anti-rodent dielectric armature

	euro	m	
Nr. 110 N.P.E 01-HVAC	Supply and installation of power supply point mechanical equipment "Chiller" or also referred to as GF. Construction of power supply of chiller unit serving the Data Hall, including: - watertight grommets to allow power cables to enter; - cable termination with suitable fixing lugs; - realization of the connections to the BMS system including bus cable of the elements in the field of regulation and control (states, alarms, consents); - realization of series connections between adjacent machines by means of LAN cable (please refer to specific imp.mechanics for more details); - realization of all auxiliary connections (e.g., valves, probes, thermostat, control panel, etc.) to be checked with equipment manufacturer; - connection to terminal board; - plastic rotary disconnector with red padlockable knob on yellow flange exposed installation complete with fixing. IP65 degree of protection. The whole with IP65 degree of protection. Power cable computed in dedicated section. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 111 N.P.E 01-HW/CA	PC Server- I7 core - 16GB ram Supply and installation of **PC Server- I7 core - 16GB ram** - 2 SSD 500GB x SO in RAID, 2x4TB HD in RAID, 2 NETWORK Cards - RACK Version Complete with all accessories and charges to give the component finished and working in a state of good working order. **euro**	cadauno	
Nr. 112 N.P.E 01-HW/TVCC	Camera Recording Server. Supply and installation of Camera Recording Server; Pc RACK 19' format with dual power supply. Minimum features i7 processor, 16GB RAM, 2x240GB RAID1 SSD, 8x4TB RAID1, Windows Server 2019, 4 Gigabit ret cards. Included in the offer is accessory for installation in Rack cabinet (Slide Rack Rail for Recording Server). Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 113 N.P.E 01-KNX	Supply and installation of switchboard for lighting control KNX/DALI system, (TYPE 1) including: - No. 1 KNX/IP Router that allows the forwarding of telegrams between various lines via LAN (IP). The device can also be used as a communication interface in order to connect a PC to the KNX bus. The router supports up to 8 tunneling channels. No additional power supply is needed beyond that of the KNX bus. E60715 DIN rail mounting. - No. 2 KNX 640mA power supply, with two outputs: KNX and 30 V DC for additional devices. Two identical power supplies can be connected in parallel on the same line. The KNX power supply has a potential-free relay output as a signaling contact for operation or diagnostic messages. Rated voltage: 220-240 V AC, 50/60 Hz, KNX output voltage: 28-31 V DC SELV, Output current: 640 mA (all outputs); - No. 2 REG-K KNX DALI two-channel gateway to connect the DALI bus to the KNX system. Supports control (switching and dimming) of 128 electronic ballasts (64 ballasts per channel) controllable in 16 groups per channel. Supply voltage: 120-240 V C/DC, 50/60 Hz Outputs: 2 x DALI D+, D-, DC 16-18 V (basic isolation, not SELV), 250 mA max; - No. 1 Switching actuator, KNX standard, relay outputs 230 V AC 16 A on resistive load (led 200 W), manual controls on board module, switching status indication led, choice of command function (instantaneous, delayed, impulse switching), participation in centralized commands with storage and scene recall, ON/OFF switching functions, impulse, ON/OFF delay, stair lights with warning, power supply 230 V AC, in modular housing IP 20 degree of protection, installed on DIN35 rail, including system activation: 8 outputs - No. 1 Line or sector coupler for connection to BUS backbone, power supply via BUS line, status display LED and button for physical address programming, complying with EN 50090 standard, in modular insulated enclosure installed on DIN35 bar, this one excluded, including system activation. Including charges for the constructive design of the system, equipment containment switchboard, wiring and fixing accessories, share of knx bus cables for device connection and any other accessories and charges necessary to give the KNX/DALI lighting control switchboard in finished and working order. **euro**	a corpo	
Nr. 114 N.P.E 01- LF	Supply and installation of waterproof LED ceiling fixture, IP66, with polycarbonate body and diffuser. For ceiling, wall and pendant mounting. PC diffuser with internal prism structure. With symmetrical wide-beam light distribution. Glare rating according to UGR < 25 classification (EN 12464-1). Luminaire luminous flux 6000 lm, power consumption 44.00 W. Color of light neutral white, color temperature (CCT) 4000 K, general color rendering index (CRI) Ra > 80. Polycarbonate luminaire body. Luminaire body color light gray (RAL 7035). With clampless closing technique for easy mounting suitable for the degree of protection of cover diffusers and luminaire bodies after connection. Dimensions (W x D): 1552 mm x 102 mm, luminaire height 91 mm. Degree of protection (DIN EN 60529): IP66, impact resistance rating in accordance with IEC 62262. Reference on plan **LF01** (installations mainly in technical areas). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
Nr. 115 N.P.E 01-LFE	Supply and installation of Supervision Central Unit for emergency lighting systems equipped with a microprocessor capable of automatically performing periodic centralized checks to verify the efficiency status of an emergency lighting system. Central unit interface implemented on Web Server accessible remotely from any PC with any Internet browser. Number of luminaires that can be connected 256 on two bus lines, expandable to 1280 through special repeaters. Ethernet port with TCP/IP protocol for Ethernet/ Internet connection. Self-acquisition via software for luminaire identification via RS485 bus. management of 32 logical groups of luminaires, Li- PO4 battery for 4h of autonomy in the absence of power supply. Equipped with 2 green LEDs for system signaling in operation and 10Mb/s Ethernet connection, Equipped with additional red LED for anomaly signaling. Prepared for installation in 19" Rack cabinet - 1 unit. (supply and installation of 16U rack cabinet including all necessary accessories is included in the offer). Power supply 230Vac 50Hz, complete with programming and installation manual. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 116 N.P.E 01-MT	Single-core pre-terminated three-core RG26H1M16X rigid cable insulated with ethylene propylene rubber, operating temperature 105° LS0H, operating voltage 18 kV - 30 kV: cross-section 3x1x300mmq **euro**	m	
Nr. 117 N.P.E 01-NOTE	INTRODUCTION The quantities of materials indicated in the BOQ are to be considered approximate and must be checked by the Firm at the time of tender. It is understood that the acceptance of said quantities by the Firm entails the obligation to execute the installations as designed without the possibility of requesting in the course of the work variants for more supplies unless these have been expressly requested in the course of the work by the Client. The prices used to compose the following metric statement, were taken from: - Average market prices (N.P.E) - Specific bids from type suppliers - Electrical installations information price list version December 2022 The list of materials below must be completed by the Tender Company by filling in: 1. the column of unit prices, which will be used as unit prices in the accounting of any additional works and for any deductions in the case of partially completed works; 2. the column of total costs resulting from the product quantity by unit price. However, it should be recalled once again that the installation is to be considered contracted on a forfeit price basis. **euro**	a corpo	
Nr. 118 N.P.E 01-OC	Fees for testing of electrical installations made/equipment by the general Contractors principally of: - all LV and MV switchboards - all power lines in cable / busbar conduits. It is anticipated as of now that the following tests will be required: - setting of all calibrations of both MV and LV electrical protections, as per the dedicated project - realization of testing of all electrical protections using specific devices (e.g., primary injection) - realization of testing of all electrical transformers (power, TA, TV, TO) - realization of insulation, impedance, applied voltage, microresistance tests on the busbar systems of all electrical panels - realization of insulation, impedance, applied voltage, microresistance tests on all electrical conduits - realization of bolt tightening test of all electrical connections made - production of specific reports for all the tests listed above - realization of thermographs; Including all charges and supports necessary for the realization of the electrical installations tests described above. Expected charge for all installations. **euro**	a corpo	
Nr. 119 N.P.E 01-ON	Fees for performing technical cleaning according to ISO 14644-1:2015 Class 8, with air particle testing and certification before RFS. The contractor shall identify this work in the submitted schedule of work and shall maintain and protect the environment while performing any work. In addition, the contractor shall ensure that all premises such as Data Hall, Entrance Room and IDF Room, including administrative areas, offices and attached storage areas, have been thoroughly cleaned prior to handover to the client. All inclusive of all accessories and fees and consumables to give the device finished and functioning in a state of good working order. **euro**	a corpo	
Nr. 120 N.P.E 01- PL	Realization of **normal indoor lighting point** in exposed execution from ceiling/wall/recessed, consisting of: - portion of power cable FG16OM16 laid in rigid and/or flexible PVC piping laid in cable duct and derivation from the latter with rigid and/or flexible PVC piping - PVC pipe medium series rigid and/or flexible (according to the placement of the light fixture) diamento 20mm ; - junction box - fittings and completion accessories All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
Nr. 121 N.P.E 01-REI	Charges for the internal sealing of all underground pipes, at the end of the work, in all accessible points, e.g. manholes, entry points into buildings, etc.To be made with removable material such as mastic (no foams).Including all accessories and charges necessary to give the finished sealing in place **euro**	a corpo	
Nr. 122 N.P.E 01- RI	Supply and installation of Fire Detection Control Panel, **8 loops** analog addressed in medium box complete with command and control panel with color graphic display and 24 Vdc 5 A power supply. Basically equipped to manage 8 loops of 200 addresses each expandable to 10 loops to manage up to 1,600 addresses. Central unit also configurable with open lines (e.g., 8 loops = 16 open lines). Equipped with USB port, Ethernet port, RS422 MODBUS port, RS485 port for repeater panels, printer output, 3 relays, 24 Vdc 500 mA output, 2 24 Vdc 1 A siren lines and 2 programmable inputs. MGNET connectable. EN54-2, EN54-4 and EN54-13 certified. Composed of: - No. 1 Card to network the control unit (up to 16 control units per MGNET network, with possibility of cross interactive logics); - No. 2 12 V 12 Ah sealed lead-acid battery; - No. 1 Specific fiber optic converter (including transmission of back-up alarm signal). Also suitable for remote command and control panels, remote repeater panels and printers. Maximum distance 6 km with G50 / 125 µm or G62.5 / 125 µn multimode optical fiber, ST connector. Power supply 24 Vdc, absorption 35 mA @ 24 Vdc, mounting on DIN rail. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 123 N.P.E 01-SOS	Supply and installation of wall-mounted INTERCOM SERVER, without transformer, expandable into a system for up to 25,000 users in a single local area network. Must allow connection of IP, 2 or 4-wire terminals, with the possibility of mixed configurations. Integrated functions for control of gates and doors, alarms, video interface, control console, etc.; possibility of implementation of security and communication systems for networks composed of up to 14,280 Intercom Servers and up to 30,000 users. It must also be possible to receive and forward calls to and from the public telephone network, e.g., via VoIP or PSTN. Server with 5 slots available for plug-in cards, Maximum number of users: - IP 40 Users per Intercom Server (80 with expansion module). - Digital 20 Users per Intercom Server (40 with expansion module) - Analog 20 Users per Intercom Server (40 with expansion module) - Possibility of mixed configurations One AF input (for music or alarms), two inputs for floating contacts, two relay outputs, RS232 and IP interfaces for system maintenance and programming (including remote). Complete with: - No. 1 high-efficiency 65W 24V DC switching power supply; - No. 1 power cable 1.5 m; - No. 1 base card for LAN connection Network card with IP protocol for LAN networks (8 connections); - No. 1 base card for 4 users, FUNCTIONAL LEVEL B DSP user card for connecting up to 4 digital users with 2-wire lines. Up to 5 cards (10 with expansion module) G3-GED can be used in a GE 300 IP Intercom Server. It has one simultaneous conversation channel for each user (non-blocking system); - No. 1 upgrade license from G3-GED-4B to G3-GED-4P; All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 124 N.P.E 01-SPD RIBA 4	Supply and installation of medium voltage surge protector 30kV. Supply and installation of surge arrester (single-pole) for medium voltage, in accordance with IEC 99-4 / EN 60099-4 / ANSI/IEEE C.62 11. Protective apparatus executed with FRP tube casing, covered with silicone rubber, composed of zinc oxide varistors, equipped with stainless steel M12 threaded pins for electrical connection and mechanical fastening, construction form with fins for high degree of contamination, for indoor and outdoor use Rated voltage Ur: 36.0 kV Maximum continuous voltage Uc: 28.8 kV Temporary overvoltage for 1 sec UTOV: 42.0 kV Line discharge class: 1 Rated discharge current In: 10 kA (8/20 µs) High current pulse: 100 kA (4/10 µs) Residual voltage with pulse 10 kA (1/2 micros) Urss: 138.0 kV Residual voltage with pulse 10 kA (8/20 micros) Urs: 117.0 kV Residual voltage with impulse 20 kA (8/20 micros) Urs: 133.0 kV Residual voltage with shunting pulse 500 A (30/75 micros) Ursch: 80.5 kV Involute height: 380 mm Total escape line: 1000 mm Weight: 5.2 kg Including mounting and connecting accessories such as: - flexible tinned copper cable sect. 50mm² for SPD MT L=500 mm - disconnection device for disconnecting the faulty arrester from the grid - insulated support, accessory for mounting the medium voltage surge arrester with disconnection device All in place, including all accessories and charges necessary to give the SPDs for medium voltage finished and working in a state of art performance.

	euro	cadauno	
Nr. 125 N.P.E 01-SPE	Supply and installation of static and seismic transversal support to serve the electrical conduits inside the Data Hall in the vicinity of the rack cabinets, with positioning of bracket spacing as per the project drawings. For all detailed technical specifications on the execution of the work, please refer to the Technical Report of the project (ref. bracket detail on plan "**BR01a**"). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 126 N.P.E 01-TD	Supply and installation of server cabinet, designed to accommodate 48 19" rack units. Removable sides and bottom, front and rear grilled doors, dim. 800x600x2300. Cabinets must be completed with four 19" rack posts mounted on adjustable cable ducts. Including adjustable feet, four power supply panels consisting of light switch and at least 2 PDUs monitored rack at the level of individual sockets 16A C13 and 3 C19, air extractor on top panel, lock with key (master), copper bar for equipotential node and completion accessories. **euro**	cad	
Nr. 127 N.P.E 01-TER	Fees for verification and certification of the current state of the earthing system before execution of the work, including the detection of the value of the impedance/resistance of the fault loop performed by licensed professional/certifying body. **euro**	a corpo	
Nr. 128 N.P.E 01-TVCC	IP Dome camera placed inside the Building. Supply and installation of IP Dome Camera (2688×1520) 1080p@30fps, True Day/Night, SLOW PTZ Motorized lens with 4X Optical zoom and autofocus (2.7/13.5mm). H.265+/H.265/H.264+/H.264 compression-WDR 120db- ONVIF certified. White color aluminum housing, transparent dome. Indoor/outdoor version for ceiling or wall installation with optional bracket. Temperature range -30° / +60°C, vandal-proof IK10, IP66 degree of protection. Power supply 12VDC(±10%), POE(802.3at). Includes: - Junction Box for Mini Dome; - Bracket for Indoor/outdoor MiniDome mounting to wall (wall mount) to pole (Pole mount+wall mount) to ceiling (in.ceiling mount) - PVC pipe, flexible branded, heavy, corrugated GWT 850 °C, placed within plasterboard walls, or within false ceiling (if present in neighboring areas) in IP4X execution or alternatively rigid pvc piping GWT 960 °C, complete with IP55 fasteners and fittings; - junction box (round or rectangular) for fixing device to be mounted on wall in easily accessible position IP55 utility-side terminal; - derivation quota in energy/data cable (computed in dedicated chapter); - label identifying the arrangement unit itself; Reference on plan **SD02** Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 129 N.P.E 01-SCH	Supply and installation of shielding system for the realization of shielding from electromagnetic fields from 0 Hz to 150 kHz made of flexible metal mesh 0.6 mm thick in weft and warp, protected from corrosion and electrically insulated with polyester coating with reinforcement woven in 125 µm thick glass fibers, design and installation aimed at respecting the quality objective of B ≥ 3 µT textured reinforcement in glass fibers 250 µm thick on the visible side, on the opposite side with polypropylene coating with (D.P.C.M. 8/7/2003), verified according to CEI 211-6, without adding additional conductive elements, except for executive technical requirements. The installation includes every fixing element or accessory necessary to give the finished work in its entirety before the release of the construction site. Thickness: 0.6 - 1.3 mm Weight: 3,6 - 7,2 kg/m2 The turnkey supply is expressed in body and includes: Design and analysis of electromagnetic impact with SW. EFC400 certificate (margin of error +/-1.4%); architectural survey; preparation and supply of the material; yield ex construction site; installation. Complete with every accessory to give the finished work and working in a workmanlike manner. **euro**	cad	
Nr. 130 N.P.E 01-TR	Three-phase resin transformer, class F secondary voltage 15kV, regulation terminals ± 2 x 2.5%, execution compliant with current regulations: primary voltage 400V: power 500 kVA **euro**	cad	
Nr. 131 N.P.E 01A-EVAC	Supply and installation of EVAC Sound Distribution Center (type 2) composed of: **No. 2** 19" rack standard container cabinet, complete with rear panel. Made of pre-galvanized sheet metal,painted with oven-baked epoxy powder system.Sturdy structure, made of folded sheet metal and internally reinforced with 8 "U" stamped elements closed in a ring. Double perforations, to rack standards, on vertical elements for fastening, with cage nuts, of equipment, panels and sliding rails, internal support planes. Standard IEC297, CEI60297, protection EN60529 IP30 when equipped with locking door, (optional) RAL7035 gray color. Dimensions A1396 x W 530 x D 600 mm 30U-05; **No. 1** Control and display unit for voice evacuation systems, 8 lines or single zones (or dual with optional board) consisting of: - Microphone and pre-recorded emergency messages that can be activated from the front panel or remotely with the possibility of		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	sending the differentiated messages simultaneously to multiple zones. - 4 monitored analog audio inputs + 8 unmonitored analog audio inputs + 2 audio from digital sources . - 16 monitored "trigger" inputs for triggering events (alert, evacuation, etc.) from fire control panel or other devices. - Built-in 480W audio power supply; - USB connector for connecting external mass storage devices; - Proprietary digital bus for microphone bases; - RS232, and Ethernet communication ports; EN54-16 certified; Power supply: 230V ac and 24V dc; Dimensions: H88 x W430 x D330 mm.- Weight: 6.3 kg. - Color: black.; **No. 3** Expansion unit, control for voice evacuation systems, 8 single lines (or dual with optional MET8SC board) with 8 unmonitored audio inputs, Certified to EN54-16 standards, Power supply: 24V dc. Dimensions: H88 x W430 x D330 mm. - Weight: 4 kg. - Color: black; **No. 4** Dual line board, 8 line-zones; **No. 1** Panel with USB jack, STIpa RCA signal input, AUX Jack 3.5mm input. Size 1 UR; **No. 4** Power amplifier module, class D, with muting circuit for elimination of impulse noise at power on, protection device against short circuit, overload and with ventilation system for forced air cooling. Balanced inputs and outputs with removable screw terminals. Power outputs, for speakers with removable screw terminals, voltages 100V - 50V - 33V. LED light signals for power on, signal presence and saturation clip with protection trip. Input sensitivity: 1V rms Output power: 180W (power supply 29V dc) Frequency response: 68 Hz÷20,000 Hz Enclosure, black color. Footprint 2 units or 3 units depending on the support plane utiizzato, Power supply: 24V dc nominal. Certified to EN54-16 standards. Overall dimensions: H88 x L130 x D420 mm. - Weight: 3.7 kg. **No. 18** Power amplifier module, class D, with muting circuit for elimination of impulse noise on power-up, protection device against short-circuits, overloads, and with ventilation system for forced-air cooling. Balanced inputs and outputs with removable screw terminals. Power outputs, for speakers with removable screw terminals, voltages 100V - 50V - 33V. LED light signals for power on, signal presence and saturation clip with protection trip. Input sensitivity: 1V rms Output power: 150W + 150W (29V dc power supply) Frequency response: 40 Hz÷20,000 Hz Container, black color.Footprint 2 units or 3 units depending on the support plane used, Power supply: 24V dc nominal. Certified to EN54-16 standards. Overall dimensions: H88 x L130 x D420 mm **No. 3** High output, low ripple, stabilized power supply module for audio amplifiers, rated output voltage 29V dc. consisting of: - 720W audio single version module. - LED light signaling of presence of output power supply. - Thermostat-controlled fan. - Overload, short circuit, overtemperature, overvoltage protections. - Input power supply: 230V ac, 50-60Hz. - Metal housing, black color. - Footprint 2 units or 3 units depending on the support plane utiized. - Certified to EN54-16 standards. **No. 3** High output, low ripple, stabilized power supply module for audio amplifiers, with rated output voltage 29V dc. consisting of: - 720W+720W audio dual version module. - LED light indication of presence of output power supply.Thermostat-controlled fan. - Overload, short circuit, overtemperature, overvoltage protections. - Input power supply: 230V ac, 50-60Hz. - Metal housing, black color. - Footprint 2 units or 3 units depending on the support plane utiized. - Certified to EN54-16 standards. Dimensions: H88 x L130 x D420 mm - Weight: 3.1 kg **No. 2** Control units for 6 power supplies with 100Ah battery charger. System for control and status display, of 6 power supplies, with battery charger, lead-acid type batteries, up to 100Ah complete with probe for charging temperature control. Rated working voltage 24V dc, maximum capacity per output 32A, total controlled power 2400W. RS232 port.Metal case, black color. Primary power supply: 230V ac. Footprint 2 units or 3 units depending on the support plane utiized. Certified to EN54-4 standards. Dimensions: H88 x W483 x D380mm. - Weight: 5.3Kg; **No. 2** Kit consisting of 2 100Ah batteries, total 24V dc, with suspended stand, locking rack panel and 22x58 fuse. **No. 2** reinforced rack furniture wheels kit n°1 connection kit with "heratcube" processor bidirectional exchange 22/2737 All inclusive of all accessories and charges (piping, fittings, junction boxes) to give the device finished and working in a state of good working order. **euro**	a corpo	
Nr. 132 N.P.E 01A-FO	OM4 LC multimode optical cable type loose monotube for indoor/outdoor with gel filler, PE sheath: 6 fibers anti-rodent dielectric armature **euro**	m	
Nr. 133 N.P.E 01A-LPS	Supply and installation of air-termination pole captator on insulated support pole, prepared for fixing air-termination ropes, composed of the following elements: - air-termination rod (h=0.75 m) made of solid aluminum alloy rod (AlMgSi), cambered at the top and equipped with M16 thread for fixing on concrete plinth, complying with CEI EN 62305-3; - support pole of 6.5 m, made of Øe 40 mm GRP pipe with high mechanical strength, TNT finish for UV protection and track-breaking fin for high impulse resistance even in rain; - support base made of Ø 380 mm round concrete plinth weighing 16 kg, equipped with central M16 female thread, handle for easy transportation and Ø 445 mm TPE protection base; - all accessories and stainless steel clamping hardware required for connection between the different elements of the captator; Reference on plan **T2**		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 134 N.P.E 01A-MT	Single-core pre-terminated three-core RG26H1M16X rigid cable insulated with ethylene propylene rubber, operating temperature 105° LS0H, operating voltage 18 kV - 30 kV: cross-section 3x1x240mmq **euro**	m	
Nr. 135 N.P.E 01A-QE	**MV.A/B-0-1** electric switchboard. Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 136 N.P.E 02-ACP	Supply and installation of WIFI device for outdoor use with the following specifications: Dimensions 343.2 x 181.2 x 60.2 mm (13.51 x 7.13 x 2.37") Weight With Mounting Kits: 633 g (1.40 lb) Networking Interface: (2) 10/100/1000 Ethernet Ports Buttons: Reset Power Method: 802.3af PoE (Supported Voltage Range: 44 to 57VDC) Power Supply: 48V, 0.5A PoE Gigabit Adapter*. Power Save: Supported Maximum Power Consumption: 9W Maximum TX Power 2.4 GHz 5 GHz: 22 dBm/22 dBm Antennas: (3) Dual-Band Antennas, 2.4 GHz: 8 dBi, Wi-Fi Standards 802.11 a/b/g/n/r/k/v/ac Wireless Security: WEP, WPA-PSK, WPA-Enterprise (WPA/WPA2, TKIP/AES) BSSID: Up to 8 per Radio Mounting: Wall/Ceiling (Kits Included) Operating Temperature: -40 to 70° C (-40 to 158° F) Operating Humidity 5 to 95% Noncondensing Certifications: CE, FCC, IC Included in the offer is the supporting POE adapter device (POE-48-24W) and all bracketing and support accessories. Reference on plan **APO** All inclusive of all accessories and charges to give the device finished and functioning in a workmanlike manner. Reference brand UBIQUITI model UAP-AC-M-PRO + POE-48-24W **euro**	cadauno	
Nr. 137 N.P.E 02-BMS	Realization on site of equipment connection BMS regulation system , composed mainly of: - control valves / dampers on air ducts (servomotors); - motorized dampers - temperature / humidity / pressure and flow rate probes - pressure switches - equipment status / alarm contacts - serial / ethernet / bacnet / modbus interfaces, etc. for AHU / CRAC / UPS / GE / etc.; - meters / power meters - realization BUS communication between the switchboards of the BMS control system. All as visible on the functional diagram attached to the project of mechanical and electrical systems, points list and technical description in the tender documents. Including supply and installation of threading conduits and suitable conductors with connectors for power and signal of all listed equipment, as per the points list attached to the Technical Report of the project. Including all accessories and charges necessary to give the connections in place finished and functional. **euro**	a corpo	
Nr. 138 N.P.E 02-CA	Reader with dual self-identification (biometric+badge) for access control system. Supply and installation of IP66 K9 Outdoor Biometric+Badge Function Outdoor Biometric Reader with RF HID Class reader and Live Finger Detection technology. Compatible with Template on Card technology for GPDR compliance. LAN POE interface, RS485 port, 1 Wiegand input, 2 TTL inputs, 2 TTL outputs. Includes: - Custom Flared Plates for BEW2, Aluminum-zinc alloy, CNC machined ergal plates, A7075 certified material; - PVC pipe, branded flexible, heavy, corrugated GWT 850 °C, placed within plasterboard walls, or within false ceiling (if present in neighboring areas) in IP4X execution or alternatively rigid pvc piping GWT 960 °C, complete with IP55 fasteners and fittings; - junction box (round or rectangular) for fixing device to be mounted on the wall in an easily accessible position IP55 utility-side terminal;		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	- branch share in shielded type cable adapted for security systems type Belden AWG22 (to be verified exact type with system manufacturer) incoming from zone access control unit; - label identifying the arrangement unit itself; Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 139 N.P.E 02-CB	Supply and installation of standard straight element for 5-pole DATA RACK busbar conduit with 630A rating with solid copper conductors. Heat-treated extruded aluminum outer casing and individually insulated and tinned inner conductors for the entire length. IP23D degree of protection. Pre-assembled maintenance-free one-piece type coupling and plug-in guide. Tightening to 55Nm with torque wrench. Dimensions equal to 140mmx113mm. The cross section of Neutral and protective conductor are equal to the cross section of Phases. The busbar conduit must have fire and earthquake certificates. Reference standard IEC61439-6. The conduit shall allow the installation of Plug-nPlay type junction boxes. The junction boxes must be able to be safely installed or removed from the busbar conduit in the presence of voltage and must be able to be installed or removed at any point along the conduit, outside the joints. All inclusive of all accessories and charges to give the system finished and functioning in a state of good works. **euro**	m	
Nr. 140 N.P.E 02-CC RIBA 4	Supply and installation of self standing panel size 600x2300mm for compartmentation of infra-rack void space as visible on plans. Including all accessories and charges necessary to give the closure panel in place finished in a state of good working order. **euro**	a corpo	
Nr. 141 N.P.E 02-CN	Special cable tray called "secure tranking" of the closed type with lid, in hot-dip galvanized steel with Sendzimir UNI EN 10346 process, thickness reedged sheet thickness 20/10, prepared for grounding braid and safety rope, equipped with special butterfly type closures length of the single element 2 m, blind bottom, including cover and fixing accessories, thickness 20/10: with zipper and clasp closure: section 150 x 100 mm **euro**	m	
Nr. 142 N.P.E 02-FM	Supply and installation of two-way service socket + UNEL in flush-mounted execution with intumescent protection for applications on REI compartments. Realization of service socket point, consisting of: - flush-mounting box for 3-place modular appliances - frame for 3-person devices - finishing plate 3 places - no. 1 socket with aligned poles 2x10/16A+T - no. 1 multistandard UNEL socket - pvc folding pipe diam. 25mm laid under trace in masonry, threading with FG17 3x2.5mmq conductors, all with origin from main distribution line, including suitable junction box. - Portion of FG16OM16 cable backbone as per the uniform schematics; It is included in the tender: Supply and installation of protection of electrical fruit boxes in walls (plasterboard and non-plasterboard) made by application of intumescent sheathing insertable inside a fruit box, adhering to the bottom and side walls. The reinstatement will ensure the degree of protection EI 120: - on flexible wall EI 120 for fire/cool side application in boxes of size 503 - on rigid wall, min. thickness 135 mm, for fire/cool side application in 503 boxes. For precise identification of restoration points, refer to the project drawings with reference on plan **EF02** Civil series and BTicino Light finish plates (GE plate) to be confirmed with Architectural DL at the construction site. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 143 N.P.E 02- FO	OM4 LC multimode optical cable type loose monotube for indoor/outdoor with gel filler, PE sheath: 48 fibers anti-rodent dielectric armature **euro**	m	
Nr. 144 N.P.E 02- FV	Supply and installation of photovoltaic system on building roof for a capacity of about 290 kWp composed of: - No. 644 monocrystalline silicon panels class 0 - 450KWp each (292.5 KWp total); - No. 4 c,c,/c,a conversion unit,(inverter); - dc-side switchboards; - Remote control power production control unit for photovoltaic system; - supply of all materials such as electrical cables of FG21M21/H1Z2Z2-K type complying with photovoltaic field regulations, String wiring, inverter, panel fixing and anchoring supports; - Interface device for metering utility to be placed on MV receiving panel; - Device for production meter connection to be placed on roof on FTV.B-0-1 switchboard; - Charges for Management/development practices with Manager; - Commissioning (post endorsement/checks/verifications operator); - release button to be positioned according to the instructions of the VVF contact person (see quantification and function plant in dedicated chapter); - charges and accessories to give the system finished and functioning according to the rule of art; **euro**	a corpo	

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
Nr. 145 N.P.E 02-HVAC	Supply and installation of power supply point mechanical equipment "UTA" or also referred to as AHU. Realization of AHU power supply serving the Data Hall, including: - watertight grommets to allow power cables to enter; - cable termination with suitable fixing lugs; - realization of connections to the BMS system including bus cable of field elements for regulation and control (states, alarms, consents); - realization of all auxiliary connections (e.g., valves, probes, thermostat, control panel, etc.) to be checked with equipment manufacturer; - connection to terminal board; - plastic rotary disconnect switch with red padlockable knob on yellow flange exposed installation complete with fasteners. All with IP65 degree of protection. Power cable computed in dedicated chapter. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 146 N.P.E 02-HW/CA	Hardware Support Fees for startup 5 Years **Hardware Support** on Server intervention within 24H (to be coordinated with customer in schedule phase) Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 147 N.P.E 02-HW/TVCC	Camera Recording Server - Failover Supply and installation of Camera Recording Server - Failover server intended use; Pc RACK 19' format with dual power supply. Minimum features i7 processor, 16GB RAM, 2x240GB RAID1 SSD, 8x4TB RAID1, Windows Server 2019, 2 Gigabit network cards. It is included in the offer accessory for installation in Rack cabinet (Slide Rack Rail for Failover Server). Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 148 N.P.E 02-KNX	Supply and installation of switchboard for lighting control KNX/DALI system, (TYPE 2) including: - No. 1 KNX/IP Router that allows the forwarding of telegrams between various lines via LAN (IP). The device can also be used as a communication interface in order to connect a PC to the KNX bus. The router supports up to 8 tunneling channels. No additional power supply is needed beyond that of the KNX bus. E60715 DIN rail mounting. - No. 3 KNX 640mA power supply, with two outputs: KNX and 30 V DC for additional devices. Two identical power supplies can be connected in parallel on the same line. The KNX power supply has a potential-free relay output as a signaling contact for operation or diagnostic messages. Rated voltage: 220-240 V AC, 50/60 Hz, KNX output voltage: 28-31 V DC SELV, Output current: 640 mA (all outputs); - No. 3 REG-K KNX DALI two-channel gateway to connect the DALI bus to the KNX system. Supports control (switching and dimming) of 128 electronic ballasts (64 ballasts per channel) controllable in 16 groups per channel. Supply voltage: 120-240 V C/DC, 50/60 Hz Outputs: 2 x DALI D+, D-, DC 16-18 V (basic isolation, not SELV), 250 mA max; - No. 2 Switching actuator, KNX standard, relay outputs 230 V AC 16 A on resistive load (led 200 W), manual controls on board module, switching status indication led, choice of command function (instantaneous, delayed, impulse switching), participation in centralized commands with storage and scene recall, ON/OFF switching functions, impulse, ON/OFF delay, stair lights with warning, power supply 230 V AC, in modular housing IP 20 degree of protection, installed on DIN35 rail, including system activation: 8 outputs - No. 1 Line or sector coupler for connection to BUS backbone, power supply via BUS line, status display LED and button for physical address programming, complying with EN 50090 standard, in modular insulated enclosure installed on DIN35 rail, this one excluded, including system activation. Including charges for the constructive design of the system, equipment containment switchboard, wiring and fixing accessories, share of knx bus cables for device connection and any other accessories and charges necessary to give the KNX/DALI lighting control switchboard in finished and working order. **euro**	a corpo	
Nr. 149 N.P.E 02-LFE	Supply and installation of RS485 Bus Repeater Module with 4 channels of 128 lamps each. (4x128=512 max) for monitoring emergency lamps in the field. Used to expand the system and facilitate its distribution. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 150 N.P.E 02-MT	Single-core pre-terminated three-core RG26H1M16X rigid cable insulated with ethylene propylene rubber, operating temperature 105° LS0H, operating voltage 18 kV - 30 kV: cross-section 3x1x50mmq **euro**	m	
Nr. 151 N.P.E 02-NOTE	NOTE All prices are considered to include charges for the production of Construction Drawings Documentation: - Fees for the production of construction documentation, to be delivered to the DL in computer copy prior to execution of the work. Documentation must include coordination between architectural, electrical and structural drawings.		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	- Fees for the production of electrical system construction drawings including dimensions of fixtures, conduits,lighting fixture traces, overlap with other ceiling electrical systems, electrical switchboard schematics, installation dimensions and technical characteristics of components to be installed. **euro**	a corpo	
Nr. 152 N.P.E 02-OC	Fees for support to Commisioning activities realized installations (within the individual data room), inclusive mainly of: - all generator / UPS systems - all critical local conditioning systems (data rooms / power modules / etc.) - integrated systems testing (IST), including integration with fire detection system For the implementation of the above, the following charges are expected as of now to be borne by the Electrical Installations Contractor: - charges for safety preparations for the implementation of all testing activities; - rental of low-voltage load bank of power 2200kW @ cosFi 0.8 (2750kVA), with related temporary cables to be terminated on 500A single-pole connectors for connection to dedicated cabinet (so-called Load Bank Terminal Cabinet), for on-site testing of each emergency generator. At the same time, verifications of the automatic grid/g.e. switching system shall be performed, assumed 30 days; - rental of low-voltage load bank of power 1250kW @ cosFi 1 (1250kVA), with associated temporary cables to be terminated on 500A single-pole connectors for connection to dedicated switchboard (so-called Load Bank Terminal Cabinet), for on-site testing of each IT UPS, assumed 30 days; - rental of low-voltage load bank of power 250kW @ cosFi 1 (250kVA), with associated temporary cables for connection to UPS cabinet, for on-site testing of each UPS MECH, assumed 30gg; - charges for Third Party activities such as thermographic inspection of electrical connections during operation at maximum power, recording electrical system parameters by certified instrument, etc. - installation of all branch plugs (so-called tap offs) on the armored conduits of the data hall at the location of the cabinets visible on the plans; - rental of load banks with related temporary connections to be installed in data hall at the rated power of the hall (consider no.600 load banks of 10kW each, connected with section of cable and CEE 3P+N+T 32A plug to the sockets mounted on the armored conduits), assumed 30gg; - charges for closure of all hot aisles within the data hall following installation load banks to prevent cold air - hot air mixing; - supply of 90,000lt of diesel fuel (to be divided among the six generators in the individual data hall) to enable functional testing; Including all charges necessary to manage the Commisioning process as detailed within the Project Technical Report. **Price for single 5MW IT data hall.** **euro**	a corpo	
Nr. 153 N.P.E 02-ON	Realization on site of labeling of all components of electrical and special installations with durable materials specifically provided for the material to be tagged. Labeling shall include all installed materials (e.g., electrical panels, cabinets, all cables, catwalks, receptacles, detectors, etc.), no " by hand" labeling will be allowed, coding will be defined during work in progress. Including supply and installation of suitable accessories for fixing **euro**	a corpo	
Nr. 154 N.P.E 02- PL	Realization of **normal outdoor light point** in exposed execution from ceiling/wall/recessed, consisting of: - portion of power cable FG16OM16 laid in rigid outdoor PVC piping laid in cable duct and branch from the latter with rigid PVC piping - PVC pipe medium series rigid (based on the placement of the light fixture) diamento 20mm ; - junction box for outdoor use IP67; - fittings and completion accessories; All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 155 N.P.E 02- PZ	Supply and installation of CAV manhole 60x60x60cm, with concentric moldings pre-strained on the vertical walls and removable bottom composed of: - Connection gully made of precast vibrated concrete elements with lateral indentations for pipe inlets, placed on site including all labor and supplies for watertight connection of pipes, etc., including excavation, backfill with concrete and backfill; pedestrian, not diaphragmatic (dim.60x60x60 cm); - Inspection manhole (dimensions 60x60x60) and nominal net span: 55 x 55 cm, driveway type) made of spheroidal cast iron in accordance with UNI EN 1563 not hydraulic tightness for sidewalks, pedestrian areas, motor vehicle parking areas and multi-storey parking lots, with breaking strength greater than 125 kN complying with class B 125 of UNI EN 124 and regulation NF-110, with vertical periphery frame without protrusions and square cover with non-slip pedestrian surface and blind hole with bar for easy opening, coated with protective paint, marking showing the strength class, reference standard, manufacturer's identification and product quality mark issued by independent certification body. Assembled on site including all labor and supplies on pre-existing manhole - Extensions for vibrated manhole on site including all labor and installation for ground connection; **euro**	cad	
Nr. 156 N.P.E 02-REI	Supply and installation restoration of walkway crossing on flush and / or non-flush wall holometry, made by applying fireproof bearings positioned above the cable tray by placing the certified side of 120 mm parallel to the wall thickness and sealed with water-based fire sealant that guarantees a perfect seal to smoke and flames. This system is designed to quickly seal cable tray crossings		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	inserted into slots larger than the size of the walkways. Restoring will ensure the degree of protection:- EI 120 on hard wall not flush min. 125 mm for cable trays dimensions up to 600x100 mm- EI 120 on rigid wall flush min. 135 mm for cable trays dimensions up to 500x100 mmThe work will be supplied complete with identification plate, applied in a legible position, with identification of the intervention, date of execution and certification details. Restoration by crossing No. 1 cable tray or group of walkways adjacent to each other.For the precise identification of the restoration points, consult the project tablesIncluding assistance and drafting of fire prevention documentation and the compilation of the form and CERT REI certification, drawn up by a qualified technician and registered in the former register 818 as well as accessory elements of completion to give the work complete and functioning. **euro**	cadauno	
Nr. 157 N.P.E 02-RM	Charges for activities related to the multi-operator Indoor mobile radio system composed of: - Professional services including (executive and construction project, site inspections, testing of all equipment); - Passive components consisting of power dividers and connectors; - maintenance of the plant lasting 3 years; Including all support accessories, fittings, equipment assembly, wiring labeling of devices. **euro**	a corpo	
Nr. 158 N.P.E 02-SOS	Supply and installation of 2-WIRE INTERCOM CONSOLE FOR AUDIO CONTROL (to be placed on general reception/ management point building). Tabletop 2-wire intercom terminal with DSP technology in ergonomic and modern plastic housing for hands-free conversations in 16khz OpenDuplex® mode. The TERMINAL is equipped with: - graphic display (8 lines of 14 characters); - robust silicone keypad (standard 0 - 9, T, X keys in addition to 6 function keys); - multifunction LED (red, blue, green); - microphone - built-in speaker; - provision for connection of external speaker 8 ohm or higher; - 2 x 64 kBit/s speech transmission and 16 kBit/s data transmission; - built-in handset function; - 3D gravity sensor; - separate volume levels for different features (e.g. duplex talk, simplex talk, music etc.); - provision for connection of handset or headset microphone; - 3 m connection cable - black color All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 159 N.P.E 02-SPD RIBA 4	Supply and installation of surge protector for medium voltage 15kV. Supply and installation of surge arrester (single-pole) for medium voltage, according to IEC 99-4 / EN 60099-4 / ANSI/IEEE C.62 11 standards. Protective apparatus executed with FRP tube casing, covered with silicone rubber, composed of zinc oxide varistors, equipped with stainless steel M12 threaded pins for electrical connection and mechanical fastening, construction form with fins for high degree of contamination, for indoor and outdoor use Discharger in accordance with ENEL specification DY557/4 Rated voltage Ur: 18 kV Maximum continuous voltage Uc: 14.4 kV Temporary overvoltage for 1 sec UTOV: 21.0 kV Line discharge class: 1 Rated discharge current In: 10 kA (8/20 µs) High current pulse: 100 kA (4/10 µs) Residual voltage with pulse 10 kA (1/2 ms) Urss: 69.0 kV Residual voltage with pulse 10 kA (8/20 ms) Urs: 61.5 kV Residual voltage with impulse 20 kA (8/20 ms) Urs: 68.5 kV Residual voltage with shunting pulse 500 A (30/75 ms) Ursch: 44.0 kV Involute height: 245 mm Total escape line: 570 mm Weight: 3.2 kg Including mounting and connecting accessories such as: - flexible tinned copper cable sect. 50mm² for SPD MT L=500 mm - disconnection device for disconnecting the faulty arrester from the grid - insulated support, accessory for mounting the medium voltage surge arrester with disconnection device All in place, including all accessories and charges necessary to give the SPDs for medium voltage finished and working in a state of art performance. **euro**	cadauno	
Nr. 160 N.P.E 02-SPE	Supply and installation of transversal and longitudinal static and seismic support to serve the electrical conduits present inside the Data Hall in the vicinity of the rack cabinets, with positioning of bracket spacing as per the project drawings. For all detailed technical specifications on the execution of the work, please refer to the Technical Report of the project (ref. bracket detail on plan "**BR01b**"). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
Nr. 161 N.P.E 02-TD	Connection point or component preparation point structured wiring system placed on the wall for outdoor (in indoor / outdoor environments of the building) or recessed on walls / false ceiling where present composed of:- empty PVC pipe Ø25mm (rigid or flexible depending on the placement of the device);- junction box 503 (rectangular) with protection index according to the place of installation, for future insertion of RJ45 socket to be mounted inside the recessed box wall or outdoor ceiling lamp in an easily accessible position complete with protection plate;- label identifying the predisposition itself;Complete with every accessory to give the finished work and working in a workmanlike manner. **euro**	a corpo	
Nr. 162 N.P.E 02-TER	Realization of a new earthing dispersion system and equipotential bonding of the building according to the project indications, with connection to earth electrodes (structural elements). Including charges for earth measurements (with possible verification of step and contact voltages) and verification of coordination of the electrical system, protections, materials, connections, complete accessories and anything else necessary for the delivery of the work in perfect working order. **euro**	a corpo	
Nr. 163 N.P.E 02-TVCC	IP Speed Dome Camera placed in outdoor area of the Building. Supply and installation of Megapixel 1080p@30fps Autotracking Starlight Day/Night Sensor IP Speed Dome Camera - Motorized PTZ with 45x Optical Zoom and 16x Digital Zoom - Sensitivity 0.005 lux - Integrated video analysis functions with artificial intelligence algorithms- H.265+/H.265+/H.264 compression- ONVIF Profile S Certified- Preset groups, Autoscan between two points - Rotation speed 360 degrees per second - Complete with integrated high power IR Illuminators up to 200m. Operating temperature range -40° +70° - Power supply 2AC 24 V / 3 A, PoE+ (802.3at) (220V/24 power supply included). Includes: - Speed Dome Kit - Outdoor JunctionBox capacity to hold FibraConverter and power supply - Wall bracket and pole collar; - PVC pipe, flexible branded, heavy, corrugated GWT 850 °C, placed within plasterboard walls, or within false ceilings (if present in neighboring areas) in IP4X execution or alternatively rigid pvc piping GWT 960 °C, complete with IP55 fasteners and fittings; - junction box (round or rectangular) for fixing device to be mounted on wall in easily accessible position IP65 utility-side terminal; - derivation quota in energy/data cable (computed in dedicated chapter); - label identifying the arrangement unit itself; Reference on plan **SD01** Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 164 N.P.E 02A-CA	Reader with dual self-identification (keypad/badge) for access control system. Supply and installation of Reader with numeric keypad+badge function for outdoor IP66 K9, with RF HID Class reader and Live Finger Detection technology. Compatible with Template on Card technology for GPDR compliance. LAN POE interface, RS485 port, 1 Wiegand input, 2 TTL inputs, 2 TTL outputs. Includes: - Custom Flared Plates for BEW2, Aluminum-zinc alloy, CNC machined ergal plates, A7075 certified material; - PVC pipe, branded flexible, heavy, corrugated GWT 850 °C, placed within plasterboard walls, or within false ceiling (if present in neighboring areas) in IP4X execution or alternatively rigid pvc piping GWT 960 °C, complete with IP55 fasteners and fittings; - junction box (round or rectangular) for fixing device to be mounted on the wall in an easily accessible position IP55 utility-side terminal; - branch share in shielded type cable suitable for security systems type Belden AWG22 (to be verified exact type with system manufacturer) incoming from zone access control unit; - label identifying the arrangement unit itself; Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 165 N.P.E 02A-EVAC	Fees for Functional Verification Electronic Parts with Start up on-site audio center consisting of: - Equipment software programming, load calibration. - Impedance and ground fault check of loudspeaker lines. - Input of alert and evacuation messages, provided or, standard. Functional verification of various equipment. - On-site instruction of personnel in charge of operation and maintenance. All accessories and expenses are included to give the installation a finished and functional state of the art. **euro**	a corpo	
Nr. 166 N.P.E 02a-LF	Supply and installation of recessed LED luminaire with microprismatic cover dim. (600 x 600 mm). The prismatic PMMA surface of the optical system has an anti-reflection effect. With concentrating wide-beam light distribution. Glare rating according to UGR < 19 classification (EN 12464-1) For environments with video terminal use according to EN 12464-1 due to limited luminances L < 3000 cd/ ² for emission angle greater than 65° in all planes. Luminaire luminous flux 3400 lm, power consumption 31.00 W, luminaire brightness 109 lm/W. Color of light warm white, color temperature (CCT) 3000 K, overall color rendering index (CRI) Ra > 80. Dimensions (W x D): 595 mm x 595 mm, luminaire height 35.5 mm. Insulation class (EN 61140): I, degree of protection (DIN EN 60529): IP20, impact resistance rating to IEC 62262: IK03, glow wire test temperature to IEC 60695-2-11 of 650 °C. Weight: 1.1 kg. With external power supply included, digitally dimming (DALI). Reference on plan **LF02a** (installation office areas/annexed corridors/support rooms). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
Nr. 167 N.P.E 02A-RI	Supply and installation of Fire Detection Control Panel, **2 loops** analog addressed in medium box complete with command and control panel with color graphic display and 24 Vdc 5 A power supply. Basically equipped to manage 2 loops of 200 addresses each expandable to 10 loops to manage up to 1,600 addresses. Central unit also configurable with open lines (e.g., 2 loops = 4 open lines). Equipped with USB port, Ethernet port, RS422 MODBUS port, RS485 port for repeater panels, printer output, 3 relays, 24 Vdc 500 mA output, 2 24 Vdc 1 A siren lines and 2 programmable inputs. MGNET connectable. EN54-2, EN54-4 and EN54-13 certified. Composed of: - No. 1 Card to network the control unit (up to 16 control units per MGNET network, with possibility of cross interactive logics); - No. 2 12 V 12 Ah sealed lead-acid battery; - No. 1 Fiber optic converter specifically for MGNET (including transmission of back-up alarm signal). Also suitable for remote command and control panels, remote repeater panels and printers. Maximum distance 6 km with G50 / 125 µm or G62.5 / 125 µn multimode optical fiber, ST connector. Power supply 24 VDC, absorption 35 mA @ 24 VDC, DIN rail mounting; All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 168 N.P.E 02b-LF	Supply and installation of recessed LED luminaire with microprismatic cover dim. (600 x 600 mm). The prismatic PMMA surface of the optical system has an anti-reflection effect. With concentrating wide-beam light distribution. Glare rating according to UGR < 19 classification (EN 12464-1) For environments with video terminal use according to EN 12464-1 due to limited luminances L < 3000 cd/ ² for emission angle greater than 65° in all planes. Luminaire luminous flux 3400 lm, power consumption 31.00 W, luminaire brightness 109 lm/W. Color of light warm white, color temperature (CCT) 3000 K, overall color rendering index (CRI) Ra > 80. Dimensions (W x D): 595 mm x 595 mm, luminaire height 35.5 mm. Insulation class (EN 61140): I, degree of protection (DIN EN 60529): IP20, impact resistance rating to IEC 62262: IK03, glow wire test temperature to IEC 60695-2-11 of 650 °C. Weight: 1.1 kg. With external power supply included. Reference on plan **LF02b** (corridors bathrooms/support rooms). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 169 N.P.E 02B-RI	Supply and installation of General fire terminal for alarm reporting. The terminal is a remote panel from the control panel that can optionally operate with its own power supply. The control panel provides installation locations available for optional interfaces such as RS232' RS485' network modules and key switch. Each station has an Ethernet connector to connect other terminals or a PC for remote operations/configurations. High-performance networking makes it possible to connect up to 32 between central stations and terminals. Connection to a centralized system via BACnet. Including local power supply and two 12V / 7Ah batteries. Including branch in rigid and/or flexible PVC piping from cable conduit, including junction box and completion accessories. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 170 N.P.E 02C-RI	Supply and installation of general control terminal or wall-mounted carpentry for smoke extraction systems (manual control only). The remote terminal will consist of three-position selector switches, indicator lights for operation verification, and graphic unit for managing the control of field devices. Including local power supply and two 12V / 7Ah. batteries and digital I/O module for interface to building fire detector system. Share of derivation in rigid and/or flexible PVC piping from cable conduit, junction boxes, wiring cables for component wiring (signal/energy) and completion accessories. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 171 N.P.E 03-ACP	Connection point arrangement WIFI system component placed on the wall from outside (in indoor/outdoor to the building) to be recessed on false ceiling where present composed of: - Ø25mm hollow pvc pipe (rigid or flexible depending on the placement of the device); - junction box 503 (rectangular) with protection index according to the place of installation, for insertion future RJ45 socket to be mounted inside the wall or ceiling recessed box from outside in an easily accessible position complete with protection plate; - label identifying the provision itself; All inclusive of all accessories and charges to give the device finished and functioning in a state of good working order. **euro**	a corpo	
Nr. 172 N.P.E 03-BMS	Supply and installation of active network equipment for service of the BMS control cabinet (supplied by the mechanical systems contractor) , composed mainly of: - no.1 Cisco C9200L-24P-4X-E switch - Catalyst 9200L 24-port PoE+, 4 x 10G, Network Essentials (Access Switch); - fiber-optic attestation module for single fibers from area rack cabinets (see project functional diagram for more details); - OM4 multimode optical OM4 type LC 1 mt half harnesses. Each Switch must be complete with charges and accessories such as: - dual power supplies with associated connecting cables - stack modules and cables where necessary - SFP modules for copper and fiber connection (singlemode or multimode as required by the project) - suitable support brackets - labeling - user permits Charges are included for on-site programming of the equipment according to specifications to be produced by the Customer/Control		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	System Supplier. **euro**	cadauno	
Nr. 173 N.P.E 03-CA	Outdoor push button for door opening. Supply and installation of Red mushroom button for outdoor door opening for installation near the door to be controlled. Including: - PVC pipe, flexible branded, heavy, corrugated GWT 850 °C, placed within plasterboard walls, or within false ceilings (if present in neighboring areas) in IP4X execution or alternatively rigid pvc piping GWT 960 °C, complete with fasteners and IP55 fitting; - junction box (round or rectangular) for fixing device to be mounted on ceiling/wall in easily accessible position IP55 utility-side terminal; - branch share in cable type FG16OM16 2x1.5mmq (to be verified exactly type with system manufacturer); - label identifying the arrangement itself; Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 174 N.P.E 03-CB	Supply and installation Special straight element for 5-pole DATA RACK busbar conduit with 630A rating with solid copper conductors. Heat-treated extruded aluminum outer casing and individually insulated and tinned inner conductors for the entire length. IP23D degree of protection. Pre-assembled maintenance-free one-piece type coupling and plug-in guide. Tightening to 55Nm with torque wrench. Dimensions equal to 140mmx113mm. The cross section of Neutral and protective conductor are equal to the cross section of Phases. The busbar conduit must have fire and earthquake certificates. Reference standard IEC61439-6. The conduit shall allow the installation of Plug-nPlay type junction boxes. The junction boxes must be able to be safely installed or removed from the busbar conduit in the presence of voltage and must be able to be installed or removed at any point along the conduit, outside the joints. All inclusive of all accessories and charges to give the system finished and functioning in a state of good works. **euro**	m	
Nr. 175 N.P.E 03- CL	Supply and installation of recessed wall-mounted light control point for centralized control of ordinary zone lighting fixtures. Light switching control via 2/4-button push button, with KNX/DALI (Digital Addressable Lighting Interface) protocol for local lighting fixture switching management and DALI scenario management (ON-OFF-DIMM +/-). The dimmable button must provide a controlled lighting setting between 30% and 70% of full lighting power. Realization of light control point, consisting of: - supply of No. 1 single-pole rocker switch; - Recessed pushbutton interface for KNX bus. It has 2 inputs for potential-free contacts and 2 outputs to drive LEDs. Power supply from the bus; - Supply of KNX BUS 1x2x0.8mm² LSZH transmission cable, originating from the previous KNX light point, with suitable threading pipe; Complete with all completion accessories such as (boxes,frame,plates,) device programming according to system manufacturer's instructions. **euro**	cadauno	
Nr. 176 N.P.E 03-EVAC	Fees for Preparation and delivery of documentation with specific report of the audio control unit, manuals, instructions and component certificates. Delivery of start-up document. **euro**	a corpo	
Nr. 177 N.P.E 03-FM	Supply and installation of single-phase 16A interlocked socket in IP67 outdoor execution. CEE 2P+E 2x16 A Iinterlocked socket conforming to EN60309, in IP67 outdoor execution including: - 32 mm diameter rigid pvc piping low smoke and toxic gas emission 1250 N sealing GWT 960 °C complete with fasteners and fittings, bends and elements to allow any type of route, alternatively 32 mm diameter spiral sheathing or 32 mm diameter heavy flexible pvc piping in plasterboard or masonry wall,low smoke and toxic gas emission, 750 N sealing, GWT 960 °C section of multipole cable type FG16(O)M16 (computed in dedicated chapter) including terminal junction box. - 2P+E 2x16A CEE SOCKET IP67 thermosetting resin complete with rotary disconnect switch, steel bracket interlock, outdoor containment box, accessory and completion elements. Reference on plan **EF03** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 178 N.P.E 03- FO	Single mode optical cable OS2 LC/UPC type loose monotube for indoor/outdoor with gel filler, PE sheath: 48 fibers dielectric anti-rodent reinforcement **euro**	m	
Nr. 179 N.P.E 03-HVAC	Supply and installation of precision indoor unit supply complete with : - flexible PVC piping (final downward sections from cable conduit) in IP4X execution alternatively rigid PVC piping GWT 960 °C complete with fasteners and fittings for IP55 outdoor installation execution (connection section from backbone branch to utility point) and IP55 branch box on utility side. - plastic rotary disconnector with red padlockable knob on yellow flange exposed installation complete with fixing IP55 protection degree; - realization of auxiliary signal connection between indoor unit and outdoor unit (see technical specifications manufacturer of installed		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	equipment); - realization of auxiliary signal connection (Bus) with possible centralized remote control panel; All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 180 N.P.E 03-HW/CA	Access Control Management Software License Fees to Start Access Control Management **Software License**. (To be coordinated with client in schedule phase). Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 181 N.P.E 03-HW/TVCC	Hardware Support Contract Charges Fees for starting Hardware Support Contract on PC Server with intervention within 24H (to be coordinated with client in schedule phase) **euro**	cadauno	
Nr. 182 N.P.E 03-KNX	Engineering and start-up activities for KNX/Dali Line configuration, luminosity and field presence sensor configuration, KNX Modules configuration (already quantified in dedicated chapter) and all the various devices inherent to the lighting management and control system. Programming carried out by system programmer and including software licenses, charges for constructive design of the system, for logic integration lighting control and regulation system, for programming of all modules and fixtures (including all fixtures and components connected on KNX and DALI BUSes computed in other items). All as described in the Technical Report and with the technical specifications provided in the Special Tender Specifications, including all accessories and charges necessary to give the lighting control and regulation system finished and functioning in a state of good working order. **euro**	a corpo	
Nr. 183 N.P.E 03- LF	Supply and installation of lighting fixture for installation on continuous row system composition (computed in the previous chapters). Protection class IP64, designation D according to DIN EN 60598-2-24; With PMMA lens optics; Luminous intensity distribution: very wide; Recommended installation height: 3 - 6 m; Luminaire luminous flux 21,000 lm; Power consumption 126 W; Luminaire brightness 167 lm/W; Color of light Neutral white; Correlated color temperature (CCT) 4000 K; Overall color rendering index (CRI) 80; including dimming ballast included (DALI); Reference on plan **LF03** (installation technical areas type Mep Gallery). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 184 N.P.E 03-LFE	Engineering and start-up activities for emergency lighting system configuration, central configuration, Repeater Modules configuration, lamps configuration and all the various devices inherent to the emergency lighting system in relation to the building construction phases. Programming performed by system programmer and including software licenses, charges for system construction design, system logic integration, programming of all modules and devices. All as described in the Technical Report and with the technical specifications provided in the Special Tender Specifications, including all accessories and charges necessary to give the emergency lighting system finished and functioning in a state of good working order. **euro**	a corpo	
Nr. 185 N.P.E 03-LPS	Supply and installation of air-terminated air-termination rod on insulated "V" support, suitable for insulated protection systems, arranged for insulated anchorage of air-termination ropes on walls; the fiberglass support guarantees a safety distance in air of 55 cm; the element composed of: - air-termination rod h=3.0 m made of solid aluminum alloy rod (AlMgSi), convex at the top complying with CEI EN 62305-3; - insulated "V" spacer for Ø16mm rod, introduces a safety distance in air s=0.55m, composed of two pieces of solid round GRP Ø16mm headed at the ends with aluminum lugs equipped with no.2 holes Ø10mm+nr.1 central hole Ø16mm, coupled by means of M10 stainless steel screws; - all accessories and stainless steel clamping hardware required for fixing the capturer to the wall, for connection between the different elements of the capturer and between the capturer and the other elements of the LPS system Reference on plan **T7** Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 186 N.P.E 03-MT	Supply and installation of indoor, single-pole thermal-shrink terminal with extruded insulation up to 30kV, conductor section 25-50 mm². All as visible on the project plans and with the technical specifications expressed in the "Capitolato Speciale d'Appalto." Including all wiring, braid grounding, labels, accessories and charges; all fully functional according to applicable standards. **euro**	cadauno	

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
Nr. 187 N.P.E 03-NOTE	NOTE: Included in all prices are charges for the production of as-built documentation, to be delivered to the client in triplicate hard copy and computer copy. The documentation should include the updating of all graphic design documentation, diagrams of all systems built, the typical connections used and the programming set in the power plants, certifications and approvals of the materials used together with the manufacturer's documentation. **euro**	a corpo	
Nr. 188 N.P.E 03-OC	Fees for testing of electrical systems made/equipment by a specialized "third part" company within the individual data room mainly of: (a) all LV and MV switchboard components even if not supplied (e.g. Power Module and generators); b) all power lines in cable/bar conduits even if not supplied (e.g. Power Module and generators); The detailed plan of the tests that will be performed (so called Test Plan) will be developed by the Electrical Third Party based on NETA ATS standards and submitted to the Construction Management/Contractor for review and acceptance. It is anticipated as of now that the following activities will need to be carried out (non-exhaustive list): (a) setting of all calibrations of electrical protections as per the dedicated study; (b) realization of testing of all electrical protections both MV and LV, using specific devices (e.g., primary injection); (c) realization of testing of all electrical transformers (power, TA, TV, TO); (d) realization of insulation, impedance, applied voltage, microresistance tests on the busbar systems of all electrical panels; (e) realization of insulation, impedance, applied voltage, microresistance tests on all electrical conduits; (f) realization of bolt tightening test of all electrical connections made by using certified dynamometric wrench; g) realization of thermography on all electrical connections made (both cables and busbar conduits including connections between the various pieces of conduit) to be carried out during the Commissioning operations described in the dedicated chapter; (h) realization of measurement and recording of electrical quantities by certified and Class A portable instrument, to be realized during the Commissioning operations described in the dedicated chapter; (i) realization of measurement of ground resistance; (j) realization of dedicated test for photovoltaic system interface devices; (k) production of specific reports for all the activities listed above; All charges and supports necessary for the realization of the tests on the electrical systems described above in a consistent and coordinated manner with the site activities (e.g. installation in successive phases, Power Module and generator installation, etc.) must be considered included. **euro**	a corpo	
Nr. 189 N.P.E 03-ON	Fees for installation and grounding of Load bank terminal cabinet (supply the latter excluded from this contract) near the pump room located on the ground floor outside gantry area for performing electrical equipment (UPS/Generators) testing. Included in the bid is sections of cable duct suitable to accommodate the power cables (cables computed in dedicated chapter) arriving from the relevant power module. All inclusive of all accessories/accessories/straffing and charges and consumables to give the installation finished and working in a state of good working order. **euro**	a corpo	
Nr. 190 N.P.E 03- PL	Realization of **indoor DALI light point** in exposed execution ceiling/wall/recessed, consisting of: - portion of power supply cable FG16OM16 laid in rigid and/or flexible PVC conduit - share of DALI bus backbone in cable (section specified by the manufacturer) laid in cable duct and branch from the latter with rigid and/or flexible PVC piping - PVC piping medium series rigid and/or flexible (depending on the placement of the light fixture) size 20mm ; - junction box - fittings and completion accessories All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 191 N.P.E 03- PZ	Supply and installation of CAV manhole 40x40x40cm, with concentric moldings pre-strained on the vertical walls and removable bottom composed of: - Connection gully made of precast vibrated concrete elements with side indentations for pipe inlets, placed on site including all labor and supplies for watertight connection of pipes, etc., including excavation, backfill with concrete and backfill; pedestrian, not diaphragmatic (dim.40x40x40 cm); - Inspection manhole (dimensions 40x40x40) and nominal net span: 32.5 x 32.5 cm, driveway type) made of spheroidal cast iron in accordance with UNI EN 1563 not hydraulic tightness for sidewalks, pedestrian areas, motor vehicle parking areas and multi-storey parking lots, with breaking strength greater than 125 kN complying with class B 125 of UNI EN 124 and regulation NF-110, with vertical periphery frame without protrusions and square cover with non-slip pedestrian surface and blind hole with bar for easy opening, coated with protective paint, marking showing the strength class, reference standard, manufacturer's identification and product quality mark issued by independent certification body. Assembled on site including all labor and supplies on pre-existing manhole - Extensions for vibrated manhole on site including all labor and installation for ground connection; **euro**	cad	
Nr. 192 N.P.E 03-QE	**PDU1/2.X-#-A/B/C/D/E/F** electrical switchboard. Supply and installation of electrical switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including:		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	- transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - Copper ground node and including all wiring, labels, accessories. - Including fees for special painting to RAL color defined by the Client / DL during construction. All fully functional according to current CEI regulations. **euro**	a corpo	
Nr. 193 N.P.E 03-REI	Supply and installation of restoration of the crossing of walkways / pipes on REI walls, realized by Roxtec type application or similar for high power cable passages such as Mep Gallery PDU power supply, external generators etc ..Fire-resistant product, with pre-established fracture plate, to bolt simplifying logistics and cable management, also ensuring protection from atmospheric agents before the installation of the cables themselves. Sealing modules fit different cable and pipe sizes and can be used to provide spare capacity. Together with the counterflange fixed in the rear part, it constitutes a complete fire-certified system.Restoration by crossing No. 1 cable tray or group of walkways adjacent to each other.For the precise identification of the restoration points, consult the project tablesIncluding assistance and drafting of fire prevention documentation and the compilation of the form and CERT REI certification, drawn up by a qualified technician and registered in the former register 818 as well as accessory elements of completion to give the work complete and functioning. **euro**	cadauno	
Nr. 194 N.P.E 03- RI	Fees for Configuration and Start-up Operations of Smoke Detection Systems following the installation of the new building control panels and in relation to the building construction phases envisaged in the following mode. Specific training meeting inherent to the construction site in question, concerning exclusively: - Installation and addressing devices in relation to the construction phases; -Analysis of floor plans and installation diagrams; - Provision of a dossier of supporting technical documentation. - Scheduling activities in relation to the construction phases (especially of the data rooms) at the bench based on Excel tables, provided by the system manufacturer, compiled by the site personnel and based on the scheduling logic provided by the DL or client. Scheduling activities will be started only after the delivery of said documents. - Activities related to the sizing of piping afferent to the laid suction systems for their proper functioning. Further subsequent modifications will have to be analyzed and possibly quoted separately; - On-site activities for loading programming in the central unit and in the suction systems, with verification of system functionality by sample testing as per Ch.8 standard UNI 9795 ed. December 2021; - Training course in the use of the system. **euro**	a corpo	
Nr. 195 N.P.E 03-RM	Supply and installation of field components related to the multi-operator Indoor mobile radio system consisting of: - n° 22 Omnidirectional Antenna; - n° 84 Panel antenna; - share of backbone in coaxial cable; - pipes and support junction boxes; - junction box (round or rectangular) according to the installation site, for fixing the device to be mounted on the ceiling / wall in an easily accessible position; - label identifying the predisposition itself;All as reported in the technical report of the project. Including all support accessories, fittings, equipment assembly, wiring labeling of devices. **euro**	a corpo	
Nr. 196 N.P.E 03-SOS	Supply and installation of EN62820 compliant AUDIO EMERGENCY CALL TERMINAL with 1 emergency call button and 1 standard call button - Digital version. In vandal-proof execution, DSP technology, hands-free conversations in OpenDuplex® mode with 16 Khz quality andHDVoice. Key features: - OpenDuplex® and IVC for natural hands-free communication at high volume levels; - 2 8 Ω speakers with special membrane for optimal sound quality, sound pressure 99 dB/1 W/1 m; - 16 kHz eHD Voice speech quality; - 3 mm stainless steel front panel; - Red emergency call button on blue background, CONFORMING to EN62820; - Electret microphone; - 2 alarm inputs (dry contacts); - 2 relay outputs; - Built-in 2.5W class "D" amplifier. - IP 54 and IK 07 (anti-vandalism protection) certification. Composed of: - blue mounting frame with "EMERGENCY" lettering and EN62820-compliant safety glass to protect the emergency call button for EN62820-compliant WS series call stations; - wall mounting kit: outdoor housing made of 1.5mm thick steel sheet for outdoor installation of WS Series vandal-resistant intercom stations and expansion modules - full height format. The steel sheet has a double coating treatment (cataphoretic paint and powder coating). Orange color (RAL 2004) with SOS lettering. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
Nr. 197 N.P.E 03-SPE	Supply and installation of static and seismic transversal support serving the electrical conduits inside the Data Hall in the vicinity of the rack cabinets, with placement of bracket spacing as per the project drawings. For all detailed technical specifications on the execution of the work, please refer to the Technical Report of the project (ref. bracket detail on plan "**BR01c**"). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 198 N.P.E 03-TD	Supply and installation of LC duplex optical drawer (or SC chosen at the discretion of the customer) with 72-fiber cassette adapters that can be mounted in the compartments of the unit (tot. 288 fibers can be installed) complete with multi-mode LC sockets and ceramic connectors, modular for 19" racks and all the accessories necessary to give the finished work and working in a workmanlike manner. **euro**	a corpo	
Nr. 199 N.P.E 03-TER	Realization of the main equipotential connections (EQP) as described in the Technical Report of the project (e.g. gas piping, aqueduct connection, lift guides, iron reinforcement, etc.), carried out with yellow-green FS17 conductor of section minimum 25mm2, starting from the main earth collector. Including part of the pipes and all the accessories necessary for assembly, connection with bimetallic clamp in order to guarantee good functioning. **euro**	a corpo	
Nr. 200 N.P.E 03-LFO RIBA 4	Supply and installation of outdoor pole head luminaire comprising high-efficiency lens systems in quadruple heat-resistant and UV-resistant arrangement. With asymmetrical wide-beam light distribution. For street lighting complying with M5 and M6 lighting classes with a road width to light spot height ratio of 0.4 to 0.8. LED system consisting of 18 MLT LED modules with 4 LEDs each. Luminaire luminous flux 2200 lm, power consumption 20 W. Color of light neutral white, color temperature (CCT) 4000 K, overall color rendering index (CRI) Ra > 70. Die-cast aluminum luminaire body. Anthracite color, similar metallic, high weather resistance, powder coated. With PMMA cover lens, molded. Insulation class (EN 61140): II, degree of protection (DIN EN 60529): IP66, impact resistance rating to IEC 62262: IK09. With digital dimming transformer (DALI). 10 kV overvoltage resistance. Includes: - No. 1 Die-cast aluminum fixture pole mount. - No. 1 Conical pole made of standard galvanized sheet metal work (5mt height) complete with heat-shrink sleeve mounted to the pole joint, large door for 186x46 slot and large terminal block for 186x46 slot with 1 fuse Reference on plan **LFO04** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 201 N.P.E 03A-RI	Fees for Configuration and start-up operations of smoke detection systems following the installation of the new control unit in the Fire Room premises provided in the following manner. Specific training meeting inherent to the work site in question, concerning exclusively: - Installation and addressing devices; -Analysis of floor plans and installation diagrams; - Provision of a dossier of supporting technical documentation. - Desk-based programming activities based on Excel tables, provided by the system manufacturer, compiled by site personnel and based on programming logic provided by the DL or client. Scheduling activities will be started only after the delivery of said documents. - Activities related to the sizing of piping afferent to the laid suction systems for their proper functioning. Further subsequent modifications will have to be analyzed and possibly quoted separately; - On-site activities for loading programming in the central unit and in the suction systems, with verification of system functionality by sample testing as per Ch.8 standard UNI 9795 ed. December 2021; - Training course in the use of the system. **euro**	a corpo	
Nr. 202 N.P.E 04-BMS RB4	Supply and installation of active network equipment for service of the BMS control cabinet (supplied by the mechanical systems contractor) , composed mainly of: - no.1 Cisco C9300 L-24 P-4X PoE, with modular uplink C9300-NM-4X. Uplink interfaces must be equipped with n.2 x 1Gb 850nm SFP Multi Mode Fiber to handle 1Gb capacity (Access Switch) - double fiber-optic attestation module for single fibers from area rack cabinets (see project functional diagram for more details); - n.2 OM4 multimode optical OM4 type LC 1 mt half harnesses. Each Switch must be complete with charges and accessories such as: - dual power supplies with associated connecting cables - stack modules and cables where necessary - SFP modules for copper and fiber connection (singlemode or multimode as required by the project) - suitable support brackets - labeling - user permits Charges are included for on-site programming of the equipment according to specifications to be produced by the Customer/Control System Supplier. **euro**	cadauno	

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
Nr. 203 N.P.E 04-CA	SLAVE Access Control Module Supply and installation of Slave-type Access Control Module in RS485 to be connected to a Master Controller 16 programmable Inputs. Including: - PVC pipe, flexible branded, heavy, corrugated GWT 850 °C, placed within plasterboard walls, or within false ceilings (if present in neighboring areas) in IP4X execution or alternatively rigid pvc piping GWT 960 °C, complete with fasteners and IP55 fitting; - junction box (round or rectangular) for fixing device to be mounted on ceiling/wall in easily accessible position IP55 utility-side terminal; - Custom Access Control Device Containment Box. Painted steel frame, IP54 protection, dimensions 600x400x135, Front cover via side-opening cover with universal plastic key. Panel name labeling on the front with screen printed plastic label. Box complete with protective disconnects and power supplies for electrical devices and locks. Pre-wired internal connections and pre-assembled boxes with switchboards according to design. - branch share in RS485 bus type cable for connection to master control unit (to be verified exact type with system manufacturer); - label identifying the prewiring itself; Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	a corpo	
Nr. 204 N.P.E 04-CB	Supply and installation of completion and fixing accessories for 5-pole DATA RACK busbar conduit with 630A capacity with solid copper conductors, composed mainly of: - q.b. threaded fixing brackets - q.b. aluminum closing bands for unused duct sections - q.b. end caps for end of conduit - q.b. colored sticker band, for the entire length of the ducts, for power supply identification All inclusive of all accessories and charges to give the system finished and functioning in a state of good works. **euro**	a corpo	
Nr. 205 N.P.E 04- CL	Supply and installation of wall recessed light control point for centralized control of ordinary zone lighting fixtures with intumescent protection for applications on REI compartments. Light switching control via 2/4-button pushbutton, with KNX/DALI (Digital Addressable Lighting Interface) protocol for local lighting fixture switching management and DALI scenario management (ON-OFF-DIMM +/-). The dimmable button must provide a controlled lighting setting between 30% and 70% of full lighting power. Realization of light control point, consisting of: - supply of No. 1 single-pole rocker switch; - Recessed pushbutton interface for KNX bus. It has 2 inputs for potential-free contacts and 2 outputs to drive LEDs. Power supply from the bus; - Supply of KNX BUS 1x2x0.8mm² LSZH transmission cable, originating from the previous KNX light point, with suitable threading pipe; It is included in the tender: Supply and installation of protection of electrical fruit boxes in walls (plasterboard and non-plasterboard) made by application of intumescent sheathing insertable inside a fruit box, adhering to the bottom and side walls. The restoration will ensure the degree of protection EI 120: - on flexible wall EI 120 for fire/cool side application in boxes of size 503 - on rigid wall, min. thickness 135 mm, for fire/cool side application in 503 boxes. Complete with all completion accessories such as (boxes,frame,plates,) device programming and protection certification to give the light control point finished and working in a workmanlike manner. Civil series and BTicino Light finishing plates (GE plate) to be confirmed with Architectural DL at the construction site. **euro**	cadauno	
Nr. 206 N.P.E 04-EPO	Realization of Emergency power off "EPO" system for the MIL 06.B building photovoltaic system, through the supply and installation of a "rotary" control device, protected against accidental actuation to be positioned inside the Back Security MIL L6B Building room. At the service of the plant you will have to act as reported: - button drive Release energy photovoltaic system that will intervene on inverters 1/2/3/4; Each control circuit must be equipped with a circuit integrity signal. For the emergency control systems of the system in question, a wall-mounted switchboard suitable to contain the required cutting devices must be provided. It is included in the offer PVC pipes under wall track (visible in the presence of technical rooms), supply of cables FTG18OM16 2x1.5mmq, from the installation point of the release command to the connection point of the user to be released. For details of the required links, see the dedicated table on the Technical Report of the project. Including all wiring, labels, accessories and charges; all perfectly finished in a workmanlike manner and working according to current legislation. **euro**	a corpo	
Nr. 207 N.P.E 04-EVAC	Supply and installation of Acoustic speaker for recessed installation in false ceiling of circular type with low visual impact (Frameless), 100 V, with power setting from 12-6-3 W, certified according to EN 54-24. Made of ABS-type self-extinguishing V0 plastic material and microperforated aluminum sheet speaker protection. Coaxial 2-way 6.5" speaker, linear audio transformer for connection with 100 V constant voltage audio lines. Complete with thermal over-temperature line protection fuse and connection terminals of ceramic type. Recessed hole diameter 165 mm. Dimensions: Ø190.5 x H95mm.		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	Weight: 1kg. Color: B white Reference to layout **CD02** All accessories and expenses to make the device finished and functioning in a state of the art are included. **euro**	cadauno	
Nr. 208 N.P.E 04- FV- RIBA 4	Supply and installation of photovoltaic system on building roof for a capacity of about 290 kWp composed of: - No. 670 monocrystalline silicon panels class 0 - 450KWp each (301,5 KWp total); - No. 6 c,c,/c,a conversion units, (inverters) 50kW and n°2 Inverter Manager; - dc-side switchboards; - Remote control power production control unit for photovoltaic system; - supply of all materials such as FG21M21/H1Z2Z2-K type electrical cables complying with photovoltaic industry standards, string wiring, inverter, fixing supports including ballasts for panel support installation attachment; - Interface device for net metering to be placed on the MV receiving panel; - Production meter connection device to be placed on the roof of the DB-FTV.B-0-1 switchboard; - Charges for drafting administrative management/development paperwork with the Manager; - Commissioning (post endorsement/checks/operator checks); - Release button to be placed according to the instructions of the Fire Authority referent (see quantification and plant function in the dedicated chapter); - charges and accessories to give the system finished and functional according to the rule of art; All as described within the project technical specifications. **euro**	a corpo	
Nr. 209 N.P.E 04- HVAC	Supply and installation of ceiling fancoil indoor unit supply point including : - 25 mm diameter pvc heavy flexible piping in plasterboard or masonry wall,low smoke and toxic gas emission , 750 N seal , GWT 960 °C alternatively 25 mm diameter rigid pvc piping low smoke and toxic gas emission 1250 N seal , GWT 960 °C complete with fasteners and fittings, bends and elements to allow any type of path, or 25 mm diameter spiral sheathing; - IP55 plastic metal junction box on utility side complete with DIN bar, 0/1 local disconnector,230V transformer and accessories according to the specifications of the supplier of the control unit; - share part stretch from the main backbone to the final user point of multi-core cable type FG16OM16, 0.6/1 kV section 3x2.5 sq. mm for connection of solenoid valves, room probe; - Portion of part of BUS cable section (RS485,or AWG shielded cables) (according to the indication of the supplier of the regulation unit and represented in the table of mechanical systems) from the backbone to the fan coil controller in the field. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 210 N.P.E 04- HW.IT	Supply and installation of active network equipment for the cabinet called "MEP GALLERY Xa - RK. A/B-x-1" , composed mainly of: - n.2 Cisco C9500-48Y4C-A switch - Catalyst 9500 48-port x 1/10/25G + 4-port 40/100G, Advantage (Distribution Switch); Each Switch must be complete with charges and accessories such as: - double power supply with relative connection cables - stack modules and cables where needed - SFP modules for copper and fiber optic connection (single mode or multimode as required by the project) - suitable support brackets - labelling - user licenses This includes charges for on-site programming of the equipment according to the specifications that will be produced by the Customer. **euro**	a corpo	
Nr. 211 N.P.E 04- HW/CA	AC License for Milestone Single Door Integration. Fees to start up AC License x Milestone Single Door Integration (to be coordinated with client in schedule phase). Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 212 N.P.E 04- HW/TVCC	Video Surveillance System Management Server Supply and installation of Video Surveillance System Management Server. Pc RACK 19' format with dual power supply. Minimum requirements i7 processor, 16GB RAM, 2x240GB RAID1 SSD, 2x4TB RAID1 SSD, Windows Server 2019, 2 Gigabit Network Cards. Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 213 N.P.E 04- LF	Supply and installation of lighting fixture for installation on continuous row system composition (computed in previous chapters). Protection class IP64, designation D according to DIN EN 60598-2-24; With PMMA lens optics; Luminous intensity distribution: wide; Recommended installation height: 4 - 8 m; Luminaire luminous flux 15,800 lm; Power consumption 89 W; Luminaire brightness 178 lm/W; Color of light Neutral white; Correlated color temperature (CCT) 4000 K; Overall color rendering index (CRI) 80; With ballast, dimming included (DALI); Reference on plan **LF04** (Data Hall premises installation).		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 214 N.P.E 04-LFE	Supply and installation of LED emergency lighting fixture for escape route indication (equipped with asymmetric lens) for ceiling-mounted installation with the following characteristics: - System type: (autonomous with centralized supervision) - Autonomy: 1h - Type: SE (Emergency Only, not permanent) - Minimum luminous flux in emergency (EN 60598-2-22): 580lm - Battery: Li-FePO4 9.6V 1.5Ah - Battery type: Lithium iron phosphate - Battery recharge time: 12h - Battery status: warning if battery not connected - Power supply: 230Vac - Power consumption with charged battery: 1.0W - Insulation class: II - Degree of protection: IP65 (spotlight), IP20 (electronic module) - Operating temperature: 0°C to +40°C - Color: White - RAL 9003 - Conforms to European standards: EN 60598-1, EN 60598-2-22, EN 61347-1, EN 61347-2-7, EN 61347-2-13, EN 62031, EN 62384 - Photobiological risk free according to EN 62471 - Installation: surface mounted with dedicated accessory included - Warranty 5 years Reference on plan **LFE01a** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 215 N.P.E 04-MT	Supply and installation of indoor crimp type heat shrink terminals, with double hole for double bolt connection, single-pole with extruded insulation up to 30kV, conductor section 70-300 mm². All as shown on the project plans and with the technical specifications expressed in the "Capitolato Speciale d'Appalto" Including all wiring, braid grounding, labels, accessories and charges; all fully functional according to applicable standards. **euro**	cadauno	
Nr. 216 N.P.E 04-ON	Fees for production charged to the Electrical Installations Contractor for the preparation of calculation documents including:: - Electrical network analysis; - Study of the selectivity of electrical systems; - Analysis of arc energy in case of short circuit "Arc-Flash Study"; All of the above as better indicated in the technical specifications in the "Electrical Installations Technical Report" document. **euro**	a corpo	
Nr. 217 N.P.E 04-QE	**DB-MG/DH.X-#-1/2** electric switchboard. Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 218 N.P.E 04- RI	Supply and installation of Serial Server for connecting equipment with serial line on 10 / 100 M Ethernet network, equipped with 1 RS422 / 485 serial port and 1 RS232 port. Needs power supply 12 - 48 Vac. Note: The model may vary depending on the characteristics of the proprietary BMS system. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 219 N.P.E 04-SOS	Fees for engineering, programming and commissioning of the SOS intercom system. Including intercom server programming and any charges for circuit tapping and partial mothballing/programming, Impedance and ground fault check of self-speaker lines. Functional verification of all equipment in the field On-site instruction of personnel in charge of operation and maintenance. **euro**	a corpo	
Nr. 220	Supply and installation of static and seismic transversal support to serve the electrical conduits inside the Mep Gallery (ground

N.P.E 04-SPE	floor area), with placement of bracket spacing as per the graphic design drawings. For all detailed technical specifications on the execution of the work, please refer to the Technical Report of the project (ref. bracket detail on plan "**BR03**"). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 221 N.P.E 04-TER	Realization of the secondary equipotential connections (EQS) as described in the Technical Project Report (e.g. all the water pipes entering the bathrooms, the equipment support grilles, raised floor support feet, all the joints between metal walkways, etc.) , carried out with yellow-green FS17 conductor of section minimum 4 sq. mm, starting from the manifold located inside the reference electrical panel. Including part of the pipes and all the accessories necessary for assembly, connection with bimetallic clamp in order to guarantee good functioning. **euro**	a corpo	
Nr. 222 N.P.E 04-TVCC	IP Speed Dome Camera placed in outdoor area of the Building on pole. Supply and installation of Megapixel 1080p@30fps Autotracking Starlight Day/Night Sensor IP Speed Dome Camera - Motorized PTZ with 45x Optical Zoom and 16x Digital Zoom - Sensitivity 0.005 lux - Integrated video analysis functions with artificial intelligence algorithms- H.265+/H.265+/H.264 compression- ONVIF Profile S Certified- Preset groups, Autoscan between two points - Rotation speed 360 degrees per second - Complete with integrated high power IR Illuminators up to 200m. Operating temperature range -40° +70° - Power supply 2AC 24 V / 3 A, PoE+ (802.3at) (220V/24 power supply included). Includes: - Speed Dome Kit - Outdoor JunctionBox capacity to contain FibraConverter and power supply - Wall bracket and pole collar; - containment box C.T.E. consists of a junction box containing: local switch (to allow safe maintenance), single-phase type II arrester, fuse, 230V/24V Transformer, Media Converter (the latter included in the supply) including fiber optic cable and its attestation according to the system supplier's indication; - PVC pipe, flexible branded, heavy, corrugated GWT 850 °C, or alternatively rigid pvc piping GWT 960 °C, complete with IP67 fasteners and fittings; - junction box (round or rectangular) for fixing device to be mounted on pole in easily accessible position IP67 utility-side terminal; - branch share in power/data cable (computed in dedicated chapter); - label identifying the arrangement itself; Reference on plan **SD11** Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 223 N.P.E 04A-FO	Attestation of fiber optic cable and relative certification on LC or SC connector, this excluded, for single fiber: 6 fibers **euro**	cadauno	
Nr. 224 N.P.E 04A-HVAC	Supply and installation of distributor supply point for indoor ceiling units including : - heavy flexible pvc piping diameter 25 mm in plasterboard or masonry wall,low smoke and toxic gas emission , sealing 750 N , GWT 960 °C alternatively rigid pvc piping diameter 25 mm low smoke and toxic gas emission sealing 1250 N , GWT 960 °C complete with fasteners and fittings, bends and elements to allow any type of path, or spiral sheathing diameter 25 mm; - IP55 plastic metal junction box on utility side complete with DIN bar, 0/1 local disconnector,230V transformer and accessories according to the specifications of the supplier of the control unit; - share part stretch from the main backbone to the end user point of multi-core cable type FG16OM16, 0.6/1 kV section 3x2.5 sq. mm for connection of solenoid valves, room probe; - part share of stretch of BUS cable (RS485,or AWG shielded cables) (according to the indication of the supplier of the regulation unit and represented in the table of mechanical systems) from the backbone to the fan coil controller in the field. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 225 N.P.E 04a-LF	Supply and installation of wire cover for continuous row system suitable for use in continuous row applications with IP20 and IP64 protection rating. Made of PVC, color gray silver. Length of the wire cover: 2211.5 mm. The following component is used for installation of LF04/LF03 light fixture (the former computed in dedicated section). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 226 N.P.E 04a-LFE	Supply and installation of LED emergency lighting fixture for indication of escape routes (equipped with asymmetric lens) for ceiling installation on ceiling including accessories for bracketing on light duct with the following characteristics: - System type: (autonomous with centralized supervision) - Autonomy: 1h - Type: SE (Emergency Only, not permanent) - Minimum luminous flux in emergency (EN 60598-2-22): 580m - Battery: Li-FePO4 9.6V 1.5Ah - Battery type: Lithium iron phosphate - Battery charging time: 12h - Battery status: warning if battery not connected - Power supply: 230Vac		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	- Power consumption with charged battery: 1.0W - Insulation class: II - Degree of protection: IP65 (spotlight), IP20 (electronic module) - Operating temperature: 0°C to +40°C - Color: White - RAL 9003 - Conforms to European standards: EN 60598-1, EN 60598-2-22, EN 61347-1, EN 61347-2-7, EN 61347-2-13, EN 62031, EN 62384 - Photobiological risk free according to EN 62471 - Installation: surface mounted with dedicated accessory included - Warranty 5 years Adapter allowing attachment to electrified track is included. Reference on plan **LFE01b** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 227 N.P.E 04b-LF	Supply and installation of Joint Gasket for continuous row applications. Made of plastic material, silver gray color. The following component is used for the installation of LF04/LF03 light fixture (the former computed in dedicated section). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 228 N.P.E 04c-LF	Supply and installation of Carrier profile for single luminaires for continuous row IP64 LED or continuous row end elements. Length of the supporting profile: 2258 mm. With two 7-pin plug-socket pairs for quick electrical connection and cable end closure with protection against accidental contact. The heat-resistant feed-through wiring is made already at the factory complete with all required components. The following component is used for the installation of LF04/LF03 light fixture (the former computed in dedicated section). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 229 N.P.E 04d-LF	Supply and installation of Carrier profile for continuous row application IP64 LED. Length of the carrier profile: 4471 mm. With two 7-pin spinner pairs for quick electrical connection and cable end closure with protection against accidental contact. The heat-resistant feed-through wiring is made already at the factory complete with all required components. The following component is used for the installation of LF04/LF03 light fixture (the former computed in dedicated section). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 230 N.P.E 04e-LF	Supply and installation of Transparent cover for continuous row applications in reference to linear profile 2258mm The following component is used for the installation of LF04/LF03 light fixture (the former computed in dedicated section). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 231 N.P.E 04f-LF	Supply and installation of Transparent Cover for continuous row applications with reference to linear profile 4471mm. The following component is used for the installation of LF04/LF03 light fixture (the former computed in dedicated section). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 232 N.P.E 04g-LF	Supply and installation of fixing accessory for direct ceiling mounting of the continuous rows mentioned in the previous chapters. The following component is used for the installation of LF04/LF03 light fixture (the former computed in dedicated section). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 233 N.P.E 04h-LF	Supply and installation of End Head as an application terminal element for continuous row IP64 LED. The following component is used for installation of LF04/LF03 light fixture (the former computed in dedicated section). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 234 N.P.E 04i-LF	Supply and installation of Pair of 7-pole plug-socket for electrical connection of feed-through wiring for LED continuous rows. The following component is used for the installation of LF04/LF03 light fixture (the former computed in dedicated section). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 235 N.P.E 05-CA	Access control unit Supply and installation of Access Control Unit for maximum management of 4 single reader doors and/or 2 double reader doors with the following features: 4 Wiegand inputs, 4 Relays, 8 TTL inputs, 8 TTL outputs, 4 RS485 ports for door readers. 12VDC power supply. LAN communication/programming port. RS485 auxiliary port for communication/control of Slave devices on		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	BUS. Includes: - PVC pipe, flexible branded, heavy, corrugated GWT 850 °C, placed within plasterboard walls, or within false ceiling (if present in neighboring areas) in IP4X execution or alternatively rigid pvc piping GWT 960 °C, complete with IP55 fasteners and fittings; - junction box (round or rectangular) for fixing device to be mounted on ceiling/wall in easily accessible position IP55 utility-side terminal; - Customized Access Control Device Containment Box. Painted steel frame, IP54 protection, dimensions 600x400x135, Front cover via side-opening lid with universal plastic key. Panel name labeling on the front with screen printed plastic label. Box complete with protective disconnects and power supplies for electrical devices and locks. Pre-wired internal connections and pre-assembled boxes with switchboards according to design. - branch share in RS485 bus-type cable for series connection with other control units (to be verified exact type with system manufacturer); - label identifying the prewiring itself; Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	a corpo	
Nr. 236 N.P.E 05-CB	Supply and installation of Plug-nPlay type tap-off to be installed on busbar, composed of: - n.1 tap-off for 5-pole DATA RACK busbar - n.1 breaker circuit breaker 4P 32A curve "C" 10kA, equipped with auxiliary contact for status signaling / tripped - n.1 IEC 3P+N+T 32A IP44 socket - n.1 removable connector for input/output BUS to the other measurement modules installed on the branch plugs from busbar conduit (the removable connector must allow the removal of a box from the BUS, while ensuring the operation of the rest of the system - n.1 current measurement module with no.4 fast inputs for CT connection, with advanced current analysis functions - n.4 closed toroidal CTs with current rating 63A - q.b. internal power, auxiliary and communication wiring, disconnection and protection devices, etc. - wiring auxiliary contact switch on digital input current measurement module It is specified that the measurement modules and protection switch should be visible at the front of the box in order to allow verification of proper operation Included are charges for programming of all installed components, to be carried out on site to allow proper communication with the supervisory system. All inclusive of all accessories and charges to give the tap-off installed, finished and functioning in a state of good works. **euro**	cadauno	
Nr. 237 N.P.E 05- CL	Supply and installation of Automatic recessed ceiling light control point via KNX presence and brightness sensor with the following features: PIR presence and motion sensor with built-in brightness controller and IR receiver. Possibility of continuous and threshold brightness control with built-in KNX interface. Adjustment range 1...1000 lux for recessed ceiling mounting (2.5..10m). Operating range 360° horizontal, 60° vertical. Presence detection range up to 64sqm, motion up to 400sqm. Features three control channels each with four actions for presence detection. Sensitivity and sectorization of detection settable. Features built-in temperature probe and controller (0..50° C). Includes: - q.p. BUS KNX 1x2x0.8mm² LSZH transmission cable, originating from the previous KNX light point, with suitable threading pipe; - rigid and/or flexible PVC piping and completion accessories and including junction box; Complete with all accessories and charges necessary to make the light control point with KNX presence and brightness detector finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 238 N.P.E 05-EVAC	Supply and installation of Acoustic speaker for wall-mounting circular shape with bracket for fixing EN54-24 certified, with metal junction box, with separate ceramic terminals IN/OUT, thermal fuse 1 way bi cone wide band, 10-5-2.5 W , with transformer 100V or 70V sensitivity at W=1 m=1- 160 Hz-8 Khz - useful 92 dB, maximum useful power 10 W rms 102 dB, frequency response 240-20,000 Hz directivity in degrees 100° x 100° . Dimensions: Ø 184 x H 137.5 mm. Reference to layout **CD01** All accessories and expenses to make the device finished and functioning in a state of the art are included. **euro**	cadauno	
Nr. 239 N.P.E 05-FM	Supply and installation of IP65 outdoor service outlet point, consisting of: - No. 1 box for exposed wall-mounting for 3-person modular fixtures - No. 1 3-place socket cover with transparent spring cover IP65 - no. 1 UNEL 10/16A multistandard socket - n°1 power outlet 2-pin 10/16A - n°1 section of rigid pvc pipe diam. 25mm laid exposed to the wall, threading with FS17 2.5mmq conductors, and terminal section in sheathing up to the junction box in inspectable point of the false ceiling (this included). - Portion of backbone in FG16OM16 cable as per the single-line diagrams; Reference on plan **EF05** Complete with IP65 fittings and all accessories and charges necessary to give the IP65 outlet point finished and in working order **euro**	a corpo	
Nr. 240	Attestation of fiber optic cable and relative certification on LC or SC connector, this excluded, for single fiber: 36 fibers

N.P.E 05- FO	**euro**	cadauno	
Nr. 241 N.P.E 05- HVAC	Supply and installation of outdoor unit supply point including : - rigid PVC piping complete with fasteners and fittings; - IP65 terminal junction box; - plastic rotary disconnector with red padlockable knob on yellow flange exposed installation complete with fasteners. IP 65 degree of protection - section of conduit in multi-core cable insulated with high modulus ethylpropylene rubber of G16 quality, under special thermoplastic sheath of M16 quality, halogen-free, fire-propagating and low smoke development, type FG16(O)M16 section computed in dedicated chapter; (connection section from backbone branch to user point); - realization of auxiliary signal connection between indoor unit and outdoor unit (see technical specifications manufacturer of installed equipment); - realization of auxiliary signal connection (Bus) with centralized remote control panel; - connecting pipeline to indoor unit, including Ac-Zn pipeline for outdoor distribution, IP65 degree of protection; All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 242 N.P.E 05- HW.IT	Supply and installation of active network equipment for the cabinet called "MEP GALLERY Xa - RK. A/B-x-2" , composed mainly of: - n.2 Cisco C9500-48Y4C-A switch - Catalyst 9500 48-port x 1/10/25G + 4-port 40/100G, Advantage (Distribution Switch); Each Switch must be complete with charges and accessories such as: - double power supply with relative connection cables - stack modules and cables where needed - SFP modules for copper and fiber optic connection (single mode or multimode as required by the project) - suitable support brackets -labelling - user licenses This includes charges for on-site programming of the equipment according to the specifications that will be produced by the Customer. **euro**	a corpo	
Nr. 243 N.P.E 05- HW/CA	AC License x integration Milestone license Base Fees for startup AC License x Base license Milestone integration (to be coordinated with client during schedule phase). Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 244 N.P.E 05- HW/TVCC	NAS system for archiving recordings Supply and installation of NAS System for record storage (**Specifications 90g). 12 Slot module for RAID10 disks and 2 network cards. 19' RACK format with Dual Power Supply. Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 245 N.P.E 05- LF	Supply and installation of round ceiling recessed fixture dim. Ø 228 mm, Recessed depth 45 mm. With PMMA opal cover plate. With symmetrical wide beam light distribution. Luminaire luminous flux 1800 lm, power consumption 24.00 W, luminaire brightness 75 lm/W. Color of light warm white, color temperature (CCT) 3000 K, general color rendering index (CRI) Ra > 80. Die-cast aluminum luminaire body. White (RAL 9016) powder-coated wire cover ring. External dimensions of cover ring Ø 240 mm, luminaire height 24 mm. Allowable ambient temperature (ta): - +25 °C. Insulation class (EN 61140): II, Degree of protection (DIN EN 60529): IP20, Degree of protection towards the room: IP44, Degree of impact resistance to IEC 62262: IK05. With external power supply included. Reference on plan **LF05** (installation bathroom type areas). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 246 N.P.E 05- LFE	Supply and installation of LED emergency lighting fixture for escape route indication (equipped with asymmetric lens) for recessed ceiling installation with the following characteristics: - System type: (autonomous with centralized supervision) - Autonomy: 1h - Type: SE (Emergency Only, not permanent) - Minimum luminous flux in emergency (EN 60598-2-22): 580lm - Battery: Li-FePO4 9.6V 1.5Ah - Battery type: Lithium iron phosphate - Battery recharge time: 12h - Battery status: warning if battery not connected - Power supply: 230Vac - Power consumption with charged battery: 1.0W - Insulation class: II - Degree of protection: IP65 (spotlight), IP20 (electronic module)		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	- Operating temperature: 0°C to +40°C - Color: White - RAL 9003 - Conforms to European standards: EN 60598-1, EN 60598-2-22, EN 61347-1, EN 61347-2-7, EN 61347-2-13, EN 62031, EN 62384 - Photobiological risk free according to EN 62471 - Installation: recessed - garantee 5 years Reference on plan **LFE02** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 247 N.P.E 05- PL	Realization Point of light for fixtures placed recessed in ceiling/wall or ceiling mounted for **emergency lighting** equipped with battery kit inverter on board of lamp and supervised by centralized diagnostic center. Realization of emergency light point in exposed execution for emergency luminaires, consisting of: - derivation share in FG16OM16 normal/preferential energy cable (section specified on the wiring diagrams) laid in cable duct and derivation from the latter with rigid and/or flexible PVC piping; - branch share in 2x0.5 mm2 twisted and shielded RS485 bus cable for communication with centralized diagnostic zone control unit; - PVC piping medium series rigid and/or flexible (depending on the placement of the light fixture) diamento 20mm ; - junction box - fittings and completion accessories All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 248 N.P.E 05- RI	Supply and installation of 24 VDC 2.5 A power supply unit. CE CPD EN54-4, A1 and A2 certified. Max. allocable battery 2 x 17 Ah 12 V. Current available for external loads 2 A distributed over two outputs. Metal case included (W355 x H375 x D110 mm). Relay outputs for general fault and power failure. Connector for connection of TLC maintenance instrument. Composed of: - No. 2 12 V 18 Ah sealed lead-acid battery. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 249 N.P.E 05- SPE	Supply and installation of static and seismic transversal support to serve the electrical conduits inside the Mep Gallery (first floor area), with placement of bracket spacing as per the graphic design drawings. For all detailed technical specifications on the execution of the work, please refer to the Technical Project Report (ref. bracket detail on plan "**BR04**"). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 250 N.P.E 05- TER	Supply and installation of equipotential bonding plate with copper plate, with shockproof plastic cover, nickel-plated brass terminal block, connections for 8÷10 mm diameter rod and 131x50x5mm plate, including all installation accessories. **euro**	a corpo	
Nr. 251 N.P.E 05- TVCC	Pre-arrangement for future Dome Camera Realization of prearrangement point for future Dome Camera installed in the false ceiling including: - PVC pipe, flexible branded, heavy, corrugated GWT 850 °C, placed within plasterboard walls, or within false ceiling (if present in the neighboring areas) in IP4X execution or alternatively rigid pvc piping GWT 960 °C, complete with fixing elements and IP55 fitting; - junction box (round or rectangular) for fixing device to be mounted on ceiling/wall in easily accessible position IP55 utility-side terminal; - label identifying the arrangement unit itself; Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	a corpo	
Nr. 252 N.P.E 05A- QE	**DB-CA.B-0-1** electric switchboard. Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 253	Magnetic contact on door		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
N.P.E 06-CA	Supply and installation of Magnetic contact made of high-strength die-cast aluminum for installation on doors made of ferromagnetic and non-ferromagnetic materials.Terminal connection for alarm and tamper contact. Approval IMQ EN50131-2-6 grade 2 environmental class II. Includes: - PVC pipe, flexible marked, heavy, corrugated GWT 850 °C, placed within plasterboard walls, or within false ceilings (if present in neighboring areas) in IP4X execution or alternatively rigid pvc piping GWT 960 °C, complete with IP55 fasteners and fittings; - junction box (round or rectangular) for fixing device to be mounted on ceiling/wall in easily accessible position IP55 utility-side terminal; - branch share in cable for burglar alarm systems multipolar anti-fire type shielded 2x0.50+4x0.22 mm² incoming from zone access control unit (to be verified exact type with system manufacturer); - label identifying the arrangement itself; Complete with every charge to give the component finished and functioning in a state of good working order **euro**	a corpo	
Nr. 254 N.P.E 06-EVAC	Supply and installation of acoustic diffuser with folded horn of rectangular section, container made of self-extinguishing ABS conforming to UL94V0, with fixing bracket. Diffuser certified EN54 - 24 Degree of protection IP66. Light gray color. 100V - power settable at 7.5-15.30W rms. Impedances :333- 666-1,333 ohms sensitivity at W=1 m=1- 160 Hz-8 Khz - useful maximum usable power at 30 W rms - 120.2 dB SPL frequency response [Hz] 350-10,000 Hz dispersion angle in degrees Orizz (H) 110° x Vert (V) 55° . Dimensions H 115 x W 180 x D 235 Reference to layout **CD03** All accessories and expenses to make the device finished and functioning in a state of the art are included. **euro**	cadauno	
Nr. 255 N.P.E 06-FM	Supply and installation of Disabled toilet alarm system as follows: - Disabled station with pull button; - internal signaling panel with bistable relay; - reset button and green tranquilization gem in recessed box; - External signaling panel consisting of red light gem, buzzer in recessed box 503. Including share of final power supply backbone in FG16OM16 cable (section specified on wiring diagrams) and branch,rigid and/or flexible PVC piping, branch box, fittings and completion accessories. Floor plan reference **EF04** - **EF06** - **EF07.** Complete with IP65 fittings and every accessory and charge necessary to give the IP65 outlet point finished and in working order **euro**	a corpo	
Nr. 256 N.P.E 06- FO	Attestation of fiber optic cable and relative certification on LC or SC connector, this excluded, for single fiber: 48 fibers **euro**	cadauno	
Nr. 257 N.P.E 06-HVAC	Supply and installation of Fanwall air conditioning unit supply point including : - rigid PVC piping GWT 960 °C complete with fasteners and fittings; - IP65 terminal junction box; - plastic rotary disconnector with red padlockable knob on yellow flange exposed installation complete with fasteners. IP 65 degree of protection - section of multi-core cable conduit insulated with high modulus ethylpropylene rubber of G16 quality, under special thermoplastic sheath of M16 quality, halogen-free, fire retardant and low smoke development, type FG16(O)M16 section computed in dedicated chapter; - realization of the connections to the BMS system of the field elements of regulation and control (states, alarms, consents); - realization of series connections between adjacent machines by means of LAN cable (see specific imp.mechanics for more details); - realization of all auxiliary connections via bus cable and communication with the remaining fanwalls of the belonging system (to be verified with equipment manufacturer); All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 258 N.P.E 06-HW/TVCC	Hard Disk 16TB Supply and Installation of Hard Disk 16TB PRO3.5 Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 259 N.P.E 06-LFE	Supply and installation of LED emergency lighting fixture for anti-panic area indication (equipped with symmetric lens) for recessed ceiling installation with the following characteristics: - Optics: standard heights - System type: (autonomous with centralized supervision) - Autonomy: 1h - Type: SE (Emergency Only, not permanent) - Minimum luminous flux in emergency (EN 60598-2-22): 340lm - Battery: Ni-Cd 4.8V 1.4Ah		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	- Battery type: Nickel cadmium - Battery recharge time: 12h - Battery status: indication if battery not connected - Power supply: 230Vac - Power consumption with charged battery: 0.8W - Insulation class: II - Degree of protection: IP42 (from below), IP20 (from above) - Degree of protection against mechanical impact: IK07 - Operating temperature: 0°C to +40°C - Color: White - RAL 9003 - Complies with European standards: EN 60598-1, EN 60598-2-22, EN 61347-1, EN 61347-2-7, EN 61347-2-13, EN 62031, EN 62384 - Complies with RoHS2 2011/65/EU - Installation: recessed, Reference on plan **LFE03** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 260 N.P.E 06-LPS	Supply and installation of rod captator (h=2.0+0.75m) made of solid aluminum alloy rod (AlMgSi), convex at the top and equipped with M16 thread, complying with CEI EN 62305-3 standard, connected to the structure to be protected by means of No. 2 inclined GRP arms that guarantee a safety distance s=55 cm. The item includes all stainless steel clamping for attaching the rod to the metal parapet and connecting it to the other elements of the LPS system. Reference on plan **T9** Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 261 N.P.E 06-PL- RIBA 4	Realization of **outdoor DALI light point** in exposed execution ceiling/wall/recessed, consisting of: - portion of power supply cable FG16OM16 laid in rigid and/or flexible PVC conduit - share of DALI bus backbone in cable (section specified by the manufacturer) laid in cable duct and branch from the latter with rigid and/or flexible PVC piping - PVC piping medium series rigid and/or flexible IP65 (depending on the placement of the light fixture) size 20mm ; - junction box IP65 - fittings and completion accessories All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 262 N.P.E 06- RI	Supply and installation of 24 VDC 5 A power supply unit. CE CPD EN54-4, A1 and A2 certified. Max. 2 x 17 Ah 12 V allocable battery. Current available for external loads 4 A distributed over two outputs. Metal enclosure included (W355 x H375 x D150 mm). Relay outputs for general fault and power failure. Connector for connection of TLC maintenance instrument. Composed of: - No. 2 12 V 27 Ah sealed lead-acid battery. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 263 N.P.E 06-SPE	Supply and installation of static and seismic transversal support serving the electrical conduits present on the outside of the building near the facade (coming from the Power Module in the direction of the mep gallery/cover), with placement of bracket spacing as per the project drawings. For all detailed technical specifications on the execution of the work, please refer to the Technical Project Report (ref. bracket detail on plan "**BR06b**"). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 264 N.P.E 06-TVCC	Pre-arrangement for future 360° Indoor Camera Realization of prearrangement point for future 360° Indoor Camera including: - PVC pipe, flexible branded, heavy, corrugated GWT 850 °C, placed within plasterboard walls, or within false ceiling (if present in the neighboring areas) in IP4X execution or alternatively rigid pvc piping GWT 960 °C, complete with fixing elements and IP55 fitting; - junction box (round or rectangular) for fixing device to be mounted on ceiling/wall in easily accessible position IP55 utility-side terminal; - label identifying the arrangement itself; Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	a corpo	
Nr. 265 N.P.E 06A-CL	Supply and installation of Ceiling-mounted automatic light control point by KNX presence and brightness sensor + hanging bracket accessory (corridors at great heights) with the following features: PIR presence and motion sensor with built-in brightness controller and IR receiver. Possibility of continuous and threshold-based brightness control with built-in KNX interface. Adjustment range 1...1000 lux for recessed ceiling mounting (2.5..10m). Operating range 360° horizontal, 60° vertical. Presence detection range up to 64sqm, motion up to 400sqm. Features three control channels each		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	with four actions for presence detection. Sensitivity and sectorization of detection settable. Features built-in temperature probe and controller (0..50° C). IP54 degree of protection. To be associated with the device relative housing for projecting mounting. Includes: - q.p. BUS KNX 1x2x0.8mm² LSZH transmission cable, originating from the previous KNX light point, with suitable threading pipe; - rigid and/or flexible PVC piping and completion accessories and including junction box; - support bracket for sensor anchorage to ceiling cable duct; Complete with all accessories and charges necessary to make the light control point with KNX presence and brightness detector finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 266 N.P.E 06A-QE	**DB-CA.B-0-2** electric switchboard. Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 267 N.P.E 07-CA	Mini curtain detector Supply and installation of Mini curtain detector with dual technology for doors or windows, the digital sensor is dual element and has circuitry made in SMT technology, to ensure greater stability in use, and greater immunity to electromagnetic interference. Including: - PVC pipe, flexible branded, heavy, corrugated GWT 850 °C, placed within plasterboard walls, or within false ceilings (if present in neighboring areas) in IP4X execution or alternatively rigid pvc piping GWT 960 °C, complete with IP55 fasteners and fittings; - junction box (round or rectangular) for fixing device to be mounted on ceiling/wall in easily accessible position IP55 utility-side terminal; - branch share in cable for multi-pole alarm systems burglar alarm type shielded type 2x0.50+4x0.22 mm² incoming from zone access control unit (to be verified accurate type with system manufacturer); - label identifying the arrangement itself; Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	a corpo	
Nr. 268 N.P.E 07-CB RIBA 4	Supply and installation of Plug-nPlay type tap-off to be installed on busbar for Security Cabinet, composed of: - n.1 tap-off for 5-pole DATA RACK busbar - n.2 breakers magnetothermal 2P 16A curve "C" 10kA, equipped with auxiliary contacts for status signaling / tripped - n.2 IEC 1P+N+T 16A IP44 sockets - n.1 removable connector for input/output BUS to the other measurement modules installed on the branch plugs from busbar conduit (the removable connector must allow the removal of a box from the BUS, while ensuring the operation of the rest of the system - n.2 current measurement module with no.4 fast inputs for CT connection, with advanced current analysis functions - n.1 I/O module with no.4 inputs and no.2 outputs - n.2 closed toroidal CTs with 16A rated current - q.b. internal power, auxiliary and communication wiring, disconnection and protection devices, etc. - Wiring of n.2 auxiliary contacts switches on no.2 digital inputs I/O module It is specified that the measurement modules and protection switch shall be visible at the front of the box in order to allow verification of proper operation Included are the charges for programming of all installed components, to be carried out on site in order to allow correct communication with the supervisory system. All inclusive of all accessories and charges to give the tap-off installed, finished and functioning in a state of good works. **euro**	cadauno	
Nr. 269 N.P.E 07- CL	Supply and installation of Automatic Light Control Point to be placed on light conduit via KNX presence and brightness sensor with the same features and supproto components as the products mentioned above. It is included in the tender adapter that allows attachment on electrified track + supply of BUS KNX transmission cable 1x2x0,8mm² LSZH. Complete with every accessory and charge necessary to give the light control point with KNX presence and brightness detector finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 270 N.P.E 07-EPO RIBA 4	Realization of Emergency power off "EPO" system for the MIL06.B building photovoltaic system, through the supply and installation of a "rotary" control device, protected against accidental actuation to be positioned inside the Back Security MIL06.B Building room. At the service of the plant you will have to act as reported: - button drive Release energy photovoltaic system that will intervene on inverters n°6; Each control circuit must be equipped with a circuit integrity signal. For the emergency control systems of the system in question, a wall-mounted switchboard suitable to contain the required cutting devices must be provided.		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	It is included in the offer PVC pipes under wall track (visible in the presence of technical rooms), supply of cables FTG18OM16 2x1.5mmq, from the installation point of the release command to the connection point of the user to be released. For details of the required links, see the dedicated table on the Technical Report of the project. Including all wiring, labels, accessories and charges; all perfectly finished in a workmanlike manner and working according to current legislation. **euro**	a corpo	
Nr. 271 N.P.E 07- EVAC	Supply and installation of End of Line Load, for checking the continuity of conductors, 2-wire connection. Certified to EN54-16 standards. Dimensions mm.42.7x47.8x21.3 All accessories and expenses to make the device finished and functioning in a state of the art are included. **euro**	cadauno	
Nr. 272 N.P.E 07- FM	Supply and installation of data rack power point, composed of: - 2P+E 16A IP44 interlocked CEE mobile socket - pvc folding pipe diam. 25mm laid under trace/view, threading with FG17 3x4mmq conductors, portion of backbone in FG16OM16 cable (section as per area switchboard wiring diagrams), including appropriate junction box. - CEE 2P+E 16A mobile plug connected to piece of FG16OM16 3G4 cable (length 2 mt) and terminated on multi-socket data rack power supply unit. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 273 N.P.E 07- HVAC	Supply and installation of ceiling heat recuperator supply point including : - flexible pvc piping with low smoke and toxic gas emission , 750 N seal , GWT 960 °C alternatively rigid pvc piping with low smoke and toxic gas emission 1250 N seal , GWT 960 °C complete with fasteners and fittings, bends and elements to allow any type of route, or spiral sheathing suitable diameter to thread FG16OM16 cables; - junction box made of IP55 plastic material in utility-side shunt complete with DIN bar, local 0/1 disconnector switch,transformer and accessories according to the specifications of the supplier of the control unit; - share of section from the main backbone to the end user point of multi-core cable type FG16OM16, 0.6/1 kV for connection of any solenoid valves, room probe; - share of stretch of BUS cable (RS485,or AWG shielded cables) (according to the indication of the supplier of the regulation unit and represented in the table of mechanical systems) from the backbone to the recuperator controller in the field. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 274 N.P.E 07- HW/TVCC	Desktop PC Operator Supply and installation of Desktop PC Operator, I-7 Core, 16GB Ram, 2x240TB SO, 1x4TB HD, Nvidia Pquadro Video Card, 2 1GB network cards. Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 275 N.P.E 07- LFE	Supply and installation of LED emergency lighting fixture for anti-panic area indication (equipped with symmetrical lens) for ceiling-mounted installation with the following characteristics: - Optics: standard heights - System type: (autonomous with centralized supervision) - Autonomy: 1h - Type: SE (Emergency Only, not permanent) - Minimum luminous flux in emergency (EN 60598-2-22): 358lm - Battery: Ni-Cd 4.8V 1.4Ah - Battery type: Nickel cadmium - Battery recharge time: 12h - Battery status: warning if battery not connected - Power supply: 230Vac - Power consumption with charged battery: 0.8W - Insulation class: II - Degree of protection: IP42 (from below), IP20 (from above) - Degree of protection against mechanical impact: IK07 - Operating temperature: 0°C to +40°C - Color: White - RAL 9003 - Complies with European standards: EN 60598-1, EN 60598-2-22, EN 61347-1, EN 61347-2-7, EN 61347-2-13, EN 62031, EN 62384 - Complies with RoHS2 2011/65/EU - Installation: recessed, Reference on plan **LFE04** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 276 N.P.E 07-	Supply and installation of inclined rod captator (h=2.0+0.75 m) made of solid aluminum alloy rod (AlMgSi), rounded at the top and equipped with M16 thread, complying with CEI EN 62305-3 standard, connected to the structure to be protected by means of		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
LPS	No. 2 inclined GRP arms that guarantee a safety distance s=42 cm. The item includes all stainless steel clamping for attaching the rod to the metal parapet and connecting it to the other elements of the LPS system. Reference on plan **T3** Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 277 N.P.E 07-ON	Fees for the implementation of the 'FM electrical system/site light including: - Construction site electrical supply to be requested from the public distributor; - Electrical consumption; - General electrical panel; - Construction site socket boards in a number appropriate to the needs of the construction site protected by suitable magnetothermal differential circuit breakers; - Interlocked socket plugs with protection index appropriate to the place of installation 2P+N+E 16A - 230V, 3P+N+E - 16A - 400V and 3P+N+E - 32A - 400V - Connecting conductors; - Ordinary and emergency lighting bodies; - Equipotential connections; - Including changes resulting from site developments. - Legal documentation referring to the installation made; All inclusive of every accessory and charge to give the system finished and functioning in a state of good working order. **euro**	a corpo	
Nr. 278 N.P.E 07- RI	Supply and installation of Electromagnetic stop for PTF. Supply and installation of Electromagnet 50 Kg in white thermoplastic housing, 24 VDC, 60 mA, terminal connection, built-in protection diodes, release button and articulated counterplate. EN1155 certified. Reference on plan **FA09** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 279 N.P.E 07-SPE	Supply and installation of static and seismic transversal support serving the electrical conduits present on the outside of the building near the facade (coming from the Power Module in the direction of the mep gallery/cover), with placement of bracket spacing as per the project drawings. For all detailed technical specifications on the execution of the work, please refer to the Technical Project Report (ref. bracket detail on plan"**BR06a**"). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 280 N.P.E 07-TER	Equipotential jumper made of FS17 cable, maximum length 300 cm, including cable lugs with double bolt including crimp connection terminal to main distribution with hydraulic pliers (irreversible) and screws for each rack cabinet visible on the plan: section 16 mmq **euro**	cad	
Nr. 281 N.P.E 07A-QE	**DB-CA.B-0-3** electric switchboard. Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 282 N.P.E 07b-HW/CA	Fees Design and sizing of the Access Control system. Fees for Design and sizing of the Access Control system. System start-up and integration with third-party software required by the client. Final testing and handover and Operator Training. 3 System optimization interventions and performance monitoring at 30g,60g,90g. **euro**	a corpo	
Nr. 283 N.P.E 08-CA	Outdoor Video Door Phone Station Supply and installation of IP Wall-mounted Outdoor Video Door Phone Station consisting of No. 1 Call Button, 1 Relay, API controls for integration with indoor VideoTelephone station, POE and 12VDC power supply. Includes: - Wall mounting brackets for external intercom station; - Power supply for 2-WIRE system ; - Specific unshielded BUS/SCS cable suitable for video intercom systems, consisting of a white outer sheath and 2 flexible conductors;		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	- Cover for intercom station; - PVC pipe, flexible branded, heavy duty, corrugated GWT 850 °C, placed within masonry walls in IP6X execution or alternatively rigid pvc piping GWT 960 °C, complete with fasteners and IP65 fittings; - outdoor junction box (round or rectangular) for fixing device to be mounted on wall in easily accessible position IP65 utility-side terminal; - label identifying the arrangement itself; Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	a corpo	
Nr. 284 N.P.E 08- CL	Supply and installation of Automatic ceiling recessed light control point. Construction of on/off type ceiling recessed presence detector control point, composed of: - No. 1 high-frequency presence detector for ceiling installation; - pvc flex tube diam. 20mm laid exposed/recessed in ceiling, threading with FG16OM16 3x1.5mmq conductors, all with origin from main distribution line, including suitable junction box; Complete with all accessories and charges necessary to make the light control point with presence detector finished and working in a state of good working order. **euro**	cadauno	
Nr. 285 N.P.E 08- EVAC	Supply and installation of Microphone on VVF emergency rescue cabinet with digital BusCAN, for general emergency voice messages, 24 Vdc power supply. Certified to EN 54-16 standards. Color: red. Dimensions: H300 x W230 x D115 mm. Weight: 3.1 kg. All accessories and expenses to make the device finished and functioning in a state of the art are included. **euro**	cadauno	
Nr. 286 N.P.E 08- FM	Supply and installation of three-phase user connection up to 10kW. Realization of user power supply up to 10 kW, including: - 3x32A rotary disconnector in IP55 insulated enclosure, fixed to wall or supply profile - derivation from cable conduit in rigid and/or flexible heavy series PVC piping diam. 32mm Complete with all accessories (e.g. IP55 cable glands, cable connection, etc.) and charges to make the power supply finished and working in a state of good construction. **euro**	a corpo	
Nr. 287 N.P.E 08- FO	Supply and installation of patches or duplex optical half-brace for LSZH multimode fibers, OM4 LC-LC 50/125, length 1mt. **euro**	cadauno	
Nr. 288 N.P.E 08- HW.IT	Supply and installation of active network equipment for the cabinet called "ENTRANCE ROOM WEST 2 - RK. B-W-1" , composed mainly of: - n.5 Cisco C9200L-24P-4X-E switches - Catalyst 9200L 24-port PoE+, 4 x 10G, Network Essentials (Access Switch) - n.1 Cisco C9500-48Y4C-A switch - Catalyst 9500 48-port x 1/10/25G + 4-port 40/100G, Advantage (Distribution Switch); - n.1 firewall FGT-600E 10Gb interfaces to Distribution; Each Switch must be complete with charges and accessories such as: - double power supply with relative connection cables - stack modules and cables where needed - SFP modules for copper and fiber optic connection (single mode or multimode as required by the project) - suitable support brackets -labelling - user licenses This includes charges for on-site programming of the equipment according to the specifications that will be produced by the Customer. **euro**	a corpo	
Nr. 289 N.P.E 08- LFE	Supply and installation of LED emergency lighting fixture for escape route indication for ceiling installation with the following characteristics: - Function: Spy System (autonomous with centralized supervision) - Autonomy: 1h - Type: SE (Emergency Only, not permanent) - Average luminous flux in emergency: 565lm - Minimum luminous flux in emergency (EN 60598-2-22): 562lm - Battery: Li-FePO4 6.4V 1.5Ah - Battery type: Lithium iron phosphate - Battery recharge time: 12h - Battery status: warning if battery not connected - Power supply: 230Vac - Power consumption with charged battery: 0.2W - Insulation class: II - Degree of protection: IP65 - Operating temperature: 0°C to +40°C - Color: Gray		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	- Complies with European standards: EN 60598-1, EN 60598-2-22, EN 61347-1, EN 61347-2-7, EN 61347-2-13, EN 62031, EN 62384 - Photobiological hazard free according to EN 62471 - Complies with RoHS2 2011/65/EU - Installation: wall, recessed* (* with accessory) - Warranty 5 years Reference on floor plan **LFE05a** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 290 N.P.E 08- RI	Supply and installation of **1-channel** Suction Central Unit, certified EN54-20 classes A, B and C, supplied without detector and without alarm level indicator. Maximum pipe length 300 m and 76 suction holes. 3 settable pre-alarm levels. 24 VDC power supply. IP54 Includes: - No. 1 High-sensitivity smoke detector for central suction units. Alarm threshold adjustable between 0.02 and 10%/m. Maximum sensitivity 0.002%/m. Self-compensation function; - No. 1 Small dust filter unit for pipes of D between 22 and 25 mm. Fixing on pipe by pipe press supplied with corresponding filter. Reference on plan **CF04a** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 291 N.P.E 08-SPE	Supply and installation of antiseismic bracketing mainly for ceiling ducts, made with modular systems for medium-heavy applications. Composed of S250 GD steel rails, with ribbed C-section with 20-micron thick sendzimir galvanizing. Including S235 JR steel connecting elements, suitable S235 JR galvanized steel collars, galvanized hammer nuts and all fastening hardware. Including charges for the construction design of the system, and any other accessories and charges necessary to give the anti-seismic bracketing in place finished and in working order. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 292 N.P.E 08-TER	Bare copper rope, complete with terminals and cable lugs with double bolt including crimp connection terminal to secondary distribution with hydraulic pliers (irreversible), laid: on walkway, protective pipe or tunnel: nominal section 70 mm2 **euro**	m	
Nr. 293 N.P.E 08a-LFE	Supply and installation of LED emergency lighting fixture for escape route indication for ceiling installation including accessories for bracketing on light duct with the following characteristics: with the following features: - Function: Spy System (autonomous with centralized supervision) - Autonomy: 1h - Type: SE (Emergency Only, not permanent) - Average luminous flux in emergency: 565lm - Minimum luminous flux in emergency (EN 60598-2-22): 562lm - Battery: Li-FePO4 6.4V 1.5Ah - Battery type: Lithium iron phosphate - Battery recharge time: 12h - Battery status: warning if battery not connected - Power supply: 230Vac - Power consumption with charged battery: 0.2W - Insulation class: II - Degree of protection: IP65 - Operating temperature: 0°C to +40°C - Color: Gray - Complies with European standards: EN 60598-1, EN 60598-2-22, EN 61347-1, EN 61347-2-7, EN 61347-2-13, EN 62031, EN 62384 - Photobiological hazard free according to EN 62471 - Complies with RoHS2 2011/65/EU - Installation: wall, recessed* (* with accessory) - Warranty 5 years - Included in the offer is adapter that allows attachment on electrified track. Reference on floor plan **LFE05b** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 294 N.P.E 09-CA	Internal Videophone Workstation Supply and installation of Indoor Videophone Reception Station Desktop Videophone Unit, Sip protocol, Web Interface for configuration, touch display, POE and 12VDC power supply. Includes: - PVC pipe, flexible branded, heavy duty, corrugated GWT 850 °C, placed within masonry walls in IP6X execution or alternatively rigid pvc piping GWT 960 °C, complete with IP65 fasteners and fittings;		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	- Specific unshielded BUS/SCS cable suitable for video intercom systems, - floor junction box; - Outdoor junction box (round or rectangular) for fixing device to be mounted on the wall in an easily accessible position IP65 user-side terminal; - label identifying the arrangement itself; Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	a corpo	
Nr. 295 N.P.E 09- CL	Supply and installation of Automatic light control point for ceiling/wall installation. Construction of control point with presence detector for ceiling/wall installation of on/off type, composed of: - No. 1 high-frequency presence detector for ceiling installation; - pvc flex tube diam. 20mm laid exposed to ceiling/wall, threading with FG16OM16 3x1.5mmq conductors, all with origin from the main distribution line, including suitable junction box; Complete with all accessories and charges necessary to make the light control point with presence detector finished and working in a state of good working order. **euro**	cadauno	
Nr. 296 N.P.E 09- EVAC	Supply and installation of Microphone Base for selectable voice messages for 8 zones, or general emergency, emergency prerecorded message selection, system status display, 24V dc power supply. Digital bus for communication with control unit. Certified to EN54-16 standards. Overall dimensions: H55 x W205 x D190 mm All accessories and expenses to make the device finished and functioning in a state of the art are included. **euro**	cadauno	
Nr. 297 N.P.E 09- FO	Supply and installation of patches or duplex optical half-brace for single-mode fibers LSZH, OS2 LC-LC 9/125, length 1mt **euro**	cadauno	
Nr. 298 N.P.E 09- HVAC	Supply and installation of three-phase CDZ utility connection work up to 10kW Realization of user power supply up to 10 kW, including: - waterproof grommets for power cable entry - cable termination with suitable fastening lugs - connection to terminal board; - rotary disconnector in IP65 insulated enclosure, fixed to wall or supply profile - derivation from cable conduit in heavy series PVC piping rigid and/or flexible diameter suitable for FG16OM16 cable threading Complete with all accessories (e.g. IP65 cable glands, cable connection, etc.) and charges to make the power supply finished and working in a state of good working order. **euro**	a corpo	
Nr. 299 N.P.E 09- HW.IT	Supply and installation of active network equipment for the cabinet called "ENTRANCE ROOM EAST 2 - RK. B-E-1" , consisting mainly of: - n.5 Cisco C9200L-24P-4X-E switches - Catalyst 9200L 24-port PoE+, 4 x 10G, Network Essentials (Access Switch) - n.1 Cisco C9500-48Y4C-A switch - Catalyst 9500 48-port x 1/10/25G + 4-port 40/100G, Advantage (Distribution Switch); - n.1 firewall FGT-600E 10Gb interfaces to Distribution; Each Switch must be complete with charges and accessories such as: - double power supply with relative connection cables - stack modules and cables where needed - SFP modules for copper and fiber optic connection (single mode or multimode as required by the project) - suitable support brackets -labelling - user licenses This includes charges for on-site programming of the equipment according to the specifications that will be produced by the Customer. **euro**	a corpo	
Nr. 300 N.P.E 09- HW/TVCC	46 Inch LCD Monitor Supply and installation of 46 Inch LCD Monitor - 2 HDMI inputs with VESA wall bracket. Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 301 N.P.E 09- LF	Supply and installation of high-performance wall-mounted lighting fixture consisting of: - No. 1 Supporting profile for single luminaires for continuous row IP64 LED or continuous row end elements. Length of the supporting profile: 1521 mm. With two 7-pin plug-socket pairs for quick electrical connection and cable end closure with protection against accidental contact. Heat-resistant feed-through wiring is made already at the factory complete with all required components; - No. 1 Transparent cover for IP64 continuous row applications; - No. 1 LED wired bases for continuous row system. Protection class IP64, designation D according to DIN EN 60598-2-24; With PMMA lens optics; Recommended installation height: 2.8 to 3.5 m; Luminaire luminous flux 4,200 lm; Power consumption 22 W; Luminaire brightness 191 lm/W; Color of light Neutral white; Correlated color temperature (CCT) 4000 K; Overall color rendering		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	index (CRI) 80. Silver gray color; Length 1,474 mm; Insulation class (EN 61140): I;Impact resistance rating to IEC 62262: IK03, Glow wire test temperature to IEC 60695-2-11 of 650 °C; With ballast, dimming included (DALI); - No. 2 End head as an application terminal element for continuous row IP64 LED. Made of plastic material, color silver gray. - No. 2 accessories for wall mounting bracket; - No. 1 Pair of 7-pin plug-socket for electrical connection of through wiring; Reference on plan **LF10** (Hot Plenum/ DH corridor type technical areas installation). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 302 N.P.E 09-LFE	Supply and installation of LED emergency lighting fixture for indication of escape routes/panic areas for wall installation with the following characteristics: - System type: (stand-alone with centralized supervision) - Autonomy: 1h - Type: SE (Emergency Only, not permanent) - Average luminous flux in emergency: 730lm - Minimum luminous flux in emergency (EN 60598-2-22): 701lm - Battery: Li-FePO4 6.4V 1.5Ah - Battery type: Lithium iron phosphate - Battery recharge time: 12h - Battery status: warning if battery not connected - Power supply: 230Vac - Power consumption with charged battery: 0.2W - Insulation class: II - Degree of protection: IP65 - Degree of protection against mechanical impact: IK08 - Operating temperature: 0°C to +40°C - Visibility distance with pictogram (EN 1838): 21 m - Complies with European standards: EN 60598-1, EN 60598-2-22, EN 61347-1, EN 61347-2-7, EN 61347-2-13, EN 62031, EN 62384 - Installation: wall, ceiling, - Warranty 5 years Reference on plan **LFE06** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 303 N.P.E 09-LPS	Supply and installation of longitudinal air-termination rope made of 70 mm² Aldrey rope in 19 x Ø 2.14 mm formation (in accordance with CEI EN 62305-3), made of primary aluminum alloy (AlSiMg) for electrical installations, UNI 3570, having the following characteristics: theoretical mass 0.1878 kg/m, electrical resistance at 20°C 0.484 Ohm/km, breaking load 1985 kg, modulus of elasticity 5700 kg/mm², coefficient of thermal expansion 23x10-6 1/°C. The item includes all elements for fixing the rope at the ends and connecting it to the other elements of the air-termination system. Rope length 285 m Reference on plan **FL1** Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 304 N.P.E 09-ON	Fees for interface/management activities by the General Contractors with supplier of the "disertemediated" works such as (Power Module/Generators). It is the responsibility of the Stable Electrical Contractor to fully cooperate in compliance with the construction schedule agreed with the client and DL, for the preparation of the management of construction drawings, material submission sheets, support of the realization of plant passages for possible laying of cables or pipes or conduits in all areas in the GC's possession during the construction site, project managemnt activities with organizations meetings and ad hoc meetings with the support of the DL if required, and everything necessary to initiate collaborations between the parties during the execution of the works. **euro**	a corpo	
Nr. 305 N.P.E 09- RI	Supply and installation of **2-channel** Suction Central Unit, certified EN54-20 classes A, B and C, supplied without detector and without alarm level indicator. Maximum pipe length 300 m and 76 suction holes. 3 settable pre-alarm levels. 24 VDC power supply. IP54 Includes: - No. 1 High-sensitivity smoke detector for central suction units. Alarm threshold adjustable between 0.02 and 10%/m. Maximum sensitivity 0.002%/m. Self-compensation function; - No. 1 Small dust filter unit for pipes of D between 22 and 25 mm. Fixing on pipe by pipe press supplied with corresponding filter. Reference on plan **CF04b** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 306 N.P.E 10-CL- RIBA 4	Supply and installation of Automatic ceiling-mounted light control point by KNX presence and brightness sensor with the following features: PIR presence and motion sensor with built-in brightness controller and IR receiver. Possibility of continuous and threshold brightness control with built-in KNX interface. Adjustment range 1...1000 lux for recessed ceiling mounting (2.5..10m). Operating range 360° horizontal, 60° vertical. Presence detection range up to 64sqm, motion up to 400sqm. Features three control channels each with four		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	actions for presence detection. Sensitivity and sectorization of detection settable. Features built-in temperature probe and controller (0..50° C). IP54 degree of protection. To be associated with the device relative housing for projecting mounting. Included with: - q.p. BUS KNX 1x2x0.8mm² LSZH transmission cable, originating from the previous KNX light point, with suitable threading pipe; - rigid and/or flexible PVC piping and completion accessories and including junction box; Complete with all accessories and charges necessary to make the light control point with KNX presence and brightness detector finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 307 N.P.E 10-EVAC	Supply and installation of Expansion with 16 zones to be used in connection with microphone base. Select voice messages for 16 zones, or general emergency, selection of pre-recorded emergency messages, system status display. Certified to EN54-16 standards. Overall dimensions: H55 x W205 x D190 mm All accessories and expenses to make the device finished and functioning in a state of the art are included. **euro**	cadauno	
Nr. 308 N.P.E 10-HVAC	Supply and installation of three-phase CDZ utility connection work up to 20kW Realization of user power supply up to 20 kW, including: - waterproof grommets for power cable entry - cable termination with suitable fastening lugs - connection to terminal board; - rotary disconnector in IP65 insulated enclosure, fixed to wall or supply profile - derivation from cable conduit in heavy series PVC piping rigid and/or flexible diameter suitable for FG16OM16 cable threading Complete with all accessories (e.g. IP65 cable glands, cable connection, etc.) and charges to make the power supply finished and working in a state of good working order. **euro**	a corpo	
Nr. 309 N.P.E 10-HW.IT	Supply and installation of active network equipment for the cabinet called "IT ROOM - RK. B-IT-1" , composed mainly of: - n.5 Cisco C9200L-24P-4X-E switches - Catalyst 9200L 24-port PoE+, 4 x 10G, Network Essentials (Access Switch) - n.2 Cisco C9500-48Y4C-A switch - Catalyst 9500 48-port x 1/10/25G + 4-port 40/100G, Advantage (Core Switch) Each Switch must be complete with charges and accessories such as: - double power supply with relative connection cables - stack modules and cables where needed - SFP modules for copper and fiber optic connection (single mode or multimode as required by the project) - suitable support brackets -labelling - user licenses This includes charges for on-site programming of the equipment according to the specifications that will be produced by the Customer. **euro**	a corpo	
Nr. 310 N.P.E 10-HW/TVCC	Forever License for Video Surveillance Management System. Fees to initiate Perennial License for Video Surveillance Management System (referred to as "system" or "VMS") with support for an unlimited number of users, devices, servers and sites, including options for centralized surveillance operations and mobile devices. The VMS will consist of separate components each dedicated to a particular purpose: Management Server, Recording Server, Failover Server (for which dedicated physical equipment has been prepared), Event Server, Database Server, Mobile service Server. Each of the above services must be able to be certified for installation on VMs. Access to the system must be possible in the following modes: Windows Management Client, Full Windows Viewing Client, Web Client, Mobile Client. (**Check full feature compliance with Attachment "A"); VMS must be an open-platform capable of communicating (via Add-on)) with the access control system used. EuroPriSe GDPR-ready certification. Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 311 N.P.E 10- LF	Supply and installation of Round ceiling/wall mounted LED fixture with opaline PMMA diffuser. With circular opaline diffuser, spherical in shape .Luminaire luminous flux 2600 lm, power consumption 22.00 W, luminaire brightness 118 lm/W. Color of light warm white, color temperature (CCT) 3000 K, general color rendering index (CRI) Ra > 80. Diameter of diffuser Ø 270 mm, luminaire height 99 mm. Allowable ambient temperature (ta): -20 °C - +25 °C. Insulation class (EN 61140): I, degree of protection (DIN EN 60529): IP40, impact resistance rating to IEC 62262: IK03, glow wire test temperature to IEC 60695-2-11 of 650 °C. Weight: 0.9 kg. With digital dimming transformer (DALI). Reference on plan **LF06** (indoor emergency staircase installation). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 312 N.P.E 10-LFE	Supply and installation of LED pictogram for escape route indication on door with the following characteristics: - System type: (stand-alone with centralized supervision) - Autonomy: 3h - Type: SE/SA (Emergency only, non-permanent/always on, permanent)		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	- SA operation interruptible by switch - Battery: Ni-Cd 4.8V 0.5Ah - Battery type: Nickel cadmium - Battery charging time: 12h - Battery status: warning if battery not connected - Power supply: 230Vac - Power consumption with charged battery: 1.7W - Insulation class: II - Degree of protection: IP65 - Operating temperature: 0°C to +40°C - Visibility distance (EN 1838): 32 meters - Complies with European standards: EN 60598-1, EN 60598-2-22, EN 1838, EN 7010 - Signaling pictogram kit provided as standard in each package - Installation: ceiling, flag, recessed*, recessed on 503 box*, suspension* (* with accessory) - Warranty 5 years Reference on plan **LFE07** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 313 N.P.E 10- ON RIBA 4	Supply of containment box for insertion of single-pole high-current connectors (up to 750A) for the use of external dummy loads/Load Banks serving Diesel Generator A/B/C/D/E/F. Composed of: - No. 35 sockets/connectors (exact number, distributed on phase/neutral and PE must be confirmed with system supplier) for unipolar cables equipped with an electromechanical rotary ferrule mechanism (I-0) that connects and controls via 2 pilot wires, the power interruption device placed upstream. IP66 and IP67 degrees of protection (according to IEC/EN 60529) and IK08 impact resistance according to IEC/EN 62262. Complete with every protective accessory to give the product finished and functional and workmanlike. **euro**	a corpo	
Nr. 314 N.P.E 10- QE	**DB-SEC.X-0-1** electric switchboard. Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 315 N.P.E 10- RI	Supply and installation of red color pipe for aspiration network, 3 m bar, D = 25 mm, ABS Reference in plan **CF06** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 316 N.P.E 11- CA	Pre-Arrangements for future electric lock Realization of predisposition point for future electromechanical lock (the latter calculated in civil works computation) for installation on door frame to be controlled including: - PVC pipe, flexible branded, heavy duty, corrugated GWT 850 °C, placed within plasterboard walls, or within false ceiling (if present in neighboring areas) in IP4X execution or alternatively rigid pvc piping GWT 960 °C, complete with IP55 fasteners and fittings; - portion of backbone FS18OR18 3x1.5 300/500V incoming from zone access control unit; - junction box (round or rectangular) for fixing device to be mounted on ceiling/wall in easily accessible position IP55 user side terminal; - supply and installation of 230/12V transformer for connection to electric lock; - label identifying the arrangement itself; Complete with every charge to give the component finished and functioning in a state of good working order **euro**	a corpo	
Nr. 317 N.P.E 11- EVAC	Connection point or arrangement point evac system component consisting of: - diameter 25mm hollow pvc pipe; - junction box (round or rectangular) suitable for installation site, for fixing device to be mounted on ceiling/recessed/wall in easily accessible position; - portion of loop in fire resistant cable 2x2.5mmq PH120' FTS29OM16 100/100V, glass-mica insulation and sheathing in E4 cross-linked compound purple color conforming for emergency evacuation systems derived from the central belonging; - label identifying the arrangement same; Complete with every accessory to give the work finished and functioning in a state of good working order. **euro**	a corpo	

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
Nr. 318 N.P.E 11-HVAC	Supply and installation of single-phase CDZ user connection work up to 3kW Realization of single-phase user power supply up to 3 kW, including: - waterproof grommets for power cable entry - cable termination with suitable fastening lugs - terminal block connection; - 2x16A rotary disconnect switch in IP65 insulated enclosure, fixed to wall or supply profile - derivation from cable conduit in rigid and/or flexible heavy series PVC piping diam. 32mm Complete with all accessories (e.g. IP65 cable glands, cable connection, etc.) and charges to make the power supply finished and working in a state of good working order. **euro**	a corpo	
Nr. 319 N.P.E 11-HW.IT	Supply and installation of active network equipment for the cabinet called "TECHNICAL ROOM - RK. B-P1-1" , composed mainly of: - n.6 Cisco C9200L-24P-4X-E switches - Catalyst 9200L 24-port PoE+, 4 x 10G, Network Essentials (Access Switch) Each Switch must be complete with charges and accessories such as: - double power supply with relative connection cables - stack modules and cables where needed - SFP modules for copper and fiber optic connection (single mode or multimode as required by the project) - suitable support brackets -labelling - user licenses This includes charges for on-site programming of the equipment according to the specifications that will be produced by the Customer. **euro**	a corpo	
Nr. 320 N.P.E 11-HW/TVCC	Forever License for Camera Connection. Fees for initiating Perennial License for the connection of each camera to the VMS system (Permanent License). Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 321 N.P.E 11- LF	Supply and installation of pole-mounted light fixture with opal PMMA reflector in the shape of a circular cone. Composed of 2 LED modules with 4 LEDs each integrated in a lens system, direct emission. Luminaire luminous flux 800 lm, power consumption 7.50 W, luminaire brightness 106 lm/W. Luminaire diameter 170 mm, luminaire height 425 mm. Closing cylinder made of highly shockproof PMMA, transparent. Insulation class (EN 61140): II, degree of protection (DIN EN 60529): IP65, impact resistance to IEC 62262: IK04. Is included in the offer: - Tubular pole for streetlight header. height 836.5 mm, Outer diameter 170 mm. Anthracite color, metallic, high weather resistance, powder coated. Reference on plan **LF09** (installation on pole on the roof plane). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 322 N.P.E 11-LFE	Supply and installation of LED pictogram for flag-type escape route indication with the following characteristics: - System type: (stand-alone with centralized supervision) - Autonomy: 3h - Type: SE/SA (Emergency only, non-permanent/always on, permanent) - SA operation interruptible by switch - Battery: Ni-Cd 4.8V 0.5Ah - Battery type: Nickel cadmium - Battery charging time: 12h - Battery status: warning if battery not connected - Power supply: 230Vac - Power consumption with charged battery: 1.7W - Insulation class: II - Degree of protection: IP65 - Operating temperature: 0°C to +40°C - Visibility distance (EN 1838): 32 meters - Complies with European standards: EN 60598-1, EN 60598-2-22, EN 1838, EN 7010 - Signaling pictogram kit provided as standard in each package - Installation: ceiling, flag, recessed*, recessed on 503 box*, suspension* (* with accessory) - Warranty 5 years Reference on plan **LFE08** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 323 N.P.E 11-LPS	Supply and installation of transversal air-termination rope made of 70 mm² Aldrey rope in 19 x Ø 2.14 mm formation (in accordance with CEI EN 62305-3), made of primary aluminum alloy (AlSiMg) for electrical installations, UNI 3570, having the following characteristics: theoretical mass 0.1878 kg/m, electrical resistance at 20°C 0.484 Ohm/km, breaking load 1985 kg,		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	modulus of elasticity 5700 kg/mm², coefficient of thermal expansion 23x10-6 1/°C. The item includes all elements for fixing the rope at the ends and connecting it to the other elements of the air-termination system. Rope length 65 m Reference on plan **FT1** Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 324 N.P.E 11-ON RIBA 4	Supply of containment box for insertion of single-pole high-current connectors (up to 750A) for the use of external dummy loads/Load Banks serving UPS IT on Power Module A/B/C/D/E/F Composed of: - No. 19 sockets/connectors (exact number, distributed on phase/neutral and PE must be confirmed with system supplier) for unipolar cables equipped with an electromechanical rotary ferrule mechanism (I-0) that connects and controls via 2 pilot wires, the power interruption device placed upstream. IP66 and IP67 degrees of protection (according to IEC/EN 60529) and IK08 impact resistance according to IEC/EN 62262. Complete with every protective accessory to give the product finished and functional and workmanlike. **euro**	a corpo	
Nr. 325 N.P.E 11-QE	**DB-OFF.X-0-2** electric switchboard. Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 326 N.P.E 11- RI	Supply and installation of Sleeve for pipes D = 25 mm, ABS, pack of 20 pieces. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 327 N.P.E 12 -LF	Supply and installation of LED outdoor waterproof fixture for ceiling mounting. Luminaire luminous flux 2400 lm, power consumption 15.00 W, luminaire brightness 160 lm/W. Color of light neutral white, color temperature (CCT) 4000 K, general color rendering index (CRI) Ra > 80. Average reference service life L85(tq 35 °C) = 50,000 h, Average reference service life L80(tq 35 ° C) = 85,000 h. Luminaire body made of die-cast aluminum. Luminaire body color anthracite, (DB 703). Dimensions (W x D): 1047 mm x 96 mm, luminaire height 98 mm. Allowable ambient temperature (ta): -30 °C - +35 °C. Insulation class (EN 61140): I, degree of protection (DIN EN 60529): IP66, shock resistance rating to IEC 62262. Complete with the following accessories: - No. 1 swivel mounting bracket for wall or ceiling mounting. Reference on plan **LF11** (installation on outdoor stairs and gantry area). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 328 N.P.E 12-FM RIBA 4	Supply and installation of 16/20-module raised floor recessed box for workstation supply composed of: - 16/20 module 4-compartment recessed turret complete with cover and accessories - No. 4 resin recessed boxes 4 places; - No. 4 support frames for 4-place equipment holder - No. 2 black color multistandard UNEL socket (normal energy section) - no. 2 red multistandard UNEL sockets (UPS energy section) - No. 4 supports for RJ45 CAT.6 data sockets (equipment computed in dedicated chapter); - No 4 hole cover caps; Complete with all accessories and charges to make the floor flush-mounted turret finished and working in a workmanlike manner. **euro**	a corpo	
Nr. 329 N.P.E 12-HW/TVCC	Annual Maintenance Fee for the VMS system. Start-up Charges Annual Maintenance Fee (Mandatory 1 year only) for VMS system that guarantees for a period of one year from license activation : 1) Free access to any new product version for the purchased VMS software product. 2) 100% credit on the owner's current VMS product when upgrading to a more advanced version of the same VMS product. 3) Priority handling of response time to support phone calls based on the criticality of the problem, for questions sent via e-mail or which cannot be answered during the initial phone call. 4) Additional years of access to software upgrades must be available separately for purchase. **euro**	a corpo	
Nr. 330 N.P.E 12-LPS	Supply and installation of transversal air-termination rope made of 70 mm² Aldrey rope in 19 x Ø 2.14 mm formation (in accordance with CEI EN 62305-3), made of primary aluminum alloy (AlSiMg) for electrical installations, UNI 3570, having the following characteristics: theoretical mass 0.1878 kg/m, electrical resistance at 20°C 0.484 Ohm/km, breaking load 1985 kg,		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	modulus of elasticity 5700 kg/mm², coefficient of thermal expansion 23x10-6 1/°C. The item includes all elements for fixing the rope at the ends and connecting it to the other elements of the air-termination system. Rope length 78 Reference on plan **FT2** Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 331 N.P.E 12- ON RIBA 4	Cost charges for Power Modules installation (composed by n.2 separated rooms), including following activities: - coordination with Power Module Supplier for site activities and delivery schedule - reveiving Power Module mounting and assembly instruction from Power Module Supplier - proper crane rental with related expenses (consider one separated rental for every Power Module) - Unloading the prefabricated containers from the transport truck to final location, including charges for fixing on metal gantry structure in the position indicated on the design drawings (fixing points identified by Supplier, material and labor included in this quote) - Assembly/connection of the two prefabricated rooms following Supplier instruction (connections between Prefabbricated rooms and from prefabbricated rooms to site Electrical and special systems) All to give the component ready for first start-up by the Manufacturer. **euro**	a corpo	
Nr. 332 N.P.E 12- RI	Supply and installation of 90" curve, D = 25 mm, ABS, CF 5pcs. package All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 333 N.P.E 13- HW/TVCC	Annual Maintenance License Fee per camera. Start-up Charges Annual Maintenance Fee (Mandatory 1 year only) for EACH camera device connected to the VMS that warrants from license activation: 1) Free access to VMS upgrade for any new camera fw version- 2) 100% credit on the owner's current VMS product when upgrading to a more advanced version of the same VMS product. 3) Priority handling of response time to support phone calls based on the criticality of the problem, for questions sent via email or that cannot be answered during the initial phone call. 4) Additional years of access to software upgrades must be available separately for purchase **euro**	a corpo	
Nr. 334 N.P.E 13- LF	Supply and installation of outdoor pole head luminaire, including high-efficiency lens systems in quadruple heat-resistant and UV-resistant arrangement. With asymmetrical wide-beam light distribution. For street lighting according to lighting classes. LED system consisting of 2 LED modules each. Luminaire luminous flux 2200 lm, power consumption 20.00 W, luminaire brightness 110 lm/W. Color of light neutral white, color temperature (CCT) 4000 K, overall color rendering index (CRI) Ra > 70. Color tolerance (initial MacAdam) < 5 SDCM. Anthracite color, metallic, highly weatherproof, powder-coated. With PMMA cover lens, molded. Insulation class (EN 61140): II, degree of protection (DIN EN 60529): IP66, impact resistance rating to IEC 62262: IK09. With digital dimming transformer (DALI). 10 kV overvoltage resistance. Parameterizable ballast with luminous flux stabilization (CLO). Composed in the offering: - Die-cast aluminum pole mount; - Decorative cast aluminum wall mount. Ø 42 mm x 100 mm bracket. Angle of inclination 10°. Anthracite color, metallic, highly weather resistant; Reference on plan **LF07** (outdoor gantry area installation). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 335 N.P.E 13- LFE RIBA 4	Supply and installation of LED emergency lighting fixture for indication of escape routes/panic areas for wall installation (external area) with the following characteristics: - System type: (stand-alone with centralized supervision) - Autonomy: 1h - Type: SE (Emergency Only, not permanent) - Average luminous flux in emergency: 366lm - Battery: Li-FePO4 6.4V 1.5Ah - Battery type: Lithium iron phosphate - Battery recharge time: 12h - Battery status: warning if battery not connected - Power supply: 230Vac - Power consumption with charged battery: 6W - Insulation class: II - Degree of protection: IP65 - Degree of protection against mechanical impact: IK08 - Operating temperature: 0°C to +40°C - Visibility distance with pictogram (EN 1838): 21 m - Complies with European standards: EN 60598-1, EN 60598-2-22, EN 61347-1, EN 61347-2-7, EN 61347-2-13, EN 62031, EN 62384 - Installation: wall, ceiling, - Warranty 5 years

	Reference on plan **LFE09** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 336 N.P.E 13-LPS	Supply and installation of perimeter rope on the EAST side made of 70 mm² Aldrey rope in 19 x Ø 2.14 mm formation (in accordance with CEI EN 62305-3), made of primary aluminum alloy (AlSiMg) for electrical installations, UNI 3570, having the following characteristics: theoretical mass 0.1878 kg/m, electrical resistance at 20°C 0.484 Ohm/km, breaking load 1985 kg, modulus of elasticity 5700 kg/mm², coefficient of thermal expansion 23x10-6 1/°C. The item includes all elements for fixing the rope at the ends and connecting it to the other elements of the air-termination system. Rope length 730 m Reference on plan **P** Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 337 N.P.E 13-ON RIBA 4	Cost charges for Diesel Generator installation, including following activities: - coordination with Diesel Generator Supplier for site activities and delivery schedule - reveiving Diesel Storage Tank - proper crane rental with related expenses (consider one separated rental for every Diesel Storage Tank) - Unloading the Diesel Storage Tank from the transport truck to final location, including charges for fixing on concrete structure in the position indicated on the design drawings (fixing points identified by Supplier, material and labor included in this quote) - reveiving Diesel Generator - proper crane rental with related expenses (consider one separated rental for every Diesel Generator) - Unloading the Diesel Generator from the transport truck to final location, including charges for fixing on concrete structure in the position indicated on the design drawings (fixing points identified by Supplier, material and labor included in this quote); - Cost charges for installation of generators tanks underground with fixing ribs and sand filling, including the anchor rods. - Unloading and positioning of silencer, exaust flue and other accessories All to give the component ready for first start-up by the Manufacturer. **euro**	a corpo	
Nr. 338 N.P.E 13- RI	Supply and installation of T-joint, D = 25 mm, ABS, pack of 10 pieces All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 339 N.P.E 14-FM RIBA 4	Supply and installation of single-phase 32A interlocked socket in IP67 outdoor execution. CEE 2P+E 2x32 A Iinterlocked socket conforming to EN60309, in IP67 outdoor execution including: - 40 mm diameter rigid pvc piping low smoke and toxic gas emission 1250 N sealing GWT 960 °C complete with fasteners and fittings, bends and elements to allow any type of route, alternatively 32 mm diameter spiral sheathing or 40 mm diameter heavy flexible pvc piping in plasterboard or masonry wall,low smoke and toxic gas emission, 750 N sealing, GWT 960 °C section of multipole cable type FG16(O)M16 (computed in dedicated chapter) including terminal junction box. - 2P+E 2x32A CEE SOCKET IP67 thermosetting resin complete with rotary disconnect switch, steel bracket interlock, outdoor containment box, accessory and completion elements. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 340 N.P.E 14-HVAC RB4	Supply and installation of automatic source switch for power management type SEFFC (to be placed on on-board equipment), modular, three-phase fully apparent opening for use low voltage systems with timed opening of load power supply during transfer. The ATS unit will provide open transition type switching (I-0-II), transfer under load between two sources for any low-voltage power circuit, as well as safety isolation by double opening per pole. The product is fully programmable and has all the functions in the unit as well as some additional programmable parameters and a trip function. Due to its communication properties, the product provides access via ModBus to voltage and frequency measurements and parameter settings. Specification. - Control type Automatic fully programmable - Number of poles 4 - Rated current 40 - Max. rated operating voltage Ue for AC [V] 800 - Rated operating voltage [V] 400..690 - Rated permanent current Iu [A] 40 - Rated permanent current at AC-23, 400V [A] 40 - Rated permanent current to AC-21, 400V [A] 40 - Resistance to short-time current Icw [kA] 4 - Rated operating power for AC-23, 400V [kW] 30 - Rated breaking capacity at 400 V [kW] 30 - Rated conditional short-circuit current Iq [kA] 50 - Number of poles 4 Included in the tender is IP67 metal protective carpentry to enclose the switch in the inside. Complete with every accessory, communication board for remote analysis and Ethernet/modbus connection cables. **euro**	a corpo

Nr. 341 N.P.E 14- HW/TVCC	License for configuration of VideoWall Start-up charges License for configuration of VideoWall (placed in the room up to 8 monitors manageable directly by the operator) **euro**	a corpo	
Nr. 342 N.P.E 14- LFE RIBA 4	Supply and installation of LED emergency lighting fixture for indication of escape routes/panic areas for wall installation with the following characteristics: - System type: (stand-alone with centralized supervision) - Autonomy: 3h - Type: SE (Emergency Only, not permanent) - Average luminous flux in emergency: 403lm - Battery: Li-FePO4 6.4V 1.5Ah - Battery type: Lithium iron phosphate - Battery recharge time: 12h - Battery status: warning if battery not connected - Power supply: 230Vac - Power consumption with charged battery:9.3W - Insulation class: II - Degree of protection: IP40 - Degree of protection against mechanical impact: IK08 - Operating temperature: 0°C to +40°C - Visibility distance with pictogram (EN 1838): 21 m - Complies with European standards: EN 60598-1, EN 60598-2-22, EN 61347-1, EN 61347-2-7, EN 61347-2-13, EN 62031, EN 62384 - Installation: wall, ceiling, - Warranty 5 years Reference on plan **LFE06** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 343 N.P.E 14- LPS	Supply and installation of down conductor for connection to pillar reinforcing bars, made of: _ IDL - Insulated conductor with Aldrey 70mm² rope core - Equivalent safety distance in air Se=50cm (150kV) - Maximum lightning current Iimp=200kA, including specific anchors at maximum spacing of 1 meter. Length 4.0 m - All accessories and stainless steel clamping hardware required for fixing the down conductor to the reinforcing bars and air-termination system Reference on plan **C1** Complete with every charge to give the component finished and functioning in a state of good working order. **euro**	cadauno	
Nr. 344 N.P.E 14- ON RIBA 4	Costs for installation of bracketing accessories (for each power module) for incoming electrical conduits from cabinets Load Bank installed on the ground floor, including the following activities: - Coordination with the Power Module supplier for site activities and delivery schedule; - Charges for supply and installation of metal brackets serving the incoming electrical cables trays from the cabinets Load Bank near the outer walls of the container/metal gantry structure; All to make the component ready for electrical cable routing. **euro**	a corpo	
Nr. 345 N.P.E 14- QE	**DBT-ST.X-0-1** electric switchboard. Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 346 N.P.E 14- RI	Supply and installation of T-joint to make sampling point, including set of pre-drilled discs to easily obtain the required hole diameter, pack of 10 pcs. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 347 N.P.E 15- HW/TVCC	Video surveillance system design and sizing. Charges for Video Surveillance system design and sizing by certified design engineer for the proposed VMS. VMS software installation on the dedicated hardware systems, acquisition of all camera equipment (cameras) carried out by certified engineer technician for the proposed VMS. VMS system start-up and integration with third-party software required by the client. Final testing and delivery and Operator Training.

Nr. 364 N.P.E 20- HW.IT RB4	Supply and installation of active network equipment for the cabinet called "ENTRANCE ROOM WEST 1 - RK. B-W-1" , composed of: - n.1 Cisco C9500-48Y4C-A switch - Catalyst 9500 48-port x 1/10/25G + 4-port 40/100G, Advantage (Distribution Switch); - n.2 firewall Fortinet 400E with following configuration: cluster in HA consisting of 2 Firewalls, double power supply, 10Gb interfaces to Distribution; CORPORATE NETWORK - n.2 C9300 L-24 P-4X PoE, with modular uplink C 9300-NM-4X. Uplink interfaces must be equipped with n.2 x 10Gb SFP Multi Mode Fiber 850nm OM4 to handle 10Gb capacity (Access Switch) BMS NETWORK - n.2 Cisco C9300 L-24 P-4X PoE, with modular uplink C9300-NM-4X. Uplink interfaces must be equipped with n.2 x 1Gb 850nm SFP Multi Mode Fiber to handle 1Gb capacity (Access Switch) Each Switch must be complete with charges and accessories such as: - double power supply with relative connection cables - stack modules and cables where needed - SFP modules for copper and fiber optic connection (single mode or multimode as required by the project) - suitable support brackets - labelling - user licenses This includes charges for on-site programming of the equipment according to the specifications that will be produced by the Customer. **euro**	a corpo	
Nr. 365 N.P.E 20- LF- RIBA 4	Supply and installation of waterproof LED ceiling fixture, IP66, with polycarbonate body and diffuser. For ceiling, wall and pendant mounting. PC diffuser with internal prism structure. With symmetrical wide-beam light distribution. Glare rating according to UGR < 25 classification (EN 12464-1). Luminaire luminous flux 6000 lm, power consumption 44.00 W. Color of light neutral white, color temperature (CCT) 4000 K, general color rendering index (CRI) Ra > 80. Polycarbonate luminaire body. Luminaire body color light gray (RAL 7035). With clampless closing technique for easy mounting suitable for the degree of protection of cover diffusers and luminaire bodies after connection. Dimensions (W x D): 1552 mm x 102 mm, luminaire height 91 mm. With digital dimming transformer (DALI) included. Degree of protection (DIN EN 60529): IP66, impact resistance rating in accordance with IEC 62262. Reference on plan **LF01A** (installations mainly in technical areas). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 366 N.P.E 20- LFE RIBA 4	Supply and installation of LED emergency lighting fixture for anti-panic area indication (equipped with symmetrical lens) for ceiling-mounted installation with the following characteristics: - Optics: standard heights - System type: (autonomous with centralized supervision) - Autonomy: 1h - Type: SE (Emergency Only, not permanent) - Minimum luminous flux in emergency (EN 60598-2-22): 403lm - Battery: Ni-Cd 4.8V 1.4Ah - Battery type: Nickel cadmium - Battery recharge time: 12h - Battery status: warning if battery not connected - Power supply: 230Vac - Power consumption with charged battery: 9.3W - Insulation class: II - Degree of protection: IP42 (from below), IP20 (from above) - Degree of protection against mechanical impact: IK07		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	- Operating temperature: 0°C to +40°C - Color: White - RAL 9003 - Complies with European standards: EN 60598-1, EN 60598-2-22, EN 61347-1, EN 61347-2-7, EN 61347-2-13, EN 62031, EN 62384 - Complies with RoHS2 2011/65/EU - Installation: recessed, Reference on plan **LFE04** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 367 N.P.E 20-QE	**DBT-OFF.B-0-2** electric switchboard Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 368 N.P.E 20- RI	Supply and installation of analysis chamber for air conditioning ducts, IP56, equipped with 30cm pipes. Including: - No. 1 Multi-sensor detector with dual optics and interactive addressed analog thermosensitive element with integrated isolator. Alarm threshold selectable from 22 available levels (optical only, thermal only or combined) auto-compensation function. CE CPD EN54-5, EN54-7, EN54-17 and EN54-18 certified. - No. 1 Standard analog/conventional detector base supplied with holder for adhesive label indicating detector type references. Reference on plan **FA08** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 369 N.P.E 21-HW.IT RB4	Supply and installation of active network equipment for the cabinet called "ENTRANCE ROOM EAST 1 - RK. B-E-1" , consisting mainly of: - n.1 Cisco C9500-48Y4C-A switch - Catalyst 9500 48-port x 1/10/25G + 4-port 40/100G, Advantage (Distribution Switch); - n.2 firewall Fortinet 400E with following configuration: cluster in HA consisting of 2 Firewalls, double power supply, 10Gb interfaces to Distribution; CORPORATE NETWORK - n.2 C9300 L-24 P-4X PoE, with modular uplink C 9300-NM-4X. Uplink interfaces must be equipped with n.2 x 10Gb SFP Multi Mode Fiber 850nm OM4 to handle 10Gb capacity (Access Switch) BMS NETWORK - n.2 Cisco C9300 L-24 P-4X PoE, with modular uplink C9300-NM-4X. Uplink interfaces must be equipped with n.2 x 1Gb 850nm SFP Multi Mode Fiber to handle 1Gb capacity (Access Switch) Each Switch must be complete with charges and accessories such as: - double power supply with relative connection cables - stack modules and cables where needed - SFP modules for copper and fiber optic connection (single mode or multimode as required by the project) - suitable support brackets - labelling - user licenses This includes charges for on-site programming of the equipment according to the specifications that will be produced by the Customer. **euro**	a corpo	
Nr. 370 N.P.E 21-LF- RIBA 4	Supply and installation of Outdoor pole head luminaire. To be used in combination with fastening as a luminaire for straight pole (included in the following offer) to be ordered separately or for curved pole. LED system consisting of 2 MLT LED modules with 4 LEDs each. Luminaire luminous flux 2200 lm, power consumption 20.00 W, maximum luminous efficiency of the luminaire 110 lm/W. Color of light neutral white, color temperature (CCT) 4000 K, overall color rendering index (CRI) Ra > 70. Color tolerance (initial MacAdam) ≤ 5 SDCM. Other LED light colors available upon request. Average LCLO(tq 25 °C) reference service life = 100,000 h. The light source is interchangeable in accordance with the requirements of the European Ecodesign Regulation (2019/2020). Luminaire body made of die-cast aluminum. Insulation class (EN 61140): II, degree of protection (DIN EN 60529): IP66, impact resistance rating in accordance with IEC 62262: IK09. Shaft available on request. Wind-exposed surface area fw 0.100 m2. Weight: 4.4 kg. With digital dimmable transformer (DALI). Power supply complying with the DALI-2 standard (EN 62386). Parameterizable ballast with luminous flux stabilization (CLO). The ballast is interchangeable in accordance with the requirements of the European Ecodesign regulation (2019/2020). Differential Mode / Common Mode surge resistance: 6 kV / 10 kV. Reference on plan **LF15** (installations External/Roof). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
Nr. 371 N.P.E 21- LFE RIBA 4	Supply and installation of LED emergency lighting fixture for escape route indication for ceiling installation including accessories for bracketing on light duct with the following characteristics: with the following features: - Function: Spy System (autonomous with centralized supervision) - Autonomy: 3h - Type: SE (Emergency Only, not permanent) - Average luminous flux in emergency: 403lm - Battery: Li-FePO4 6.4V 1.5Ah - Battery type: Lithium iron phosphate - Battery recharge time: 12h - Battery status: warning if battery not connected - Power supply: 230Vac - Power consumption with charged battery: 9.3W - Insulation class: II - Degree of protection: IP65 - Operating temperature: 0°C to +40°C - Color: Gray - Complies with European standards: EN 60598-1, EN 60598-2-22, EN 61347-1, EN 61347-2-7, EN 61347-2-13, EN 62031, EN 62384 - Photobiological hazard free according to EN 62471 - Complies with RoHS2 2011/65/EU - Installation: wall, recessed* (* with accessory) - Warranty 5 years - Included in the offer is adapter that allows attachment on electrified track. Reference on floor plan **LFE05b** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 372 N.P.E 21- QE	**DBCT-OFF.B-0-2** electric switchboard Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 373 N.P.E 21- RI	Supply and installation of Optical Repeater for concealed smoke detectors with single LED ceiling or wall installation Reference on plan **FA04/FA05** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 374 N.P.E 22- HW.IT RB4	Supply and installation of active network equipment for the cabinet called "IT ROOM - RK. B-IT-1" , composed mainly of: - n.2 Cisco C9500-48Y4C-A switch - Catalyst 9500 48-port x 1/10/25G + 4-port 40/100G, Advantage (Core Switch), Uplink interfaces must be equipped with 10Gb Single Mode 1310nm SFP; CORPORATE NETWORK - n.4 C9300 L-24 P-4X PoE, with modular uplink C 9300-NM-4X. Uplink interfaces must be equipped with n.2 x 10Gb SFP Multi Mode Fiber 850nm OM4 to handle 10Gb capacity (Access Switch) BMS NETWORK - n.4 Cisco C9300 L-24 P-4X PoE, with modular uplink C9300-NM-4X. Uplink interfaces must be equipped with n.2 x 1Gb 850nm SFP Multi Mode Fiber to handle 1Gb capacity (Access Switch) Each Switch must be complete with charges and accessories such as: - double power supply with relative connection cables - stack modules and cables where needed - SFP modules for copper and fiber optic connection (single mode or multimode as required by the project) - suitable support brackets - labelling - user licenses This includes charges for on-site programming of the equipment according to the specifications that will be produced by the Customer. **euro**	a corpo	
Nr. 375 N.P.E 22- LF- RIBA 4	Supply and installation of recessed LED luminaire with microprismatic cover dim. (600 x 600 mm). The prismatic PMMA surface of the optical system has an anti-reflection effect. With concentrating wide-beam light distribution. Glare rating according to UGR < 19 classification (EN 12464-1) For environments with video terminal use according to EN 12464-1 due to limited luminances L < 3000 cd/ ² for emission angle greater than 65° in all planes. Luminaire luminous flux 3400 lm, power consumption 31.00 W,		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	luminaire brightness 109 lm/W. Color of light warm white, color temperature (CCT) 3000 K, overall color rendering index (CRI) Ra > 80. Dimensions (W x D): 595 mm x 595 mm, luminaire height 35.5 mm. Insulation class (EN 61140): I, degree of protection (DIN EN 60529): IP20, impact resistance rating to IEC 62262: IK03, glow wire test temperature to IEC 60695-2-11 of 650 °C. Weight: 1.1 kg. With external power supply included, digitally dimming (DALI). Reference on plan **LF02** (installation office areas/support rooms). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 376 N.P.E 22- LFE RIBA 4	Supply and installation of LED emergency lighting fixture for indication of escape routes (equipped with asymmetric lens) for ceiling installation on ceiling including accessories for bracketing on light duct with the following characteristics: - System type: (autonomous with centralized supervision) - Autonomy: 3h - Type: SE (Emergency Only, not permanent) - Minimum luminous flux in emergency (EN 60598-2-22): 403m - Battery: Li-FePO4 9.6V 1.5Ah - Battery type: Lithium iron phosphate - Battery charging time: 12h - Battery status: warning if battery not connected - Power supply: 230Vac - Power consumption with charged battery: 9.3W - Insulation class: II - Degree of protection: IP65 (spotlight), IP20 (electronic module) - Operating temperature: 0°C to +40°C - Color: White - RAL 9003 - Conforms to European standards: EN 60598-1, EN 60598-2-22, EN 61347-1, EN 61347-2-7, EN 61347-2-13, EN 62031, EN 62384 - Photobiological risk free according to EN 62471 - Installation: surface mounted with dedicated accessory included - Warranty 5 years Adapter allowing attachment to electrified track is included. Reference on plan **LFE01b** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 377 N.P.E 22- RI	Supply and installation of addressable resettable manual fire alarm button with built-in isolator. CE CPD EN54-11 and EN54-17 certified. Supplied with recall key for wall installation. Includes: - No. 1 Red button bottom for wall installation - No. 1 aluminum sign 12x18cm for identification of alarm buttons bearing the symbol according to UNI EN ISO 7010 and the inscription PULSANTE ALLARME ANTINCENDIO Reference on plan **FA01** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 378 N.P.E 23- HW.IT RB4	Supply and installation of active network equipment for the cabinet called "TECHNICAL ROOM NORTH - RK. B-P1-1" , composed mainly of: CORPORATE NETWORK - n.4 C9300 L-24 P-4X PoE, with modular uplink C 9300-NM-4X. Uplink interfaces must be equipped with n.2 x 10Gb SFP Multi Mode Fiber 850nm OM4 to handle 10Gb capacity (Access Switch) BMS NETWORK - n.2 Cisco C9300 L-24 P-4X PoE, with modular uplink C9300-NM-4X. Uplink interfaces must be equipped with n.2 x 1Gb 850nm SFP Multi Mode Fiber to handle 1Gb capacity (Access Switch) Each Switch must be complete with charges and accessories such as: - double power supply with relative connection cables - stack modules and cables where needed - SFP modules for copper and fiber optic connection (single mode or multimode as required by the project) - suitable support brackets - labelling - user licenses This includes charges for on-site programming of the equipment according to the specifications that will be produced by the Customer. **euro**	a corpo	
Nr. 379 N.P.E 23- LF- RIBA 4	Supply and installation of Round ceiling/wall mounted LED fixture with opaline PMMA diffuser. With circular opaline diffuser, spherical in shape .Luminaire luminous flux 2200 lm, power consumption 22.00 W. Color of light warm white, color temperature (CCT) 4000 K, general color rendering index (CRI) Ra > 80. Diameter of diffuser Ø 360 mm. Allowable ambient temperature (ta): -20 °C - +25 °C. Insulation class (EN 61140): I, degree of protection (DIN EN 60529): IP66, impact resistance rating to IEC 62262: IK03, glow wire test temperature to IEC 60695-2-11 of 650 °C. Weight: 0.9 kg. Reference on plan **LF16** (indoor emergency staircase installation). All inclusive of all accessories and charges to give the system finished and functioning professionally.

	euro	cadauno	
Nr. 380 N.P.E 23- RI	Supply and installation of addressed acoustic optical panel with integrated isolator for fire alarm signaling. Features controlled output (24 VDC, 500 mA) for connecting conventional alarm devices. 24 VDC external power supply. Sound pressure of 94 dB @ 1 m. Ability to use 2 of 4 available tones and optical part for 2-stage alarm. IP54. Supplied with adhesive film FIRE ALARM. EN54-3 and EN54-17 certified. Includes: - No. 1 Relay interface for buzzer control; Reference on plan **FA02** All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 381 N.P.E 24- LF- RIBA 4	Supply and installation ofLED wired bases for continuous row system. Optical system: LED lenses Emission characteristic: concentratingEmission geometry: symmetricalDistribution of luminous intensity: directWired base made of sheet steel.Luminaire body color: white, (RAL 9016) Mounting location: Ceiling without recessed hole, Wall without recessed holeWith electronic ballast, digitally dimmable (DALI).Standard DALI-2 (EN 62386) Interchangeable ballast according to requirements under European Ecodesign regulation. Parameterized reference luminous flux of the wired base 12000 lm,power consumption 71.00 W,luminaire brightness 169 lm/W.Color rendering index: Ra > 80Light color: warm whiteColor temperature: 3000 KColor tolerance (initial MacAdam) ≤ 3 SDCMLength of the wired base: 2211 mm. Degree of protection (DIN EN 60529): IP20Protection degree toward the room: IP20Weight: 2.4 kg. Reference on plan **LF13** (Data Hall Hot Aisles). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 382 N.P.E 24- RI	Supply and installation of interactive addressable module with integrated isolator equipped with **1 input and 1 relay output** with changeover contact. Supplied in plastic box. CE CPD EN54-17 and EN54-18 certified. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 383 N.P.E 24A- QE	**DB-HVAC/DH.B.0-1** electric switchboard Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 384 N.P.E 25- LF- RIBA 4	Supply and installation of wire cover for continuous row system suitable for use in continuous row applications with IP20 and IP64 protection rating. Made of PVC, color gray silver. Length of the wire cover: 2211.5 mm. The following component is used for installation of LF03/LF14 light fixture (the former computed in dedicated section). Reference on plan **LF12** (Data Hall/Mep Gallery). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 385 N.P.E 25- RI	Supply and installation of interactive addressable module with integrated isolator equipped with **4 inputs and 4 relay outputs** with changeover contact. Supplied in plastic box. CE CPD EN54-17 and EN54-18 certified All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 386 N.P.E 25A- QE	**DB-HVAC/CA.B-0-1** electric switchboard Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
Nr. 387 N.P.E 26- LF- RIBA 4	Supply and installation of Joint Gasket for continuous row applications. Made of plastic material, silver gray color. The following component is used for the installation of LF03/LF14 light fixture (the former computed in dedicated section). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 388 N.P.E 26- RI	Connection point or predisposition point component fire detection system composed of: - empty pvc piping, length 25mm; - junction box (round or rectangular) conforming to the place of installation, for fixing device to be mounted on the ceiling/floor/wall in an easily accessible position; - part of the PH120' 2x1,5mmq fire-resistant cable for CPR-UNI9795 compliant smoke detection systems derived from the control unit; - label identifying the predisposition itself; All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 389 N.P.E 26A- QE	**DB-FTV.B-0-1** electric switchboard Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 390 N.P.E 27- LF- RIBA 4	Supply and installation of Carrier profile for single luminaires for continuous row IP64 LED or continuous row end elements. Length of the supporting profile: 2258 mm. With two 7-pin plug-socket pairs for quick electrical connection and cable end closure with protection against accidental contact. The heat-resistant feed-through wiring is made already at the factory complete with all required components. The following component is used for the installation of LF03/LF14 light fixture (the former computed in dedicated section). To be associated with the LF12 component. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 391 N.P.E 27- QE	**DB-WT.A/B-#/#** electric switchboard Supply and installation of electric switchboard, with the characteristics given in the project "Single-line diagrams", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs. - copper ground connection and including all wiring, labels, accessories. All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 392 N.P.E 27- RI	Connection point for fire dampers on air conditioning channel. Realization of connection of fire dampers on air conditioning channel, installed by the Contractor of mechanical systems, including junction box, connection to an addressable control module, connection to BMS for damper status control, pipes under track to the wall, and to sight in the false ceiling and cables of connection loop, with origin from the previous detector or from the back in channel, and cables of feeding type FTG18OM16 from the additional power supply. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 393 N.P.E 28- LF- RIBA 4	Supply and installation of Carrier profile for continuous row application IP64 LED. Length of the carrier profile: 4471 mm. With two 7-pin spinner pairs for quick electrical connection and cable end closure with protection against accidental contact. The heat-resistant feed-through wiring is made already at the factory complete with all required components. The following component is used for the installation of LF03/LF14 light fixture (the former computed in dedicated section). Reference on plan **LF08** (Data Hall/Mep Gallery). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 394	Supply and installation of dual infrared flame detector, analog addressed. CE certificate CPD EN54-10 class 1 and 2.		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
N.P.E 28- RI	Including: - 1 Standard base for analogue and conventional detectors. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 395 N.P.E 29- LF- RIBA 4	Supply and installation of Transparent cover for continuous row applications in reference to linear profile 2258mm The following component is used for the installation of LF03/LF14 light fixture (the former computed in dedicated section). To be associated with the LF12 component. All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 396 N.P.E 29- QE	Remote Power Panels **RPP-ER.X-E/W-1/2** Supply and installation of Remote Power Panels also referred to as "RPPs" to be placed in the Entrance Rooms of the Building to which they belong, with the characteristics shown in the project "Single Line Schemes", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs; - copper ground node and including all wiring, labels, accessories; - monitoring tripped circuit breakers; - measurement system with CT on all starts (for voltage, current, power and energy readings); - local display; - Ethernet communication; All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 397 N.P.E 29- RI	Fees for connection point or predisposition point mechanical system components to be interfaced to the fire detection equipment such as (valves/ flow switches, control units, manometers) present in the fire rooms, water treatment stations consisting of: - empty pvc piping, length 25mm; - junction box (round or rectangular) conforming to the place of installation, for fixing device to be mounted on the ceiling/floor/wall in an easily accessible position; - part of the PH120' 2x1,5mmq fire-resistant cable for CPR-UNI9795 compliant smoke detection systems derived from the control unit; - label identifying the predisposition itself; All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	a corpo	
Nr. 398 N.P.E 30- LF- RIBA 4	Supply and installation of Transparent Cover for continuous row applications with reference to linear profile 4471mm. The following component is used for the installation of LF03/LF14 light fixture (the former computed in dedicated section). To be associated with the LF08 component All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 399 N.P.E 30- QE	Remote Power Panels **RPP.MMR.A/B** Supply and installation of Remote Power Panels also referred to as "RPPs" to be placed in the MMR rooms of the Building to which they belong, with the specifications shown in the project "Single Line Schemes", and the technical specifications expressed in the "Special Tender Specifications". Including: - transport and pulling to the floor and related connection; - pocket holder including constructive electrical diagrams; - declaration of compliance with current regulations issued by the manufacturer; - nameplate and statutory monitoring signs; - copper ground node and including all wiring, labels, accessories; - monitoring tripped circuit breakers; - measurement system with CT on all starts (for voltage, current, power and energy readings); - local display; - Ethernet communication; All fully functional according to current CEI (Italian Electric Code) regulations. **euro**	a corpo	
Nr. 400 N.P.E 31- LF- RIBA 4	Supply and installation of lighting fixture for installation on continuous row system composition (computed in the previous chapters). Protection class IP20, designation D according to DIN EN 60598-2-24; With PMMA lens optics; Luminous intensity distribution: very wide; Recommended installation height: 3 - 6 m; Luminaire luminous flux 12600 lm; Power consumption 68 W; Color of light Neutral white; Correlated color temperature (CCT) 4000 K; Overall color rendering index (CRI) 80; including dimming ballast included (DALI);		

Id.Num. TARIFF	ARTICLE DESCRIPTION	unit of meas.	UNIT RATE
	Reference on plan **LF03** (installation technical areas type Data Hall). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 401 N.P.E 32- LF- RIBA 4	Supply and installation of lighting fixture for installation on continuous row system composition (computed in previous chapters). Protection class IP66, designation D according to DIN EN 60598-2-24; With PMMA lens optics; Luminous intensity distribution: wide; Recommended installation height: 4 - 8 m; Luminaire luminous flux 8000lm; Power consumption 50 W; Color of light Neutral white; Correlated color temperature (CCT) 4000 K; Overall color rendering index (CRI) 80; With ballast, dimming included (DALI); Reference on plan **LF14** (Mep Gallery installation). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 402 N.P.E 33- LF- RIBA 4	Supply and installation of fixing accessory for direct ceiling mounting of the continuous rows mentioned in the previous chapters. The following component is used for the installation of LF03/LF14 light fixture (the former computed in dedicated section). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 403 N.P.E 34- LF- RIBA 4	Supply and installation of End Head as an application terminal element for continuous row IP64 LED. The following component is used for installation of LF03/LF14 light fixture (the former computed in dedicated section). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 404 N.P.E 35- LF-RIBA 4	Supply and installation of Pair of 7-pole plug-socket for electrical connection of feed-through wiring for LED continuous rows. The following component is used for the installation of LF03/LF14+LF08/LF12 light fixture (the former computed in dedicated section). All inclusive of all accessories and charges to give the system finished and functioning professionally. **euro**	cadauno	
Nr. 405 N.P.E 36- LF- RIBA 4	Lighting fixture similar to LF01 complete with inverter kit for emergency lighting autonomy 1h Reference on plan **LF01e** (installations external stairs data hall). 1. GENERAL INFORMATION

The document **3603 ES E EM 03-** is an integral part of the project description with the following address. This project was prepared by L22, a part of Lombardini S.p.A. located at Via Lombardini 22, Milan.

This volume, along with the remaining volumes of the Technical Report, drawings, and documents produced by the Client related to the general supply conditions, must be countersigned for acceptance on every page and returned to the Client. Examining all the documents is, therefore, a fundamental condition for the quotation and execution of the systems. Everything contained within is also fundamental for the correct interpretation of the instructions and provisions found in the other project documents. If there are any doubts about the correct application of their content, you should inform the designer so that they can provide the necessary clarifications in a timely manner.

The designer cannot be held responsible for any consequences resulting from the failure to comply with the above.

1. CLARIFICATIONS

The descriptions provided here indicate the minimum functional performance requirements. The Contracting Company must carefully examine all the data and provisions contained in this document, as they will be fully and unconditionally responsible, by contractual agreement, for the correct functioning of the system, ensuring compliance with the specified conditions and operational requirements.
Regarding topics not covered or specific details not mentioned, it is required that the materials used and the execution of the work comply with European standards of equivalent value and have standardized dimensions according to the current Uni and DIN tables.
Further clauses regarding the relationship between the Client and the Contracting Company will be defined in the Contract of Award, to which this document and its attachments are an integral part.
Materials for which samples have been requested cannot be installed until they are accepted by the Site Management. The Contracting Company should not install materials rejected by the Site Management and should remove them from the construction site. The products to be installed should be those indicated in the project or, in the absence of a specific indication, those listed in the brand list.
The minimum warranty period is 24 (twenty-four) months from the start of operation, as established by the Italian Codice Civile, Art. 1667. During this period, all defective parts must be replaced free of charge and in the shortest possible time.
The prices include and compensate for all expenses for labour, necessary supplies, their processing and use, allowances for access, deposits, site occupation, temporary and different occupations, provisional means of labor, and any other conditions specified in the safety plan attached to the documentation, with no exceptions, as well as charges, transportation, unloading, and everything else necessary to ensure that the work is completed to the highest standards and in full efficiency. The prices also include compensation for all the expenses that the contractor will incur for this purpose, even if not explicitly specified or referred to in the various articles of the list, except for what is explicitly excluded and, in any case, the scaffolding for external works outside of buildings.

If the project documentation contains conflicting data or information, the more costly and safety-beneficial ones shall be considered. The type of contract is defined in the contract drafted by the Client. The Contract will be awarded to a General Contractor, who will be responsible for the complete implementation of the work, of which the project in question is one of the constituent parts.
All works related to the contract will be carried out by the contractor in accordance with the provisions and conditions specified in the project drawings. It is essential to note that these provisions are not exhaustive, as the contractor expressly commits to executing the work in perfect accordance with the state of the art, in compliance with current legal regulations, to deliver a fully operational system at the offered price. In any case, it is the responsibility and obligation of the installer to deal with any issues arising from the application of clearly incorrect indications, such as those due to printing errors or the omission of essential safety measures if such errors/omissions are detectable based on the technical knowledge that the installer, by law, must possess, ensuring the conformity of the systems with the state of the art.
All works must be coordinated with the execution of other tasks, and the construction schedule must be submitted to the Site Management. During the course of the work, in accordance with the site and Client's needs, temporary works may be required to maintain the operation of existing systems or to enable the temporary operation of systems covered by this contract. The Contractor will be responsible for the operation of functional areas that must be kept operational during the work.
No changes in the execution of the planned works can be made by the installation company without prior approval and written authorization from the Client and the Site Manager.
If personnel engage in actions deemed serious by the Site Manager, they are granted the authority to immediately expel them without the Contractor being entitled to seek an extension or damages.
The Contractor, upon signing the contract, indemnifies the Client from any possible recourse action by subcontractors in the event of a dispute between the Contractor and the subcontractor.
The following points are the responsibility of the Contractor:

- Costs related to procedures for the application and compliance with regulations, certificates, etc., regarding the installation.
- Costs related to commissioning, fine-tuning, and testing of the system.
- Training of the Client's personnel.
- Inspection costs.
- Warranty costs.
- Costs related to documentation, as-built drawings, manuals, operating instructions, certifications according to current regulations.
- Documentation as required by D.M. 37/08. Attached to the compliance declaration, forms for submitting the declaration to ISPESL and ASL/ARPA must be prepared, in accordance with DPR 462/01.
- Costs related to on-site safety.
- Costs for coordination with other Contractors directed by the Client.
- Costs for site cleaning.
- Disposal of waste materials in authorized landfills.
- Costs for the custody and protection of materials installed and stored.
- Site organization.
- Costs for connections and temporary systems.

- Costs for personnel hygiene.
